PREFACE .....	xi
<b>1. HISTORICAL INTRODUCTION.....</b>	<b>1</b>
<b>2. VISION, PHOTOMETRY, AND COLORIMETRY.....</b>	<b>7</b>
2.1. HUMAN VISION.....	7
2.2. PHOTOMETRY .....	9
2.3. COLORIMETRY .....	11
2.4. COLOR RENDERING.....	15
<b>3. BULBS AND TUBES .....</b>	<b>21</b>
3.1. INCANDESCENT FILAMENT LAMPS .....	21
3.2. TUNGSTEN HALOGEN LAMPS.....	23
3.3. FLUORESCENT LAMPS.....	24
3.4. LOW-PRESSURE SODIUM LAMPS .....	29
3.5. HIGH-PRESSURE DISCHARGE LAMPS .....	30
3.5.1. Mercury Lamps .....	30
3.5.2. High-Pressure Sodium Discharge Lamps.....	32

3.5.3. Metal Halide Lamps.....	32
3.6. ELECTRODELESS DISCHARGE LAMPS.....	33
3.7. LIGHTING ECONOMY .....	34
<b>4. BASICS OF ALL-SOLID-STATE LAMPS .....</b>	<b>37</b>
4.1. INJECTION LUMINESCENCE .....	37
4.1.1. LED Performance .....	38
4.1.2. Recombination of Electrons and Holes.....	39
4.1.3. Injection in a $p$ - $n$ Junction LED .....	46
4.1.4. Heterostructures and Quantum Wells .....	48
4.2. SEMICONDUCTOR MATERIALS SYSTEMS FOR HIGH-BRIGHTNESS LEDs .....	55
4.2.1. Requirements .....	55
4.2.2. AlGaAs Materials System.....	57
4.2.3. AlGaInP Materials System.....	59
4.2.4. AlInGaN Materials System.....	61
4.2.5. Heterostructure Growth Techniques .....	66
4.3. ELECTROLUMINESCENCE IN HIGH-BRIGHTNESS LEDs .....	70
4.3.1. Electroluminescent Structures.....	70
4.3.2. Contacts and Current Spreading.....	75
4.3.3. Emissive and Electrical Characteristics .....	79
<b>5. LIGHT EXTRACTION FROM LEDs.....</b>	<b>83</b>
5.1. BASICS OF LIGHT EXTRACTION.....	84
5.1.1. Escape Cones .....	84
5.1.2. Distributed Bragg Reflectors.....	87
5.1.3. Absorption Losses and Photon Recycling.....	89
5.2. PHOTONICS OF PLANAR RECTANGULAR HIGH-BRIGHTNESS LEDs .....	90
5.2.1. AlGaAs Red LEDs.....	90
5.2.2. AlGaInP LEDs.....	92
5.2.3. AlInGaN LEDs .....	95

- 5.3. PHOTON OUTCOUPLING IN NONRECTANGULAR AND  
NONPLANAR GEOMETRIES..... 99
  - 5.3.1. Shaped Chips..... 100
  - 5.3.2. External Outcouplers..... 102
  - 5.3.3. Nonresonant Cavity LEDs ..... 104
- 5.4. PHOTON DENSITY-OF-STATES ENGINEERING..... 105
  - 5.4.1. Resonant Cavity LEDs..... 106
  - 5.4.2. Surface Plasmon–Enhanced LEDs ..... 110
  - 5.4.3. Photonic Crystals ..... 112
- 6. WHITE SOLID-STATE LAMPS ..... 117**
  - 6.1. OPTIMIZATION OF ARTIFICIAL WHITE LIGHT ..... 118
    - 6.1.1. Trade-off between Luminous Efficacy and Color Rendering..... 118
    - 6.1.2. Dichromatic Systems..... 119
    - 6.1.3. Polychromatic Systems ..... 121
  - 6.2. PHOSPHOR CONVERSION LEDs..... 122
    - 6.2.1. Dichromatic Phosphor Conversion LEDs ..... 122
    - 6.2.2. Polychromatic Phosphor Conversion LEDs..... 126
  - 6.3. MULTICHIP LEDs ..... 128
    - 6.3.1. Dichromatic Multichip LEDs..... 129
    - 6.3.2. Polychromatic Multichip LEDs..... 130
- 7. APPLICATIONS OF SOLID-STATE LAMPS ..... 133**
  - 7.1. LED DRIVING CIRCUITS..... 134
    - 7.1.1. LED Strings..... 134
    - 7.1.2. Battery-Powered LEDs ..... 137
    - 7.1.3. High-Power Pulsed Drive..... 137
  - 7.2. POWER SIGNALS ..... 138
    - 7.2.1. Traffic Lights ..... 139
    - 7.2.2. Automotive Signage..... 141
    - 7.2.3. Miscellaneous Signage..... 143
  - 7.3. DISPLAYS ..... 144

7.3.1. Alphanumeric Displays .....	144
7.3.2. Full-Color Video Displays.....	145
7.4. MEDICAL APPLICATIONS .....	148
7.4.1. Phototherapy of Neonatal Jaundice .....	148
7.4.2. Photodynamic Therapy.....	149
7.4.3. Photopolymerization of Dental Composites.....	150
7.4.4. Phototherapy of Seasonal Affective Disorder.....	151
7.5. PHOTOSYNTHESIS.....	152
7.5.1. Plant Growing.....	153
7.5.2. Photobioreactors.....	155
7.6. OPTICAL MEASUREMENTS .....	156
7.6.1. Fluorescence Sensors.....	156
7.6.2. Time- and Frequency-Domain Spectroscopy .....	159
7.6.3. Other Optical Applications.....	161
7.7. ILLUMINATION .....	162
7.7.1. Local Illumination .....	163
7.7.2. General Lighting.....	165
7.7.3. The Future of Solid-State Lighting.....	167
