

3.4	Measure of Manipulability	119
	Summary	122
	References	122
4	Local Optimization of Kinematic Redundancy	125
4.1	Introduction	125
4.2	Tasks with the Order of Priority	127
4.3	Inverse Kinematics Considering the Order of Priority	128
4.4	Numerical Simulations	132
4.5	Experiments	140
	Summary	148
	References	150
5	Global Optimization of Kinematic Redundancy	153
5.1	Introduction	153
5.2	Optimal Control Problem of Redundancy	154
5.3	Application of Pontryagin's Maximum Principle	155
5.4	Boundary Conditions	156
5.5	An Example of Performance Index	159
5.6	Consideration of Dynamics	160
5.7	Numerical Examples	162
	Summary	169
	References	170
6	Redundancy in Multirobot Coordination	173
6.1	Introduction	173
6.2	Coordinative Manipulation by Multiple Robotic Mechanisms	176
6.3	Coordinative Manipulability	182
6.4	Computation of Minimum Forces	184
6.5	Contact Stability and Optimal Forces	191
6.6	Examples of Minimum Force Computation	199
	Summary	200
	References	201
7	Actuation Redundancy of Closed-Link Mechanisms	205
7.1	Introduction	205
7.2	Inverse Dynamics of Closed-Link Robots	207
7.3	Redundant Actuation Systems	213
7.4	Examples	217
	Summary	224
	References	225
