

Ready-to-Run Java 3D™

Kirk Brown
Daniel Petersen

With a Foreword by James Gosling

Wiley Computer Publishing

John Wiley & Sons, Inc.

NEW YORK • CHICHESTER • WEINHEIM • BRISBANE • SINGAPORE • TORONTO

Contents

Acknowledgments	ix
Foreword	xi
Chapter 1 Getting Started	1
Overview of the Book and Technology	3
Media in the Browser	4
Java 3D in the Browser	5
How to Put Java 3D onto Your Web Site	8
How This Book Is Organized	12
Who Should Read This Book?	14
Tools You Will Need	14
What's on the CD-ROM?	16
Using the CD-ROM Programs	16
Summary	17
Chapter 2 A 3D Graphics Primer	19
Creating Simple Objects	21
A Point, a Line, a Polygon	22
Solid Surfaces	23
Moving a 3D Object Around	25
Mapping Worlds onto 2D Displays	30
Viewing and Clipping	32
Shading	32
Lighting	34
Texture Mapping	35
Chapter 3 Meet the Java 3D API	39
History of Java 3D	40
When to Use Java 3D	41
Extending the Java API	41
Java 3D Design Goals	41

The Java 3D API Interfaces	50
Vector Math Library	50
Java 3D Case Study: Carnival	60
Step 1: Specify Which Java Classes to Import	61
Step 2: Declare the Program as an Applet to Run in a Browser	66
Step 3: Invoke the Standalone Option	67
Step 4: Create a Scene and Attach It to a Virtual Universe	67
Step 5: Define Objects and Their Attributes	69
Step 6: Define Behaviors and Event Handling	70
Step 7: Define the Viewing Model	70
Step 8: Add Everything to the Scene and Enjoy the Show	70
Chapter 4 Beautiful Geometry	73
Morphing Description and Usage	73
Morphing Parameters Explained	74
Morphing HTML File Explained	77
Geometry Concepts	82
Shape3D Class	83
Geometry Convenience Classes	84
Morphing	93
Morphing Code Example	95
Moving On	116
Chapter 5 Translation, Rotation, and Scaling	117
Planets Applet Description and Usage	117
Planets Applet Parameters Explained	118
Planets HTML File Explained	120
Java 3D Translation Concepts	124
Basic Steps to Perform Translation	125
Applet Example Explained	127
Related Translation Constructs	135
Applet Example (Planets.java)	144
Moving On	170
Chapter 6 Light and Transparency	171
ShowTime Description and Usage	172
ShowTime Applet Parameters Explained	173
Light Concepts	175
Setting Influencing Bounds	185
Scoping	186
Transparency	187
Concepts Summary	187
ShowTime Source Code (ShowTime.java)	187
Moving On	196

Chapter 7 Behaviors, Interpolators, and Event Detection	197
Shuffle Applet Description and Usage	198
Shuffle Parameters Explained	198
Scene Behavior Concepts	199
Interpolators	200
Alpha Objects	201
Advanced Interpolators	214
Understanding Behaviors	218
Creating Custom Behavior Classes	220
Moving On	240
 Chapter 8 Fog Effects	 241
Fog Applet Description and Usage	241
Fog Applet Parameters Explained	242
Fog HTML File Explained	243
Understanding Fog Concepts	243
Depth-Cueing	244
Java 3D Fog Node	245
Understanding Fog Constants	248
Fog and Related Constructors	248
Fog and Related Methods	250
Linear versus Exponential Fog	250
Summary	254
Java 3D Fog Class Code	255
Moving On	267
 Chapter 9 Texture Mapping	 269
Sign Description and Usage	269
Sign Applet Parameters Explained	270
Texture Mapping Concepts	271
The Texture Object	273
Step-by-Step Texture Mapping	274
Related Texture Mapping Constants	277
Texture Mapping Related Constructors	280
Texture Mapping Related Methods	282
Texture Mapping Code Example	285
Moving On	293
 Chapter 10 Java 3D Sound	 295
Sound3D Description and Usage	296
Sound3D Applet Parameters Explained	297
Java 3D Sound Concepts	297
Sound Data	299

Initial Gain	300
Loop	300
Release Flag	301
Continuous Flag	301
Enable Sound	301
Scheduling Bounds	301
Scheduling Bounding Leaf	302
Prioritize Sound	302
Duration	302
Number of Channels Used to Play Sound	303
Preparing a Sound to Be Played	303
Playing Status	303
Creating 3D Sound	304
MediaContainer Object	304
MediaContainer Constants	305
Sound3D Applet Source Code	308
Moving On	323
Chapter 11 3D Text and Fonts	325
TieRack Description and Usage	326
TieRack Applet Parameters Explained	326
TieRack Source Code	327
The Text2D Object	337
The Text3D Object	338
Text3D Variables	340
Text3D Constructors	341
Text3D Methods	342
Moving On	344
Chapter 12 Java 3D Web Tools and Utilities	345
Creating New Shapes	345
Surfacer	346
VRML to Java3D Converter	347
AC3D	348
Java 3D Helper Classes	348
MouseRotate Class	349
MouseTranslate Class	349
MouseZoom Class	350
ObjectFile Class	350
Box Class	351
Cone Class	351
Cylinder Class	352
Sphere Class	352
Conclusion	352

Appendix A Java Programming Primer	355
Installing the Java Development Kit (JDK)	357
Running Java Tools in Microsoft Windows	358
Running Java Tools in Solaris	359
Solaris PATH and CLASSPATH	360
Running Applets with the AppletViewer	360
Debugging Programs with the Java Debugger (JDB)	361
Compiling Java Source Code	361
Running Java Programs	362
The Java Language	362
Comments Syntax	363
Tokens	364
Java Data Types	365
Program Structure	365
Java Application Life Cycle	366
Declaring a Class in Java	367
How to Declare Variables	369
How to Declare Methods	370
Initialization	371
Constructors	371
Using and Calling Class Variables and Methods	372
Creating Subclasses	373
Overriding Methods	373
Error Handling	374
The Abstract Object	376
Creating an Interface	377
Creating Packages	378
Comparing Java Applets to Applications	378
Appendix B What's on the CD-ROM?	381
What Are Freeware and Shareware?	382
Hardware Requirements	382
Java 3D API Implementation	383
Installing the Book's Software from the CD-ROM	383
Using the Software	384
Accessing JDK and Java 3D over the Web	388
User Assistance and Information	389
Index	391
