Java™ Network Programming

Second Edition

Elliotte Rusty Harold

O'REILLY®

Beijing • Cambridge • Farnham • Köln • Paris • Sebastopol • Taipei • Tokyo

Table of Contents

Preface ..... *xiii*

1. ***Why Networked Java?*** *1*
   - What Can a Network Program Do? *2*
   - But Wait!—There's More! *19*

2. ***Basic Network Concepts*** *20*
   - Networks *20*
   - The Layers of a Network *22*
   - IP, TCP, and UDP *28*
   - The Internet *32*
   - The Client/Server Model *37*
   - Internet Standards *39*

3. ***Basic Web Concepts*** *49*
   - URIs *50*
   - HTML, SGML, and XML *56*
   - HTTP *58*
   - MIME *63*
   - CGI *68*
   - Applets and Security *71*

4. *Java I/O* 75
Output Streams 76
Input Streams 80
Filter Streams 84
Readers and Writers 101

5. *Threads* 117
Running Threads 119
Returning Information from a Thread 124
Synchronization 136
Deadlock 144
Thread Scheduling 145
Thread Pools 159

6. *Looking Up Internet Addresses* 165
DNS, IP Addresses, and All That 165
The InetAddress Class 167
Some Useful Programs 181

7. *Retrieving Data with URLs* 193
The URL Class 193
The URLEncoder and URLDecoder Classes 218
Communicating with CGIs and Servlets Through GET 223
Accessing Password-Protected Sites 228

8. *HTML in Swing* 236
HTML on Components 236
JEditorPane 238
Parsing HTML 247

9. *The Network Methods of java.applet.Applet* 267
Using java.applet.Applet to Download Data 267
The ImageObserver Interface 276
The MediaTracker Class 281
Network Methods of java.applet.AppletContext 297

10. *Sockets for Clients* 301
Socket Basics 302
Investigating Protocols with Telnet 302
The Socket Class 304
Socket Exceptions 329
Examples 330

11. *Sockets for Servers* 350
The ServerSocket Class 351
Some Useful Servers 364

12. *Secure Sockets* 388
Secure Communications 389
Creating Secure Client Sockets 393
Methods of the SSLSocket Class 397
Creating Secure Server Sockets 403
Methods of the SSLServerSocket Class 408

13. *UDP Datagrams and Sockets* 411
The UDP Protocol 411
The DatagramPacket Class 413
The DatagramSocket Class 423
Some Useful Applications 435

14. *Multicast Sockets* 450
What Is a Multicast Socket? 451
Working with Multicast Sockets 461
Two Simple Examples 466

15. *The URLConnection Class* 472
Opening URLConnections 473
Reading Data from a Server 475
Reading the Header 476
Configuring the Connection 485
Configuring the Client Request MIME Header 495
Writing Data to a Server 497

Content Handlers 503
The Object Methods 505
Security Considerations for URLConnections 505
Guessing MIME Types 506
HttpURLConnection 509
JarURLConnection 525

16. *Protocol Handlers* 529
What Is a Protocol Handler? 530
The URLStreamHandler Class 534
Writing a Protocol Handler 542
More Protocol Handler Examples and Techniques 546
The URLStreamHandlerFactory Interface 556

17. *Content Handlers* 560
What Is a Content Handler? 562
The ContentHandler Class 565
The ContentHandlerFactory Interface 578
A Content Handler for an Image Format: image/x-fits 581

18. *Remote Method Invocation* 594
What Is Remote Method Invocation? 594
Implementation 600
Loading Classes at Runtime 609
The java.rmi Package 617
The java.rmi.registry Package 626
The java.rmi.server Package 628

19. *The JavaMail API* 634
What Is the JavaMail API? 635
Sending Email 637
Receiving Mail 648
Password Authentication 654
Addresses 658
The URLName Class 663
The Message Class 666

The Part Interface 678
Multipart Messages and File Attachments 690
MIME Messages 695
Folders 697

Index 711
