

Wolfgang Torge

Gravimetry

Walter de Gruyter
Berlin · New York 1989

Contents

1. Introduction	1
1.1 Task of Gravimetry	1
1.2 Historical Development	3
1.2.1 Theoretical Foundation (17th and 18th Century)	4
1.2.2 Pendulum Measurements and Geodetic-Geophysical Utilization (18th and 19th Century)	6
1.2.3 Torsion Balance and Gravimeter Observations and Utilization in Applied Geophysics (First Half of the 20th Century)	10
1.2.4 Establishment of Gravity Networks and Geodetic- Geophysical Results (Second Half of the 20th Century) ..	12
1.2.5 Assessment of Temporal Gravity Changes	16
1.3 National and International Organizations	17
1.3.1 National Institutions	17
1.3.2 International Cooperation	19
1.3.3 Scientific Communication and Documentation	21
2. Theory of the Gravity Field	22
2.1 Coordinate Systems	22
2.1.1 Earth-Fixed Geocentric System	22
2.1.2 Local Gravity Field Systems	23
2.2 Fundamental Relationships in the Gravity Field	24
2.2.1 Gravity Acceleration and Gravity Potential	24
2.2.2 Differential and Integral Formulas for the Gravitational Potential	26
2.2.3 Spherical Harmonic Expansion	28
2.3 Geometry of the Gravity Field	31
2.3.1 Equipotential Surfaces and Plumblines	31
2.3.2 Gravity Gradient and Curvature of the Gravity Field	32
2.4 Gravity Field Models	34
2.4.1 Optimal and Standard Models	34
2.4.2 Level Ellipsoid	35
2.4.3 Normal Gravity Field	37

2.5	Height Systems	39
2.5.1	Ellipsoidal Heights	39
2.5.2	Heights in the Gravity Field	40
2.6	Disturbing Quantities in the Gravity Field	42
2.6.1	Disturbing Potential	42
2.6.2	Gravity Anomaly	43
2.6.3	Second Derivatives of the Disturbing Potential	45
2.7	Statistical Description of the Gravity Field	45
2.7.1	Anomaly Covariance Function	45
2.7.2	Interpolation in the Gravity Field	47
2.7.3	Anomaly Degree Variances	48
3.	Space-Time Structure of the Exterior Gravity Field	50
3.1	Normal Gravity Field of the Earth	50
3.1.1	Normal Gravity Formulas	50
3.1.2	Geodetic Reference System 1980	52
3.2	Free-Air Anomalies	54
3.2.1	Point Free-Air Anomalies	54
3.2.2	Height Dependency	56
3.2.3	Mean Free-Air Anomalies	57
3.3	Global and Regional Structures of the Terrestrial Gravity Field	60
3.3.1	Correlation of the Free-Air Anomalies	60
3.3.2	Degree Variance Model	62
3.3.3	Spherical Harmonic Model	64
3.4	Temporal Gravity Variations	65
3.4.1	Changes of Gravitational Constant and Earth Rotation ..	65
3.4.2	Gravimetric Tides of the Rigid Earth	67
3.4.3	Gravimetric Earth Tides and Ocean Loading Tides	70
3.4.4	Terrestrial Mass Displacements	73
3.5	Gravity Fields of Moon and Planets	75
3.5.1	Lunar Gravity Field	75
3.5.2	Planetary Gravity Fields	77
4.	Importance of Gravity in Natural and Engineering Sciences	79
4.1	Gravity in Physics	79
4.1.1	Gravity Data in Metrology	79
4.1.2	Determination of the Gravitational Constant	81
4.2	Gravity Field and Geodesy	84
4.2.1	Gravity and Position Determination	84

4.2.2	Global Gravity Field Approximation.....	86
4.2.3	Local Gravity Field Approximation.....	88
4.2.4	Gravity and Elevation.....	91
4.3	Gravity Field and Geophysics.....	92
4.3.1	Gravity Field and Density Distribution.....	92
4.3.2	Global Density Models.....	96
4.3.3	Bouguer Anomalies, Isostatic Anomalies.....	100
4.3.4	Gravity Field and Crust-Mantle Structure.....	102
4.3.5	Applied Gravimetry.....	109
4.3.6	Gravity Field and Topography of Sea Surface and Sea Floor.....	113
4.4	Gravity Field and Geodynamics.....	116
4.4.1	Gravity Field, Tectonics, and Isostasy.....	116
4.4.2	Temporal Gravity Changes and Recent Geodynamics....	121
4.5	Gravity Field and Orbit Computations.....	124
4.5.1	Astronomy and Astronautics.....	124
4.5.2	Terrestrial Navigation.....	126
5.	Absolute Gravity Measurements.....	128
5.1	Free-Fall Methods: Fundamentals.....	128
5.1.1	Free Fall.....	128
5.1.2	Symmetric Rise and Fall.....	129
5.1.3	Free Fall in a Non-Homogeneous Gravity Field.....	131
5.1.4	Distance and Time Measurement.....	133
5.1.5	Atmospheric Pressure and Microseismics.....	136
5.1.6	Error Sources and Accuracy.....	139
5.2	Free-Fall Experiments and Results.....	144
5.2.1	Laboratory Experiments 1950-1970.....	144
5.2.2	Permanent Absolute Gravity Stations.....	145
5.2.3	Transportable Free-Fall Instruments.....	149
5.2.4	Transportable Rise and Fall-Instruments.....	164
5.3	Pendulum Method.....	168
5.3.1	Mathematical Pendulum and Wire Pendulum.....	168
5.3.2	Physical Pendulum and Reversible Pendulum.....	171
5.3.3	Error Sources and Accuracy.....	174
5.3.4	Pendulum Experiments and Results.....	179
6.	Relative Gravity Measurements.....	184
6.1	Dynamic Method.....	185
6.1.1	Relative Pendulum Measurements: Fundamentals.....	185
6.1.2	Relative Pendulum Instruments and Results.....	186

6.1.3	Inverted Pendulum	189
6.1.4	Vibrating String Gravimeter	191
6.2	Static Method	194
6.2.1	Vertical Spring Balance	194
6.2.2	Lever Spring Balance	196
6.2.3	Astatization	199
6.2.4	Non-Elastic Counterforces	201
6.3	Design Features of Spring Gravimeters	203
6.3.1	Main Construction Components	203
6.3.2	Elastic Springs	203
6.3.3	Pick-Off Systems	205
6.3.4	Leveling Device	208
6.3.5	Compensation and Shielding Devices	210
6.4	Calibration of Relative Gravimeters	212
6.4.1	Calibration Function	212
6.4.2	Calibration by Inclination Change	215
6.4.3	Calibration by Change of Mass	216
6.4.4	Calibration with Feedback System	218
6.4.5	Calibration Lines and Calibration Systems	219
6.5	Static Spring Gravimeters	224
6.5.1	Developments until 1950	224
6.5.2	Lever Torsion Spring Balances (Askania System)	228
6.5.3	Quartz Spring Gravimeters (Worden System)	232
6.5.4	Astatized Metal Spring Gravimeters (LaCoste and Romberg System)	237
6.6	Error Sources and Accuracy	241
6.6.1	Instrumental Error Effects	241
6.6.2	External Error Effects	244
6.6.3	Gravimeter Drift	249
6.6.4	Accuracy	254
7.	Gravity Measurements in Inaccessible Areas and on Moving Platforms	258
7.1	Gravity Measurements in Inaccessible Areas	258
7.1.1	Measurements on the Sea-Floor	258
7.1.2	Measurements in Boreholes	260
7.1.3	Measurements on the Moon	261
7.2	Gravity Measurements on Moving Platforms	262
7.2.1	Fundamentals	262
7.2.2	Vertical Disturbing Accelerations	264
7.2.3	Horizontal Disturbing Accelerations	267

7.2.4	Inertial Accelerations due to Earth Rotation.....	271
7.3	Sea and Airborne Gravimeter Systems.....	273
7.3.1	Early Gravity Measurements at Sea.....	273
7.3.2	Lever Spring Balance Systems.....	274
7.3.3	Vertical Measurement Systems.....	277
7.3.4	Vibrating String Gravimeters.....	280
7.3.5	Force-Balanced Accelerometers.....	281
7.4	Error Sources and Accuracy.....	283
7.4.1	Sea Gravimetry.....	283
7.4.2	Airborne Gravimetry.....	287
7.5	Inertial Gravimetry.....	290
7.5.1	Fundamentals.....	290
7.5.2	Inertial Measurement Systems and Observation Procedure.....	293
7.5.3	Error Sources and Accuracy.....	295
8.	Gravity Gradiometry.....	298
8.1	Fundamentals.....	298
8.1.1	Importance of the Gravity Gradient Tensor.....	298
8.1.2	Normal Gravity Field Gradients and Disturbing Gradients.....	299
8.1.3	Principle of Gravity Gradiometers.....	300
8.2	Stationary Gravity Gradiometry.....	303
8.2.1	Torsion Balance.....	303
8.2.2	Gravimeter Gradiometry.....	306
8.3	Gravity Gradiometry on Moving Platforms.....	307
8.3.1	Fundamentals.....	307
8.3.2	Surface and Airborne Gradiometry.....	310
8.3.3	Satellite Gradiometry.....	312
9.	Gravimetric Surveys.....	314
9.1	Gravity Reference Systems.....	314
9.1.1	International Gravity Standardization Net 1971 (I.G.S.N.71).....	314
9.1.2	Gravimetric Ties to the I.G.S.N.71.....	316
9.1.3	Global Absolute Gravity Network.....	317
9.2	Gravity Networks.....	318
9.2.1	Objectives, Station Selection.....	318
9.2.2	Survey Procedure.....	320
9.2.3	Reading Reductions and Corrections.....	322
9.2.4	Computations.....	324

9.2.5	Network Quality and Optimization	330
9.2.6	National Gravity Networks	334
9.3	Regional and Local Gravimetric Surveys	337
9.3.1	Objectives, Station Distribution	337
9.3.2	Survey Procedure and Computation	339
9.3.3	Determination of Horizontal Position and Elevation	340
9.3.4	Density Determination	343
9.3.5	Marine and Airborne Gravimetric Surveys	349
9.3.6	Examples of Regional and Local Gravimetric Surveys	354
9.4	Archival of Results	359
9.4.1	Station Descriptions	359
9.4.2	Gravity Data Bases	361
9.4.3	Gravimetric Products	363
10.	Determination of Temporal Gravity Changes	365
10.1	Measurement Instruments and Observation Methods	366
10.1.1	Precision Gravity Networks	366
10.1.2	Recording Gravimeter Systems: Fundamentals	368
10.1.3	Calibration of Recording Gravimeters	371
10.1.4	Recording Spring Gravimeters	375
10.1.5	Superconducting Gravimeter	378
10.2	Gravitational Effects of Non-Tectonic Origin	382
10.2.1	Atmospheric Effects	382
10.2.2	Hydrological Effects	384
10.2.3	Man-Made Gravity Changes	386
10.3	Measurement of Gravimetric Earth Tides	388
10.3.1	Objectives	388
10.3.2	Evaluation, Results, Accuracy	390
10.3.3	Utilization of Results	396
10.4	Gravity Changes by Terrestrial Mass Displacements of Geodynamic Origin	400
10.4.1	Global Gravity Changes	400
10.4.2	Regional Gravity Changes	401
10.4.3	Local Gravity Changes	406
