

Decentralized Estimation and Control for Multisensor Systems

Arthur G.O. Mutambara

CRC Press

Boca Raton Boston London New York Washington, D.C.

Contents

1	Introduction	1
1.1	Background	1
1.2	Motivation	3
1.2.1	Modular Robotics	4
1.2.2	The Mars Sojourner Rover	4
1.2.3	The MIT Humanoid Robot (Cog)	6
1.2.4	Large Scale Systems	7
1.2.5	The Russian Mir Space Station	7
1.2.6	The Space Shuttle Columbia	9
1.3	Problem Statement	12
1.4	Approach	13
1.4.1	Estimation	13
1.4.2	Control	13
1.4.3	Applications	13
1.5	Principal Contributions	14
1.6	Book Outline	15
2	Estimation and Information Space	19
2.1	Introduction	19
2.2	The Kalman Filter	19
2.2.1	System Description	20
2.2.2	Kalman Filter Algorithm	21
2.3	The Information Filter	22
2.3.1	Information Space	22
2.3.2	Information Filter Derivation	26
2.3.3	Filter Characteristics	28
2.3.4	An Example of Linear Estimation	28
2.3.5	Comparison of the Kalman and Information Filters	31
2.4	The Extended Kalman Filter (EKF)	33
2.4.1	Nonlinear State Space	34
2.4.2	EKF Derivation	34

2.4.3	Summary of the EKF Algorithm	38
2.5	The Extended Information Filter (EIF)	39
2.5.1	Nonlinear Information Space	39
2.5.2	EIF Derivation	40
2.5.3	Summary of the EIF Algorithm	43
2.5.4	Filter Characteristics	43
2.6	Examples of Estimation in Nonlinear Systems	44
2.6.1	Nonlinear State Evolution and Linear Observations	44
2.6.2	Linear State Evolution with Nonlinear Observations	46
2.6.3	Nonlinear State Evolution with Nonlinear Observations	48
2.6.4	Comparison of the EKF and EIF	51
2.7	Summary	53
3	Decentralized Estimation for Multisensor Systems	55
3.1	Introduction	55
3.2	Multisensor Systems	56
3.2.1	Sensor Classification and Selection	56
3.2.2	Positions of Sensors in a Data Acquisition System	59
3.2.3	The Advantages of Multisensor Systems	60
3.2.4	Data Fusion Methods	61
3.2.5	Fusion Architectures	62
3.3	Decentralized Systems	64
3.3.1	The Case for Decentralization	64
3.3.2	Survey of Decentralized Systems	66
3.4	Decentralized Estimators	68
3.4.1	Decentralizing the Observer	68
3.4.2	The Decentralized Information Filter (DIF)	69
3.4.3	The Decentralized Kalman Filter (DKF)	72
3.4.4	The Decentralized Extended Information Filter (DEIF)	74
3.4.5	The Decentralized Extended Kalman Filter (DEKF)	76
3.5	The Limitations of Fully Connected Decentralization	77
3.6	Summary	79
4	Scalable Decentralized Estimation	81
4.1	Introduction	81
4.1.1	Model Distribution	82
4.1.2	Nodal Transformation Determination	82
4.2	An Extended Example	83
4.2.1	Unscaled Individual States	83
4.2.2	Proportionally Dependent States	86
4.2.3	Linear Combination of States	88

4.2.4	Generalizing the Concept	93
4.2.5	Choice of Transformation Matrices	94
4.2.6	Distribution of Models	94
4.3	The Moore-Penrose Generalized Inverse: \mathbf{T}^+	96
4.3.1	Properties and Theorems of \mathbf{T}^+	97
4.3.2	Computation of \mathbf{T}^+	100
4.4	Generalized Internodal Transformation	101
4.4.1	State Space Internodal Transformation: $\mathbf{V}_{ji}(k)$	101
4.4.2	Information Space Internodal Transformation: $\mathbf{T}_{ji}(k)$	106
4.5	Special Cases of $\mathbf{T}_{ji}(k)$	108
4.5.1	Scaled Orthonormal $\mathbf{T}_i(k)$ and $\mathbf{T}_j(k)$	108
4.5.2	Diagonal $\mathbf{I}_j^+(\mathbf{z}_j(k))$	109
4.5.3	Nonsingular and Diagonal $\mathbf{I}_j^+(\mathbf{z}_j(k))$	109
4.5.4	Row Orthonormal $\mathbf{C}_j(k)$ and Nonsingular $\mathbf{R}_j(k)$	110
4.5.5	Row Orthonormal $\mathbf{T}_i(k)$ and $\mathbf{T}_j(k)$	111
4.5.6	Reconstruction of Global Variables	111
4.6	Distributed and Decentralized Filters	112
4.6.1	The Distributed and Decentralized Kalman Filter (DDKF)	112
4.6.2	The Distributed and Decentralized Information Filter (DDIF)	114
4.6.3	The Distributed and Decentralized Extended Kalman Filter (DDEKF)	116
4.6.4	The Distributed and Decentralized Extended Information Filter (DDEIF)	117
4.7	Summary	119
5	Scalable Decentralized Control	121
5.1	Introduction	121
5.2	Optimal Stochastic Control	121
5.2.1	Stochastic Control Problem	122
5.2.2	Optimal Stochastic Solution	123
5.2.3	Nonlinear Stochastic Control	126
5.2.4	Centralized Control	127
5.3	Decentralized Multisensor Based Control	128
5.3.1	Fully Connected Decentralized Control	129
5.3.2	Distribution of Control Models	131
5.3.3	Distributed and Decentralized Control	132
5.3.4	System Characteristics	134
5.4	Simulation Example	135
5.4.1	Continuous Time Models	135
5.4.2	Discrete Time Global Models	137
5.4.3	Nodal Transformation Matrices	138
5.4.4	Local Discrete Time Models	139

5.5	Summary	140
6	Multisensor Applications: A Wheeled Mobile Robot	141
6.1	Introduction	141
6.2	Wheeled Mobile Robot (WMR) Modeling	142
6.2.1	Plane Motion Kinematics	143
6.2.2	Decentralized Kinematics	145
6.3	Decentralized WMR Control	149
6.3.1	General WMR System Models	150
6.3.2	Specific WMR Implementation Models	152
6.3.3	Driven and Steered Unit (DSU) Control	158
6.3.4	Application of Internodal Transformation	159
6.4	Hardware Design and Construction	160
6.4.1	WMR Modules	161
6.4.2	A Complete Modular Vehicle	163
6.4.3	Transputer Architecture	165
6.5	Software Development	167
6.5.1	Nodal Program (Communicating Control Process)	168
6.5.2	Configuration Program (Decentralized Control)	173
6.6	On-Vehicle Software	174
6.6.1	Nodal Software	174
6.6.2	Decentralized Motor Control	176
6.6.3	WMR Trajectory Generation	176
6.7	Summary	181
7	Results and Performance Analysis	183
7.1	Introduction	183
7.2	System Performance Criteria	183
7.2.1	Estimation Criteria	184
7.2.2	Control Criteria	185
7.3	Simulation Results	186
7.3.1	Innovations	186
7.3.2	State Estimates	187
7.3.3	Information Estimates and Control	188
7.4	WMR Experimental Results	189
7.4.1	Trajectory Tracking	190
7.4.2	Innovations and Estimated Control Errors	192
7.5	Discussion of Results	204
7.5.1	Local DSU Innovations	204
7.5.2	Wheel Estimated Control Errors	206
7.5.3	WMR Body Estimates	206
7.6	Summary	207

8	Conclusions and Future Research	209
8.1	Introduction	209
8.2	Summary of Contributions	209
8.2.1	Decentralized Estimation	210
8.2.2	Decentralized Control	210
8.2.3	Applications	210
8.3	Research Appraisal	211
8.3.1	Decentralized Estimation	211
8.3.2	Decentralized Control	213
8.4	Future Research Directions	213
8.4.1	Theory	214
8.4.2	Applications	215
	Bibliography	217
	Index	227
