

S. Sugano N. Kojima (Eds.)

Magneto-Optics

With 237 Figures and 17 Tables

Springer

Contents

1 Spectroscopy and Optical Applications of Rare-Earth- and Transition-Metal-Doped Materials	1
<i>T. Kushida</i>	
1.1 Introduction	1
1.2 Optical Spectra of Rare-Earth and Transition-Metal Ions in Solids	2
1.3 Solid-State Laser Materials	22
1.4 Long-Lasting Phosphorescent Phosphors and Photostimulable Phosphors	28
1.5 Persistent Spectral Hole-Burning	31
References	33
2 Elementary Excitations in Magnetically Ordered Materials	37
<i>N. Kojima</i>	
2.1 Introduction	37
2.2 Double Excitations in Spin Cluster System	38
2.3 Cooperative Excitations in the Magnetically Ordered State	39
2.4 Exotic Elementary Excitations in Frustrated Spin System	57
2.5 Exciton Dynamics in Magnetically Ordered State	64
References	73
3 Raman Spectroscopy of Magnetic Compounds with Strong Electron-Correlation	75
<i>S. Sugai</i>	
3.1 Strongly Correlated Electron System	75
3.2 Raman Scattering	82
3.3 Raman Scattering in Two-Leg Spin Ladders $\text{Sr}_{14-x-y}\text{Ca}_x\text{Y}_y\text{Cu}_{24}\text{O}_{41}$	90
References	105
4 Nonlinear Optics of Antiferromagnetic Compounds	107
<i>Y. Tanabe, M. Fiebig, E. Hanamura</i>	
4.1 Introduction	107
4.2 Macroscopic Theory of the Nonlinear Susceptibilities	112
4.3 Microscopic Theory of the Nonlinear Susceptibilities	116
4.4 Comparison with Experiments	128
4.5 Discussion and Future Problems	131
References	135

5 Faraday and Kerr Effects in Ferromagnets	137
<i>K. Shinagawa</i>	
5.1 Introduction	137
5.2 Faraday and Kerr Effects	138
5.3 Kerr Rotation in Ferromagnetic CrBr ₃	147
5.4 Faraday Rotation in Magnetic Garnets	154
5.5 Summary and Outlook	171
References	173
Addenda	175
6 Magnetic Polarons in Diluted Magnetic Semiconductors ...	179
<i>S. Takeyama</i>	
6.1 Introduction	179
6.2 Bound Magnetic Polarons	181
6.3 Formation Mechanism of Magnetic Polarons	184
6.4 Localized Magnetic Polarons	186
6.5 Optical Detection of Free Magnetic Polarons	187
6.6 Two-Dimensional Exciton Magnetic Polarons	198
6.7 Summary	206
References	207
7 Magneto-Optics of Diluted Magnetic Semiconductors: New Materials and Applications	211
<i>K. Ando</i>	
7.1 Introduction	211
7.2 <i>sp-d</i> Exchange Interactions and Magneto-Optics	212
7.3 Cd _{1-x} Mn _x Te: A Prototype Diluted Magnetic Semiconductor	219
7.4 Magneto-Optics of New Diluted Magnetic Semiconductors	226
7.5 Magneto-Optic Applications of Diluted Magnetic Semiconductors ..	235
7.6 Conclusion	241
References	241
8 Optical Control of Magnetic Properties in Molecule-Based Magnets	245
<i>S. Ohkoshi, K. Hashimoto</i>	
8.1 Introduction	245
8.2 Molecule-Based Magnet	246
8.3 Magnetism of Prussian Blue Analogs	247
8.4 Mixed Ferro-Ferrimagnetism	250
8.5 Photomagnetism	257
8.6 Photo-Induced Magnetic Pole Inversion	263
8.7 Conclusion	268
References	269

9 Magneto-Optical Recording	271
<i>M. Kaneko</i>	
9.1 Review of Magneto-Optical Disks	271
9.2 Manufacturing of Optical Disks	272
9.3 Readout of Signals from an Optical Disk	275
9.4 Magnetic Material for Thermo-Magnetic Recording	280
9.5 Recording on Magneto-Optical Disks	284
9.6 Magneto-Optical Effect in Readout from Magneto-Optical Disk	288
9.7 High-Density Magneto-Optical Recording	294
References	315
 A Appendix:	
The Magnetic Space-Group and Its Applications	319
<i>S. Sugano</i>	
A.1 Non-Unitary Group	319
A.2 Co-Representation	321
A.3 Wigner Test	322
A.4 Applications to Spectroscopy	323
References	328
 Index	329
