

European Wireless '99

Mobile Kommunikation

Vorträge der ITG-Fachtagung
vom 6. – 8. Oktober 1999 in München

Wissenschaftliche Tagungsleitung:
Prof. Dr.-Ing. Bernhard H. Walke, RWTH Aachen

Veranstalter:
Informationstechnische Gesellschaft im VDE (ITG)

Sponsoren:
EUREL, Brüssel, Belgien
IEEE: Communications Society Microwave Theory and Techniques
German Section

Contents

Wireless Radio Techniques

Chairperson: R. Weigel, University of Linz – Austria

Characterization of Propagation Channel in the Presence of an Imperfect Semi-Infinite Half Plane Using Asymptotic Path Integral and Raytracing Techniques	13
L. C. Ong, S. Ptchaiah, M. Chia, The National University Singapore	
Numerical Study of Radio Wave Propagation in Tunnels	17
N. Y. Zhu, F. M. Landstorfer, University of Stuttgart, Germany	
Reduction of DOA-Estimation-Errors Caused by Antenna Array Imperfections	21
G. Sommerkorn, D. Hampicke, R. Klukas et al, TU Ilmenau, Germany	
A GSM900/1800 Dual-Band MMIC Power Amplifier Using Outside Base / Center Via Hole Layout Multi-Finger HBT	25
K. Mori, K. Choumei, T. Shimura et al, Muitsubishi Elec. Corp., Japan <i>Paper not available at time of print</i>	
A GSM/GPS Receiver with a Bandpass Sigma-Delta Analog to Digital Converter	27
K. Boehm, T. Müller, DaimlerChrysler Research Center, Ulm, Germany; T. Hentschel, Dresden University of Technology	

Components

Chairperson: K.-P. Estola, Nokia Research Center – Finland

A Look at Optimized Laser Processing for the Manufacturing of Passive Microwave Modules	31
H. Eskelinen, Lappeenranta University of Technology, Finland	
Linearised Mixer System Using a Simplified feedforward Technique for Digital Mobile Communication	35
M. Chongcheawchamnan, I. D. Robertson, University of Surrey, United Kingdom	
Low Noise Considerations in SiGe BiCMOS Technology for RF Applications	39
R. Plana, S. Kovacic, H. Lafontaine, Z. Feng Zhou, SiGe Microsystems Inc, Canada; M. Borgarino, LAAS-CNRS, France	
Functional Multilayer Ceramic Substrate for Power Amplifier Module	45
T. Shirasaki, K. Tagami, T. Kubo, C. Makihara, KYOCERA Corporation, Japan	
Nonlinear Design of Low Phase Noise Voltage Controlled Oscillator for Mobile Communication System	51
M. Lee, Electronics and Telecommunications Research Institute, Korea; S. Nam, Seoul National University, Korea;	

Opening Session of European Wireless '99

Chairperson: B. Walke, Aachen University of Technology – Germany

- European Research Towards the Next Generation of Wireless Systems (Invited) 55**
B. Arroyo-Fernandez, European Commission, DGXIII
- UMTS and IMT 2000, the path to high speed global mobile multimedia (Invited) 57**
F. Hillebrand, ETSI/SMG, Germany

Smart Antennas 1

Chairperson: J. Bach Andersen, Aalborg University – Denmark

- Downlink Beamforming for FDD Mobile Radio Systems Based on Spatial Covariances . . . 65**
W. Utschick, J. A. Nossek, Munich University of Technology, Germany
- On the Directivity as a Performance Criterion for Constrained Beamforming Algorithms 69**
M. Schubert , H. Boche, Heinrich-Hertz-Institut für Nachrichtentechnik GmbH, Germany
- Improving the System Capacity of UMTS Using Digital Beamformer 75**
Y. J. Guo, M. Davies, M. Zarri, S. Vadgama, E. Fukuda, Fujitsu Europe Telecom R&D Centre, United Kingdom
- Optimum Feeding of Path Antenna for Wireless Communications 81**
K. Hettak, G. Y. Delisle, Laval University, Canada
- A prototype of an adaptive integrated antenna system for cellular networks. 87**
P. Eskelinen, H. Eskelinen, M. Lohtander, Lappeenranta University of Technology, Finland;
K. Tiihonen, Aerial Company, Finland

Satellite Channels

Chairperson: B. Evans, University of Surrey – UK

- Phase and Amplitude Measurements and Statistics of Land Mobile Satellite Channel 91**
C. Briso, J. I. Alonso, Universidad Politecnica De Madrid, Spain;
J. M. Blas, Universidad Europea de Madrid, Spain
- Shadowing Characteristics in Satellite Signal at S-Band using ETS-VI 97**
T. Wakabayashi, A. A. Aboudebra, K. Tanaka, Tokai University, Japan;
S. Yamamoto, H. Wakana, Ministry of Posts and Telecommunications, Japan
- Multilayer Planar Array Antennas for Smart User Terminals for Satellite Communication and Navigation 103**
F. Klefenz, A. Dreher, German Aerospace Center, Germany;
S. Gupta, Space Application Center, India
- Ray Tracing Techniques and its Applications in Land Mobile Satellite Propagation 107**
M. Döttling, T. Zwick, W. Wiesbeck, University of Karlsruhe, Germany

Smart Antennas 2

Chairperson: P. E. Leuthold, ETH Zürich – Switzerland

Uplink and Downlink Field Trial with a GSM/DCS1800 Smart Antenna Base Station	113
A. Kuchar, M. Taferner, Technical University of Vienna, Austria; M. Tangemann, C. Hoek, Alcatel Corporate Research Center Stuttgart, Germany	
Effects of Nonlinear Transmit Amplifiers in Smart Antennas for Wireless Systems	119
M. Wennström, A. Rydberg, T. Öberg, Uppsala University, Sweden	
Link Capacity in Point to Multipoint Fixed Radio Access Systems with Smart Antennas	125
T. Schöberl, T. Wixforth, T. Focke, C. Paßmann, Robert Bosch GmbH FV/SLH, Germany	
Constrained Beam Forming for 2D Planar Antenna Arrays	129
T. Kuhwald, Ilmenau University of Technology, Germany; H. Boche, Heinrich-Hertz-Institut für Nachrichtentechnik Berlin GmbH, Germany	
Low-Cost Planar Millimetrewave Duplex Transponder with Integrated Patch Antenna for two-way Radio on Fibre Communications	135
Y. Hao, H. Ghafouri-Shiraz, P. Gardner, P. S. Hall, University of Birmingham, UK	

HIPERLAN 2

Chairperson: G. Bostelmann, Alcatel Sel AG – Germany

HIPERLAN Type 2 Standardisation – An Overview	139
M. Radimirsch, V. Vollmer, Robert Bosch GmbH, Germany	
Link Performance of the Hiperlan/2 Physical Layer in Fading Environments	145
J. Khun-Jush, P. Schramm, U. Wachsmann, Ericsson Eurolab Deutschland GmbH, Germany; F. Wenger, Ericsson Mobile Data Design AB, Sweden	
Baseband Processing for PMP-radio Systems with Reduced Complexity	151
W. Zirwas, K. H. Möhrmann, Siemens AG, Germany	
Performance Evaluation of the MAC Protocol of the ETSI BRAN HIPERLAN/2 Standard	157
A. Hettich, A. Kadelka, Aachen University of Technology, Germany	
Effect of Link Adaptation on Overall Capacity in HIPERLAN-Systems	163
K. Kluge, Ilmenau University of Technology, Germany	

WLAN IEEE 802.11

Chairperson: J. D. Buechs, Robert Bosch GmbH – Germany

IEEE 802.11 or ETSI BRAN HIPERLAN/2: Who will win the race for a high speed wireless LAN standard?	169
A. Hettich, M. Schröther, Aachen University of Technology, Germany	
Influence of Hidden Terminals over the Performance of the IEEE 802.11 LANs	175
Z. Hadzi-Velkov, L. Gavrilovska, University "Sv. Kiril i Metodij", Macedonia	
A Vertical Approach to Energy Management	181
R. Krämer, M. Methfessel, Institute of Semiconductor Physics, Germany	

Power Saving in Wireless LANs - Analysing the RF Transmission Power and MAC Retransmission Trade-Off	187
J.-P. Ebert, A. Wolisz, TU Berlin, Germany	

Mobile Internet and E-Commerce

Chairperson: F. Williams, Ericsson Eurolab Deutschland GmbH – Germany

Adaptation of the SET Protocol to Mobile Networks and to the Wireless Application Protocol	193
K. Wrona, G. Zavagli, Ericsson Eurolab Deutschland GmbH, Germany	
Micropayments for Mobile Networks	199
M. Peirce, D. O' Mahony, Trinity College Dublin, Ireland	
Agent-based banking transactions & information retrieval – What about performances issues?	205
J. Hartmann, R. Evensen, Ericsson Eurolab Deutschland GmbH, Germany; C. Görg, P. Farjami, H. Long, Aachen University of Technology, Germany	
Mobile Agent Communication in Wireless Networks	211
H. Helin, K. Raatikainen, University of Helsinki, Finland; H. Laamanen, Sonera Corporation, Finland	
The Integration of two Worlds: Wireless and Internet	217
K. David, W.-D. Rau, Technical University of Brandenburg, Germany; B. Heinrichs, CISCO Systems GmbH, Germany <i>Paper not available at time of print</i>	

Equalisation and Coding

Chairperson: W. Koch, Ericsson Eurolab Deutschland GmbH – Germany

Aperiodic properties of binary Rudin-Shapiro sequences and a lower bound on the merit-factor of sequences with a quadratic phase function	219
S. Stanczak, H. Boche, Heinrich-Hertz-Institut für Nachrichtentechnik GmbH, Germany	
Investigation of Channel Estimation for W-CDMA (UMTS FDD-Mode)	225
T. Frey, R. Grimminger, M. Bossert, University of Ulm, Germany	
Combined Spread Spectrum – Spread Time CDMA System Employing DFT.	229
J. Duan, I. Oka, C. Fujiwara, Osaka City University, Japan	
A Low-Overhead Synchronisation Scheme for Acquisition in OFDM and Related Transmission Methods	235
R. Müller, A. Bury, J. Lindner, University of Ulm, Germany	
Column Distance for ISI channels with a Matched Filter Receiver	241
P. Moqvist, A. Cedergren, T. Aulin, Chalmers University of Technology, Sweden	

Wireless Multimedia 1

Chairperson: J. Eberspächer, Munich University of Technology – Germany

Performance Analysis of Realtime Applications in Mobile Packet Switched Networks . . .	245
A. Schieder, U. Horn, R. Kalden, Ericsson Eurolab Deutschland GmbH, Germany	
Quality of Service of Internet Applications over GPRS	251
P. Stuckmann, P. Seidenberg, Aachen University of Technology, Germany	
Application of Spectral Extrapolation Techniques on 6-MHz Doppler Measurements for 8-MHz DVB-T Systems	257
A. Hayn, W. Henees, R. Jakoby, University of Darmstadt, Germany; I. Gaspard, Technologiezentrum der Deutschen Telekom AG, Germany	
MPEG-2 Encoded VoD Services over Rician Fading Channels	263
H. Ma, M. El Zarki, University of Pennsylvania, USA	

Ray Tracing and Channel Models 1

Chairperson: A. Baier, Mannesmann Mobilfunk GmbH – Germany

Generation of N Correlated Rayleigh Fading Processes for the Simulation of Space-Time-Selective Radio Channels	269
A. Hansson, T. Aulin, Chalmers University of Technology, Sweden	
Statistical Analysis of Time-Variant Directional Mobile Radio Channels Based on Wide-Band Measurements	273
D. Hampicke, A. Richter, A. Schneider, Ilmenau University of Technology, Germany	
Modeling Time-Variant Wideband Indoor Radio Channels with Rough Scattering Surfaces: A Comparison	279
F. Layer, H. Früchting, University of Kassel, Germany	
Parameter Validation for a Space-Time Channel Models	285
N. Lohse, M. Stege, J. Jelitto, M. Bronzel, G. Fettweis, Dresden University of Technology, Germany	
Investigation of the Characteristics of Measured Delay Power Density Spectra for the 5.2GHz Indoor Radio Channel	291
T. Englert, R. Kattenbach, H. Früchting, University of Kassel, Germany	

Traffic Performance

Chairperson: B. Fino, CNAM – France

How Many Cells Should Be Considered to Accurately Predict the Performance of Cellular Networks?	297
M. A. Marsan, G. De Carolis, E. Leonardi, R. L. Cigno, M. Meo, Politecnico di Torino, Italy	
Congestion Control in WCDMA with Respect to Different Service Classes	303
T. Balon, M. Meyer, J. Sachs, Ericsson Eurolab Deutschland GmbH, Germany	
Performance of Hybrid ARQ Types for TDD Mode	309
P. Slanina, F. Raji, C. Mecklenbräucker, Siemens AG, Austria	

Maximum Number of Users Which Can be Served by TETRA Systems	315
M. Steppler, Aachen University of Technology, Germany	
Stochastic Automata Network Description of Layer – 2 Radio Communication Protocols for Performance Analysis	321
M. Ostermann, Aachen University of Technology, Germany	
Forthcoming Mobile and Wireless Systems: Manufacturer's View	
Chairperson: W. Wiesbeck, University of Karlsruhe – Germany	
Always Best Connected (Invited)	327
H. Eriksson, Ericsson, Sweden	
<i>Paper not available at time of print</i>	
Internet and Mobile Multimedia to Every Pocket (Invited)	329
J. Kuusi, Nokia, Finland	
UMTS and whats coming beyond (Invited)	331
S. Schuster, Siemens AG, Germany	
<i>Paper not available at time of print</i>	
Mobility Management	
Chairperson: W. Mende, DeTeMobil – Germany	
Robust and Soft: Handover design for high-tier Mobile ATM systems	333
H.-J. Vögel, Munich University of Technology, Germany	
Improvement of the Performance of the Mobile Satellite Systems by Sophisticated Handover Management – Extended Abstract	339
V. Obradovic, S. Cigoj, Aachen University of Technology, Germany	
TCP Performance Analysis of Inter-System Handover Between WLAN and a UMTS Radio Access Network	345
M. Gerdes, T. Lohmar, R. Keller, Ericsson Eurolab Deutschland GmbH, Germany	
An Architecture for a Universal Distributed Location Service	351
A. Leonhardi, U. Kubach, University of Stuttgart, Germany	
Spectrum Sharing	
Chairperson: P. W. Baier, University of Kaiserslautern – Germany	
A Method for Simulation of Spectral Compatibility of Mobile Communication Systems	357
M. P. Althoff, P. Seidenberg, Aachen University of Technology, Germany	
Dynamic Channel Allocation and SDMA in Irregular Cell Layouts	361
C. Hartmann, Munich University of Technology, Germany	
Sharing Rules for DECT and PHS Providing Fair Access to the Commonly Used Frequency Band	367
S. Mangold, M. Siebert, Aachen University of Technology, Germany	

Modulation and Coding

Chairperson: J. P. Linnartz, Philips Research – The Netherlands

A Robust and Low Complexity FCB Detection Algorithm for GSM	373
B. Yang, R. Hartmann, Siemens AG, Germany	
An optimized Synchronization Preamble Structure and Sequence for OFDM Based Wireless LANs	379
T. Dölle, R. Böhnke, T. Kenschak, Sony International (Europe) GmbH, Germany	
A New DS-CDMA Interference Cancellation Scheme for Space-Time Rake Processing	385
P. Li, W. Utschick, J. A. Nossek, Munich University of Technology, Germany	
Generalized Concatenated Encoded Gaussian Filtered CPM	391
M. Bossert, G. Haas, A. Häutle, H. Dieterich, University of Ulm, Germany; S. Shavgulidze, Georgian Technical University, Georgia	
Turbo Coding for W-CDMA Systems	397
J. Li, Y. Tanaka, Fujitsu Laboratories Ltd., Japan	

Wireless Ad-hoc Networks

Chairperson: J. Dunlop, University of Strathclyde – UK

Cellular Like Ad-hoc Networks: Smooth Migration from ad-hoc Networks Towards Cellular Networks	403
A. Hettich, Aachen University of Technology, Germany	
W-CHAMB: A Wireless Channel Oriented Ad-hoc Multihop Broadband Network – Comparison with IEEE 802.11	409
B. Xu, B. Walke, Aachen University of Technology, Germany	
Performance of the Wireless Ad-hoc Network W-CHAMB	415
M. Lott, B. Walke, Aachen University of Technology, Germany	
Random Access for Wireless Ad-hoc Broadband Networks	421
M. Lott, Aachen University of Technology, Germany	

Source and Channel Coding

Chairperson: J. Hagenauer, Munich University of Technology – Germany

Usage of the Half Rate and Enhanced Full Rate Speech Codecs in the German D2 GSM Network with Respect to Speech Quality and Capacity Aspects	427
C. Leifeld, F. Wittenberg, Mannesmann Mobilfunk GmbH, Germany	
New Architectures for Compressed Speech Transmission in Mobile Core Networks	433
G. Klas, Siemens AG, Germany	
Simulation Results for Woven Codes with Outer Warp	439
R. Jordan, J. Freudenberger, M. Bossert, University of Ulm, Germany	

Ray Tracing and Channel Models 2

Chairperson: E. Bonek, Technical University of Vienna – Austria

Novel Algorithm for Fast Prediction of Path Loss and Delay Spread of Indoor Communication Channels	445
U. Karthaus, University of Paderborn, Germany	
On the Performance of an Advanced 3D Ray Tracing Method	449
M. Lott, Aachen University of Technology, Germany	
New mm wave indoor and outdoor channel sounding result: Elevated base station antenna eliminates strong fading	455
R. Noe, U. Karthaus, J. Bracke, University of Paderborn, Germany	
Statistical Channel Modelling based on Raytrace Simulations	459
J. E. Dietert, S. Karger, B. Rembold, Aachen University of Technology, Germany	
A Hybrid Methode Combining FE/BEM with the UTD for Calculating the Effects of Real Surroundings on Antenna Characteristics	465
M. Alaydrus, V. Hansen, University of Wuppertal, Germany	

Network Architectures

Chairperson: D. Grillo, Fondazione Ugo Bordoni – Italy

Interference Analysis for a Hierarchical GSM Network with Picocells Using Total Frequency Hopping with Adaptive Frequency Allocation	471
J. Deißner, G. Fettweis, Dresden University of Technology, Germany	
Fast Uplink Signalling in the UMTS FDD mode	477
C. Herrmann, B. Fink, Y. Du, Philips Research, Germany	
A Two-Layer Medium Access Framework	483
A. C. K. Lam, D. J. Skellern, Macquarie University, Australia	
Investigation of Wireless Communications Systems using Dynamic Simulation Models including Simultaneous Field Strength Prediction	489
J. Voigt, J. Hübner, E. Förster, G. P. Fettweis, Dresden University of Technology, Germany	

Wireless Multimedia 2

Chairperson: G. Fettweis, Dresden University of Technology – germany

Towards a UMTS security architecture	495
G. Horn, K. Müller, Siemens AG, Germany; B. Vinck, Siemens ATEA, Belgium	
Security Architecture for a Cellular ATM Mobile Radio System	501
I. Herwono, R. Popp, Aachen University of Technology, Germany	
Testing Scenarios for a Cellular Wireless ATM Demonstrator	509
U. Kauschke, T. Grabs, D. Hetzer, Deutsche Telekom AG T-Mobil, Germany	

Authors	515
