

PROPERTIES OF
**Crystalline
Silicon**

Edited by

ROBERT HULL

University of Virginia, USA

Contents

Foreword by Roger de Keersmaecker	x
Introduction by Robert Hull	xii
Contributors	xiii
Abbreviations	xx
1 MELT GROWTH (<i>Edited by T. Abe</i>)	1
1.1 Si melt: density, surface tension and viscosity <i>K. Terashima</i>	3
1.2 Si melt convection in a crucible <i>K. Kakimoto</i>	8
1.3 Si melt growth: segregation of light elements, dopants and heavy metals <i>S. Kobayashi</i>	16
1.4 Si melt growth: oxygen transportation during Czochralski growth <i>K. Hoshikawa and X. Huang</i>	23
1.5 Si melt growth: concentration and diffusivities of vacancies and interstitials <i>K. Wada</i>	33
1.6 Si melt growth: grown-in defects and simulation of their formation <i>W. von Ammon and E. Dornberger</i>	39
2 EPITAXIAL GROWTH (<i>Edited by J.C. Bean</i>)	53
2.1 c-Si MBE: sources, doping, growth rates, uniformity <i>J.C. Bean</i>	55
2.2 Gas-source MBE of c-Si and related materials <i>D.W. Greve</i>	69
2.3 UHV/CVD and related growth techniques for Si and other materials <i>D.W. Greve</i>	77
3 STRUCTURAL AND MECHANICAL PROPERTIES (<i>Edited by A. George</i>)	89
<u>Crystalline structure and elastic properties</u>	
3.1 Diamond cubic Si: structure, lattice parameter and density <i>Y. Okada</i>	91
3.2 Elastic constants and moduli of diamond cubic Si <i>A. George</i>	98
3.3 High pressure phases of c-Si <i>A. George</i>	104
<u>Dislocations and mechanical properties</u>	
3.4 Core structures and energies of dislocations in Si <i>A. George</i>	108
3.5 Dislocation mobilities in c-Si <i>K. Sumino and I. Yonenaga</i>	113
3.6 Macroscopic mechanical behaviour of Si at high temperature <i>H. Siethoff</i>	122
3.7 Mechanical behaviour of Si at low temperature <i>G. Vanderschaeve</i>	136
3.8 Fracture and the brittle-ductile transition in Si <i>S.G. Roberts</i>	144
4 THERMAL PROPERTIES (<i>Edited by M.R. Brozel</i>)	149
4.1 Specific heats of c-Si and molten Si <i>H.-M. Kagaya and T. Soma</i> (<i>updated by M.R. Brozel</i>)	151
4.2 Thermal expansion coefficients of c-Si <i>H.-M. Kagaya and T. Soma</i> (<i>updated by M.R. Brozel</i>)	153
4.3 Melting points of Si <i>J.C. Brice (updated by M.R. Brozel)</i>	155
4.4 Phonon spectrum of c-Si <i>M.N. Wybourne (updated by M.R. Brozel)</i>	159
4.5 Thermal conductivity of c-Si <i>M.N. Wybourne (updated by M.R. Brozel)</i>	165
4.6 Thermal diffusivity of c-Si <i>M.N. Wybourne (updated by M.R. Brozel)</i>	168
4.7 Surface tension of liquid Si <i>S.C. Hardy (updated by M.R. Brozel)</i>	170
4.8 Heat of fusion of Si <i>J.C. Brice (updated by M.R. Brozel)</i>	171

5	SURFACE PROPERTIES AND CLEANING (<i>Edited by R.J. Nemanich</i>)	173
5.1	Reconstruction of Si (001), (111) and (110) surfaces <i>V. Zielasek, F. Liu and M.G. Lagally</i>	175
5.2	Structure of clean silicon surfaces: vicinal Si (001) and Si (111) surfaces <i>V. Zielasek, F. Liu and M.G. Lagally</i>	183
5.3	Electronic structure of c-Si surfaces <i>R.I.G. Uhrberg</i>	189
5.4	Electrical characterization of c-Si surfaces <i>J. Ruzyllo and P. Roman</i>	202
5.5	Passivation of c-Si surfaces <i>Y.J. Chabal</i>	211
5.6	Wet chemical cleaning and surface preparation of Si <i>M.M. Heyns and R.J. Nemanich</i>	219
5.7	HF vapour cleaning of oxide on c-Si <i>R.J. Carter and R.J. Nemanich</i>	226
5.8	Plasma and other in situ cleaning approaches to cleaning of c-Si surfaces <i>H. Ying, R.J. Carter and R.J. Nemanich</i>	235
6	STRUCTURAL MODELLING (<i>Edited by M. Heggie</i>)	243
6.1	Approximate and parametrised quantum chemical methods for structural modelling of c-Si <i>P. Deak</i>	245
6.2	Approximate and parametrised quantum mechanical methods for structural modelling of c-Si: the tight binding approximation <i>G. Jungnickel</i>	257
6.3	Electronic structure calculations of oxygen point defects in c-Si <i>C.P. Ewels and R. Jones</i>	267
6.4	Theoretical modelling of minor impurities in c-Si <i>A. Mainwood</i>	277
6.5	c-Si surfaces - review of theoretical studies <i>G.P. Srivastava</i>	288
6.6	Microscopic modelling of grain boundaries and stacking faults in c-Si <i>P.D. Bristowe</i>	299
6.7	Vacancy defects in c-Si: electronic and ionic structures <i>R.M. Nieminen and M.J. Puska</i>	309
6.8	Self interstitials in c-Si: structure and migration mechanisms <i>J.-L. Mozos and R.M. Nieminen</i>	319
6.9	Ab initio modelling techniques applied to c-Si <i>P.R. Briddon</i>	330
6.10	Modelling of dislocations in c-Si <i>N. Lehto and M.I. Heggie</i>	357
7	BAND STRUCTURE (<i>Edited by R.J. Turton</i>)	379
7.1	Band structure of c-Si: Overview <i>R.J. Turton</i>	381
7.2	Calculational methods for determining the band structure of bulk c-Si <i>R.J. Turton</i>	383
7.3	Spin orbit splitting in bulk c-Si <i>B. Schmiedeskamp</i>	390
7.4	Variation of bandgap with temperature in c-Si <i>J. Weber</i>	391
7.5	Variation of bandgap with doping in bulk c-Si <i>H.S. Bennett and R.J. Turton</i>	394
7.6	Variation of bandgap with pressure in bulk c-Si <i>R.J. Turton</i>	399
7.7	Band structure and bandgaps in strained bulk c-Si <i>G. Theodorou</i>	402
7.8	Effective masses of holes and electrons in c-Si <i>D.J. Dunstan</i>	408
8	ELECTRICAL PROPERTIES (<i>Edited by S.H. Jones</i>)	411
8.1	Resistivity and carrier concentrations of doped c-Si, and sheet resistance of ion- implanted bulk Si <i>M. Pawlik, D. Schechter and K.H. Nicholas</i>	413
8.2	Piezoresistance of c-Si <i>M.V. Chaparala and B.S. Shivaram</i>	421
8.3	Electron mobility, diffusion and lifetime in c-Si <i>P.J. Mole, J.M. Rorison and J.A. del Alamo</i>	430
8.4	Hole mobility, diffusion and lifetime in c-Si <i>P.J. Mole and J.A. del Alamo</i>	443

8.5	Carrier ionization: field, temperature and orientation dependence <i>J.P.R. David</i>	450
8.6	Modelling equations and parameters for numerical simulation <i>A. Strachan</i>	457
9	IMPURITIES IN SILICON (<i>Edited by S.J. Pearton</i>)	477
9.1	Diffusion of O in c-Si <i>B. Pajot</i>	479
9.2	Segregation coefficient of O in c-Si <i>B. Pajot</i>	484
9.3	Solubility of O in c-Si: <i>B. Pajot</i>	488
9.4	O-related IR absorption in c-Si <i>B. Pajot</i>	492
9.5	Precipitation, segregation and IR absorption of O in c-Si <i>S.J. Pearton</i>	499
9.6	Segregation coefficient, solubility and IR absorption of C in c-Si <i>S.J. Pearton</i>	503
9.7	Diffusion of C in c-Si <i>K.G. Barraclough and R.C. Newman</i>	506
9.8	Hydrogen diffusion and solubility in c-Si <i>M. Stavola</i>	511
9.9	Hydrogen containing point defects in c-Si <i>M. Stavola</i>	522
9.10	Nitrogen in c-Si <i>M. Suezawa</i>	538
9.11	Solubility and diffusion of transition metal impurities in c-Si <i>W. Schroter and M. Seibt</i>	543
9.12	Deep levels of transition metal impurities in c-Si <i>W. Schroter and M. Seibt</i>	561
9.13	Electronic states of chalcogen-related donors in c-Si <i>P. Wagner</i>	573
9.14	Properties of rare-earth doped c-c-Si <i>A. Polman and S. Coffa</i>	583
9.15	Alkali impurities (Na, K, Li) in c-Si <i>S.J. Pearton</i>	593
10	DOPANTS IN SILICON (<i>Edited by K. Jones</i>)	597
10.1	Diffusion of Al, Ga, In and Tl in c-Si <i>D. de Cogan (updated by K. Jones)</i>	599
10.2	Diffusion of P, As and Sb in c-Si <i>A.A. Brown, P.B. Moynagh, P.J. Rosser and Y.M. Haddara (updated by K. Jones)</i>	607
10.3	Boron-interstitial clustering in c-Si <i>M.D. Giles</i>	617
10.4	Solubility of B, Al, Ga, In, Tl, P, As and Sb in c-Si <i>D. Nobili and D. de Cogan (updated by K. Jones)</i>	620
10.5	Ion implantation of B and P in c-Si <i>D.J. Godfrey</i>	636
11	DEFECT LEVELS IN SILICON (<i>Edited by H. Grimmeis</i>)	641
11.1	Vacancies and interstitials and their interactions with impurities in c-Si <i>G.D. Watkins</i>	643
11.2	Electrical and optical properties of dislocations in c-Si <i>E.A. Steinman and E.B. Yakimov</i>	653
11.3	Shallow thermal donors in c-Si <i>C.A.J. Ammerlaan</i>	659
11.4	Thermal double donors in c-Si <i>C.A.J. Ammerlaan</i>	663
11.5	Double donors and acceptors in c-Si <i>C.A.J. Ammerlaan</i>	669
12	OPTICAL PROPERTIES (<i>Edited by D.E. Aspnes</i>)	677
12.1	Optical properties of c-Si: general aspects <i>D.E. Aspnes</i>	679
12.2	Optical functions of intrinsic c-Si for photon energies up to 7.5 eV: table <i>D.E. Aspnes</i>	683
12.3	Optical functions of intrinsic c-Si for selected photon energies: table <i>D.E. Aspnes</i>	691
12.4	Optical functions of liquid Si <i>D.E. Aspnes</i>	696

13	PHOTOCONDUCTIVITY AND PHOTOGENERATED CARRIERS (<i>Edited by M. Willander</i>)	697
13.1	Photoconductivity of c-Si: general remarks <i>V. Grivickas, J. Vaitkus and M. Willander</i>	699
13.2	Photoconductivity spectra of ion implanted c-Si <i>M. Willander and B.G. Svensson</i>	702
13.3	Photoconductivity spectra of electron irradiated c-Si <i>M. Willander and J.L. Lindstrom</i>	705
13.4	Bulk lifetimes of photogenerated carriers in intrinsic c-Si <i>V. Grivickas and M. Willander</i>	708
13.5	Bulk lifetimes of photogenerated carriers in doped and treated c-Si <i>V. Grivickas and M. Willander</i>	712
13.6	Surface recombination velocity for c-Si <i>V. Grivickas, J.A. Tellefsen and M. Willander</i>	718
13.7	Mobility and diffusion of photogenerated carriers in intrinsic c-Si <i>V. Grivickas and M. Willander</i>	722
13.8	Mobility and diffusion of photogenerated carriers in doped and treated c-Si <i>V. Grivickas and M. Willander</i>	726
14	IMPLANTATION/IRRADIATION OF SILICON(<i>Edited by R. Elliman</i>)	731
14.1	Ion implantation range theory <i>R.E. Brindos, P.H. Keys and K.S. Jones</i>	733
14.2	Ion implantation into c-Si: basic mechanisms and modelling <i>T.D. Rubia and M.-J. Caturla</i>	739
14.3	Electrical properties of ion implanted and electron irradiated c-Si <i>S. Coffa and F. Priolo</i>	746
14.4	Structure of ion implantation induced defects in c-Si <i>K.S. Jones</i>	755
14.5	Energy levels, structure and properties of point defects induced by ion implantation and electron irradiation of c-Si <i>B.G. Svensson</i>	763
14.6	Dopant ionization energies in c-Si <i>P.H. Keys, R.E. Brindos and K.S. Jones</i>	773
15	GETTERING (<i>Edited by E.R. Weber</i>)	775
15.1	Gettering of transition metals in c-Si: gettering in silicon technology <i>H. Hieslmair, S.A. McHugo, A.A. Istratov and E.R. Weber</i>	777
15.2	Gettering of transition metals in c-Si : gettering mechanisms <i>H. Hieslmair, S.A. McHugo, A.A. Istratov and E.R. Weber</i>	781
15.3	Gettering of transition metals in c-Si: gettering techniques <i>H. Hieslmair, S.A. McHugo, A.A. Istratov and E.R. Weber</i>	783
15.4	Gettering of transition metals in c-Si: summary of current state of understanding <i>H. Hieslmair, S.A. McHugo, A.A. Istratov and E.R. Weber</i>	793
15.5	Gettering of transition metals in c-Si: future trends <i>H. Hieslmair, S.A. McHugo, A.A. Istratov and E.R. Weber</i>	794
16	ETCHING (<i>Edited by K.R. Williams</i>)	809
16.1	Silicon wet isotropic etch rates <i>K.R. Williams</i>	811
16.2	Silicon wet orientation dependent (anisotropic) etch rates <i>K.R. Williams</i>	815
16.3	Silicon preferential (defect delineation) etch rates <i>K.R. Williams</i>	822
16.4	Silicon plasmaless gas-phase etch rates <i>K.R. Williams</i>	825
16.5	Silicon sputtering and ion milling etch rates <i>K.R. Williams</i>	828
16.6	Silicon chemical plasma and reactive ion etch (RIE) rates <i>K.R. Williams</i>	832
16.7	Silicon reactive ion beam and ion beam assisted etch rates <i>Y.H. Lee and M.R. Polcari</i>	842
16.8	Silicon laser-assisted etch rates <i>Y.H. Lee and M.R. Polcari</i>	845

17	METAL-SILICON CONTACTS (<i>Edited by L. Schowalter</i>)	849
17.1	Recent advances in silicide technologies <i>K. Maex</i>	851
17.2	Epitaxial silicide contacts <i>R. Tung</i>	863
18	SILICON ON INSULATOR TECHNOLOGY (<i>Edited by S.S. Iyer</i>)	885
18.1	Overview of SOI <i>S.S. Iyer</i>	887
18.2	Silicon on sapphire <i>I. Lagnado and P.R. de la Houssaye</i>	889
18.3	Physics and chemistry of wafer bonding <i>M.K. Weldon and Y.J. Chabal</i>	905
18.4	Bond, grindback and polish SOI <i>K. Mitani</i>	923
18.5	Bond and etch back SOI <i>G. Pfeiffer and S.S. Iyer</i>	938
18.6	Hydrogen induced exfoliation of c-Si <i>M.K. Weldon and Y.J. Chabal</i>	942
18.7	Diffusion in SOI material <i>S.R. Crowder</i>	957
18.8	SOI with porous Si <i>T. Yonehara</i>	976
18.9	Technology and properties of Simox <i>M.J. Anc and D.K. Sadana</i>	979
18.10	Comparison of properties of available SOI materials <i>M.A. Mendicino</i>	992
	SUBJECT INDEX	1003
