

SEMICONDUCTOR QUANTUM OPTOELECTRONICS

FROM QUANTUM PHYSICS TO SMART DEVICES

Proceedings of the Fiftieth Scottish
Universities Summer School in Physics,
St. Andrews, June 1998.

A NATO Advanced Study Institute

Edited by

A Miller — University of St. Andrews
M Ebrahimzadeh — University of St. Andrews
D M Finlayson — University of St. Andrews

Series Editor

P Osborne — University of Edinburgh

Copublished by
Scottish Universities Summer School in Physics &
Institute of Physics Publishing, Bristol and Philadelphia

Contents

In-well and cross-well carrier transport in quantum wells	1
<i>Alan Miller</i>	
Coherent exciton dynamics: time resolved polarimetry	25
<i>Arthur L Smirl</i>	
Coherent control and switching	95
<i>Jeremy J Baumberg</i>	
Excitons in strongly coupled semiconductor microcavities	121
<i>Theodore Norris</i>	
Coherent terahertz spectroscopy	151
<i>Peter Haring Bolivar</i>	
Visible-emitting quantum well lasers	193
<i>Peter Blood</i>	
Microcavity light emitting diodes	213
<i>Roel Baets</i>	
Materials for vertical cavity surface emitting and edge emitting lasers	265
<i>Olga Blum Spahn</i>	
Analysis of vertical cavity surface emitting laser diodes (VCSELs)	295
<i>Karl J Ebeling</i>	
Polarisation properties of vertical cavity surface emitting lasers	339
<i>Maxi SanMiguel</i>	
Semiconductor heterostructures: a quantum lego for infrared technology	367
<i>Emmanuel Rosencher</i>	
Band-structure engineering of new photonic materials: high performance mid-infrared quantum cascade lasers	391
<i>Federico Capasso</i>	
Optics for digital information processing	433
<i>David A B Miller</i>	
Presentations by participants	463
Participants' addresses	467
Index	475
