SUMMARY	3
PROJECT TEAMS	4
<b>1. RESEARCH AIMS AND METHODOLOGY</b>	<b>5</b>
1.1. Background	5
1.2. Research aims	8
1.3. Research method	11
1.3.1. Methodological decisions: the generation as the key starting point	11
1.3.2. A comparative and multidisciplinary approach	12
1.3.3. Conduct of the work	14
1.4. Research hypotheses	14
1.4.1. The nature and origin of the good exchanged in the labour market	15
1.4.2. Skills as the basis for exchange in the labour market	15
1.4.3. Skills as a vector of individual characteristics	16
1.4.4. Skills and job eligibility threshold	17
1.4.5. Skills jointly produced by the systems where they are acquired	18
1.4.6. Qualifications as a factor of skills production	18
<b>2. PROCESS AND RESULTS OF THE RESEARCH</b>	<b>20</b>
2.1. Production of qualifications and growth in skills: A comparison of changes in European education systems	20
2.1.1. Comparing national processes leading to educational expansion	21
2.1.2. Factors influencing the expansion process and the rise in levels of education	39
2.2. Impact of educational expansion on jobs, remuneration and social position of more highly qualified generations: A comparative analysis	48
2.2.1. The analytical framework	48
2.2.2. The "supply-side effect": A brief outline of the work of the "Qualifications and Labour Markets" network	51
2.2.3. Remuneration for more education	59
2.2.4. Access to management positions by generation	68
2.2.5. Initial conclusions concerning the macro effects of educational expansion	73
2.3. Educational expansion, production demand and employers' behaviour	75
2.3.1. Aims and method	76
2.3.2. Educational expansion and employers' behaviour	80
2.3.3. The banking sector: Case study and international comparison	87
2.3.4. Demand for skills and output of persons with qualifications	95
2.3.5. Chapter conclusions	108
<b>3. OUTLOOK FOR THE RELATIONSHIP BETWEEN EDUCATION AND EMPLOYMENT</b>	<b>112</b>
3.1. Stabilisation or a continuing rise in levels of education?	112
3.1.1. Study of the data: towards stabilisation of the rate of entry to higher education	113
3.1.2. Elements of uncertainty: Education policies and young people's behaviour	117

3.2.	Demand for skills	126
3.2.1.	Towards an increased need for skills...	127
3.2.2.	...which is more difficult to meet by recruiting young graduates	128
3.2.3.	Tensions and skills output	130
3.3.	Towards an increased role for continuing education?	133
<b>4.</b>	<b>CONCLUSIONS AND POLICY RECOMMENDATIONS</b>	<b>137</b>
4.1.	40 years of educational expansion in the five project countries	138
4.2.	Convergence and divergence between education systems	141
4.3.	Irreversibility of educational expansion	143
4.3.1.	Educational strategies	145
4.3.2.	The symbolic role of education and qualifications	146
4.3.3.	Qualifications as a signal in the labour market	147
4.3.4.	Education and qualifications as an investment	148
4.4.	From consensus on initial education to consensus on skills?	149
4.4.1.	Outlook for the behaviour of the different players	150
4.4.2.	Towards a greater role for continuing education in the production of skills	153
4.5.	The identity of education systems and production of skills for the economy	154
4.5.1.	Demand follows supply: Results of a macro-statistical approach based on skills	156
4.5.2.	The timescale of skills production	157
4.5.3.	The needs of employers and the needs of the economy	159
4.5.4.	Strengthening the identities of education systems in response to the needs of the economy	161
<b>5.</b>	<b>BIBLIOGRAPHY</b>	<b>163</b>
5.1.	Research reports produced within the EDEX framework	163
5.1.1.	National reports	163
5.1.2.	International reports	165
5.2.	General Bibliography	166
<b>6.</b>	<b>ANNEXES</b>	
1.1.	Grid used to compare national qualifications nomenclatures	172
1.2.	Qualifications structure of generations studied	173
1.3.	Demography of European project countries	176
1.4.	Graphs of the German, Spanish and French education systems	177
2.1.	Four models	181
2.2.	Two ways of reading the supply model	182
2.3.	Cumulative table of international results for the supply-side effect	184
2.4.	Data and variables used by the countries for salary analysis	185
2.5a.	Table of results of earnings function model for education as a whole (DIP)	186
2.5b.	Table of results of earnings function model for education broken down (DF and RDP)	186
2.6.	Additional work done on the supply-side effect	187
3.1.	France: Evolution of educational expansion	189
3.2.	Spain: Qualifications structure of generations, population aged 16-65 years. LFS 2000	190
3.3.	Germany: Rate of upper secondary completion	190
3.4.	Italy: Completion of upper secondary (Maturità) and university entrance	191
3.5.	United Kingdom (England): Participation in full-time and part-time post-compulsory education and training, 1979-1999	191
