Contents

Acknowledgments	xi
Reader's Guide to the Book	xiii
Chapter 1 The Java™ Industry	1
Introduction	1
The Java Platforms	4
ISO and Java	9
HotJava Browser	9
HotJava Views	9
JavaOS	10
JavaServer	10
Java Electronic Commerce	10
JavaSpaces	10
Jini	11
Java Naming and Directory Interface	11
Summary	11
Chapter 2 Understanding the Java Foundation Classes	13
Introduction	13
Delegation Event Model	15
Desktop Colors	24
Printing	27
ScrollPane Container	30

Popup Menu	32
Mouseless Operation	33
Data Transfer	36
Lightweight Component Framework	43
The Swing Set	46
Drag and Drop	50
Java 2D	51
Summary	51
Chapter 3 Using Java Media	53
Introduction	53
Welcome to Java City!	53
Design: Reaching Java City by Bridge from the Old World to the New	54
Java Media API Overview	57
Java City Implementation	63
A Recipe for a Multimedia Web Using the JMF, Java 2D, and Java Sound	66
Using Java 2D in Java City	70
Using Java 3D to Implement a Virtual Reality Experience of Java City	71
Chapter 4 Mastering Networking and I/O Techniques	73
Introduction	73
Basic Networking Principles	74
Java Networking Principles	76
Networking and Java Input and Output	87
Summary	97
Chapter 5 Using JavaBeans	99
Introduction	99
JavaBeans Design Goal	99

Bean Events	103
Bean Properties	103
Bean Reflection and Introspection	105
Bean Customization	111
The Glasgow Additions	113
Summary	114
Chapter 6 Designing Distributed Applications	115
Introduction	115
Application Architectures	116
The Three-Tiered Advantage	123
Deploying Three-Tiered Applications	128
Limits of the Three-Tiered Architecture	130
Making the Move	133
Integrating Legacy Systems	136
Using the Java Platform in the Enterprise	139
Summary	143
Chapter 7 Mastering Java Remote Method Invocation Techniques	145
Introduction	145
Building on Past Experiences	146
Back to the Drawing Board	148
Distributed Systems Contrasted	149
RMI Design Goals	151
RMI System Architecture	152
Distributed Programming with RMI	154
A Simple RMI Client/Server Example	155
Callbacks from Server to Client	164
Passing Objects as Method Arguments	168
Remote Polymorphism at Last	171
RMI and the Java Servlet API	176

Object Serialization Examples	179
The Future of Java RMI	183
Summary	184
Chapter 8 Mastering JDBC Techniques	185
Introduction	185
JDBC Architecture	187
Using JDBC	189
Anatomy of a JDBC Application	191
Callable Statements	204
Handling Large Data Fields	205
Adding Value to an RDBMS	207
JDBC 2.0	216
Summary	220
Chapter 9 Servlets and the Java Web Server	221
Introduction	221
The Java Web Server Platform	222
Advantages of Servlets	222
A Simple Servlet	224
Anatomy of an HTTP Servlet	225
Installing the Servlet	228
Some Considerations with Java Web Server	233
Core Servlets	236
User Input	236
Using Init Parameters	242
Servlet Beans	244
Page Compilation	248
Templates	250
Session Tracking	256
Servlets and the Java Enterprise APIs	259
Summary	266

Chapter 10 Enterprise JavaBeans	267
Introduction	267
Enterprise JavaBeans	268
Example Session Bean	271
Choosing a Container	277
Under the Hood of EJBs	277
Example Entity Bean	279
EJB Architectures	287
Summary	290
Chapter 11 Using Java Threads	291
Introduction	291
What Are Threads?	291
Using Java Threads	294
Scheduling	304
Synchronization	313
Java on Multiprocessor Systems	327
Thread-Safe Classes	328
Java Threads versus POSIX	328
Summary	329
Chapter 12 Java Security	331
Introduction	331
Java Security Fundamentals	334
Security, Applets, and Web Browsers	346
Security, Applications, and the Enterprise	351
Extending the Security Model	352
Protection Domains and Java Applications	367
The Java Cryptography Extension	368
Security-Related Bugs	374
Summary	376

Chapter 13 Using the Java Native Method Interface	379
Introduction	379
The JNI	380
Method Naming	384
Parameter Naming	385
Referencing Data from a Native Method	387
Accessing Java Fields and Methods	389
Error Handling from Native Methods	391
Invoking Java from Native Code	391
Summary	394
Chapter 14 Understanding Network Computers	395
Introduction	395
What Is a Network Computer?	396
Is a PC an NC?	399
Network Computer Advantages	401
The Network Computer Market	404
Network Computer Competitors	408
Designing Applications for Network Computers	410
When Is My Client Too Big?	415
Deploying and Managing Network Computers	417
A Fallacy of Cost and Benefits	422
Summary	424
Chapter 15 Understanding JavaOS and JavaStation Details	425
Introduction	425
Overview of Sun's JavaStation Family	425
Summary	441
JavaOS	442
The "Main" Application (HotJava?)	457
JavaStation Software Bundle (Netra.j)	463

Future Directions	464
Summary	466
Chapter 16 The Future of Java	469
Introduction	469
The Java Revolution	470
Vertical Market APIs	472
Maintaining Simplicity	474
Hegemony of the Java Platform	475
New Application Architectures	478
Jini	483
Summary	484
Appendix A Further Reading	485
Appendix B Authors on the Net	487
Index	491
