LIST OF CONTRIBUTORS	xv

Chapter 1 Use of Atomic Displacement Parameters in Thermoelectric Materials Research 1

Brian C. Sales, David G. Mandrus, and Bryan C. Chakoumakos

I. INTRODUCTION	1
II. ELEMENTARY THEORY OF ATOMIC DISPLACEMENT PARAMETERS	4
III. INTERPRETING ADP DATA	6
1. <i>Einstein Model</i>	7
2. <i>Debye Model</i>	8
3. <i>Static Disorder</i>	11
4. <i>Einstein and Debye Temperatures from Room Temperature ADP Data</i>	13
IV. CLATHRATELIKE THERMOELECTRIC COMPOUNDS	14
V. ESTIMATION OF THE LATTICE THERMAL CONDUCTIVITY FROM ADP DATA	18
1. <i>Elementary Theory of Lattice Heat Conduction</i>	18
2. <i>Lattice Heat Conduction: A More Realistic Model</i>	21
VI. EXAMPLES	26
1. <i>Filled Skutterudites: LaFe₄Sb₁₂ and YbFe₄Sb₁₂</i>	26
2. <i>Tl₂SnTe₅</i>	28
3. <i>LaB₆</i>	28
4. <i>Semiconducting Clathrates: Sr₈Ga₁₆Ge₃₀ and Ba₈Ga₁₆Ge₃₀</i>	30
5. <i>CeRuGe₃</i>	32
VII. SUMMARY	33
REFERENCES	34

Chapter 2 Electronic and Thermoelectric Properties of Half-Heusler Alloys 37

S. Joseph Poon

I. INTRODUCTION	37
1. <i>The Crystal Structure</i>	37
2. <i>Electronic Crystals</i>	39
3. <i>Thermoelectric Properties</i>	40

4. <i>Other New Intermetallic Phases</i>	41
5. <i>Goals of This Chapter</i>	41
II. EXPERIMENTAL PROCEDURES	42
III. UNDOPED COMPOUNDS WITH VALENCE ELECTRON COUNT NEAR 18	43
1. <i>Semiconducting and Semimetallic Properties</i>	43
2. <i>Bandgap States in the VEC = 18 Alloys</i>	51
3. <i>Carrier Mobilities</i>	53
4. <i>Magnetic Properties and Band-Structure Results</i>	54
5. <i>Thermoelectric Properties</i>	57
IV. DOPED ALLOYS	59
1. <i>Transport Properties</i>	60
2. <i>Bandgap Features Inferred from Doping Studies</i>	63
3. <i>Impurity Band Transport Properties</i>	64
4. <i>Thermoelectric Properties</i>	66
V. SUMMARY	71
REFERENCES	72

Chapter 3 Overview of the Thermoelectric Properties of Quasicrystalline Materials and Their Potential for Thermoelectric Applications 77

Terry M. Tritt, A. L. Pope, and J. W. Kolis

I. QUASICRYSTALS: BACKGROUND AND INTRODUCTION	77
II. QUASICRYSTALS: STRUCTURAL AND MECHANICAL PROPERTIES	80
III. SYNTHETIC METHODS FOR THE GROWTH OF QUASICRYSTALS	82
1. <i>Scope and Introduction</i>	82
2. <i>General Considerations</i>	83
3. <i>Analysis</i>	85
4. <i>Synthesis of Stable Phases</i>	86
5. <i>Grain Growth</i>	87
IV. INTRODUCTION TO THERMOELECTRIC MATERIALS	90
V. QUASICRYSTALS AS THERMOELECTRICS?	91
VI. THERMOELECTRIC PROPERTIES OF QUASICRYSTALS	94
1. <i>Various Quasicrystalline Families</i>	94
2. <i>Electrical Resistivity</i>	95
3. <i>Thermopower</i>	97
4. <i>Thermal Conductivity</i>	99
5. <i>Thermal and Electrical Transport in AlPdMn for Thermoelectrics</i>	101
VII. FUTURE DIRECTIONS AND APPROACH	109
VIII. SUMMARY	110
REFERENCES	111

Chapter 4 Military Applications of Enhanced Thermoelectrics . . . 117

Alexander C. Ehrlich and Stuart A. Wolf

I. INTRODUCTION	117
II. THERMAL MANAGEMENT	118
1. <i>Biological</i>	118
2. <i>Electronic</i>	119
3. <i>Other</i>	121

III. POWER GENERATION	122
IV. CONCLUSION	124

Chapter 5 Theoretical and Computational Approaches for Identifying and Optimizing Novel Thermoelectric Materials. 125

David J. Singh

I. INTRODUCTION	125
II. SOME FUNDAMENTAL CONSIDERATIONS	127
1. <i>The Thermoelectric Figure of Merit</i>	127
2. <i>Lattice Thermal Conductivity</i>	127
III. FIRST PRINCIPLES METHODOLOGY	128
1. <i>Density Functional Calculations</i>	128
2. <i>Kinetic Transport Theory</i>	131
IV. SKUTTERUDITES	134
1. <i>Binary Skutterudites</i>	134
2. <i>Ce-Filled Skutterudites</i>	142
3. <i>La-Filled Skutterudites</i>	146
4. <i>Lattice Dynamics and Effects of Filling</i>	156
5. <i>Prospects</i>	162
V. CHEVREL PHASES	162
VI. β -Zn ₄ Sb ₃	166
VII. HALF-HEUSLER COMPOUNDS	170
VIII. CONCLUDING REMARKS	172
REFERENCES	173

Chapter 6 Thermoelectric Properties of the Transition Metal Pentatellurides: Potential Low-Temperature Thermoelectric Materials 179

Terry M. Tritt and R. T. Littleton, IV

I. PENTATELLURIDES: BACKGROUND AND INTRODUCTION	180
1. <i>Overview of Interest in Low-Dimensional Conductors in the 1980s</i>	180
2. <i>Anomalous Electrical Transport in HfTe₅ and ZrTe₅</i>	181
3. <i>Synthesis and Structure</i>	183
4. <i>Effects of Stress and Pressure</i>	184
5. <i>Magnetotransport and Hall Effect</i>	186
II. INTRODUCTION TO THERMOELECTRIC MATERIALS	188
1. <i>General Description</i>	188
2. <i>Low-Temperature Refrigeration Applications</i>	189
III. PENTATELLURIDES AS POSSIBLE LOW-TEMPERATURE THERMOELECTRIC MATERIALS	190
IV. RECENT DEVELOPMENTS IN PROPERTIES OF PENTATELLURIDES	191
1. <i>Doping on the Transition Metal Site ($M_xA_yTe_5$, $M = Hf, Zr$, $A = Zr, Ti$)</i>	191
2. <i>Doping on the Chalcogen Site ($MTe_{5-x}Ch_x$, $M = Hf, Zr$, $A = Se, Sb$)</i>	195
3. <i>Magnetotransport: Overview of Recent Results</i>	197
4. <i>Thermal Conductivity of Pentatellurides</i>	200
5. <i>Summary of Thermoelectric Properties</i>	201
V. DISCUSSION AND CONCLUSIONS	201

VI. SUMMARY	203
REFERENCES	204
Chapter 7 Thermomagnetic Effects and Measurements	207
<i>Franz Freibert, Timothy W. Darling, Albert Migliori, and Stuart A. Trugman</i>	
I. INTRODUCTION	207
II. THERMOMAGNETIC EFFECTS	209
1. <i>Adiabatic and Isothermal Conditions</i>	209
2. <i>Definition of Transport Coefficients</i>	210
3. <i>Electronic Refrigeration</i>	214
4. <i>Ideal Behavior</i>	217
III. PHENOMENOLOGICAL ANALYSIS	218
1. <i>Equations of Performance</i>	218
2. <i>Microscopic Electronic Properties</i>	219
3. <i>Umkehr Effect</i>	222
IV. MATERIALS SURVEY	223
1. <i>Basic Material Requirements</i>	223
2. <i>Compensated Materials</i>	225
3. <i>Bismuth and Bismuth–Antimony Alloys</i>	226
4. <i>Doped Materials</i>	229
V. EXPERIMENTAL MEASUREMENT TECHNIQUES	230
1. <i>Experimental Fundamentals</i>	230
2. <i>Isothermal Measurements</i>	233
3. <i>Adiabatic Measurements</i>	238
VI. SUMMARY	241
REFERENCES	241
Chapter 8 Heat and Electricity Transport through Interfaces.	245
<i>M. Bartkowiak and G. D. Mahan</i>	
I. INTRODUCTION	245
II. BOUNDARY IMPEDANCES	247
III. WIEDEMANN–FRANZ LAW AT BOUNDARIES	251
IV. ENERGY BALANCE EQUATIONS FOR ELECTRONS AND PHONONS OUT OF EQUILIBRIUM	253
V. THERMAL INSTABILITY	256
VI. EFFECTIVE THERMOELECTRIC PROPERTIES	258
1. <i>Effective Thermal Conductivity</i>	258
2. <i>Effective Seebeck Coefficient</i>	261
3. <i>Effective Figure of Merit</i>	262
VII. SUPERLATTICES	266
VIII. SUMMARY	269
REFERENCES	270
INDEX	273
CONTENTS OF VOLUMES IN THIS SERIES	279
