Preface	xix
List of Contributors	xxi
Introduction	xxvii
1 Message-Oriented Middleware	1
<i>Edward Curry</i>	
1.1 Introduction	1
1.1.1 <i>Interaction Models</i>	1
1.1.2 <i>Synchronous Communication</i>	2
1.1.3 <i>Asynchronous Communication</i>	2
1.1.4 <i>Introduction to the Remote Procedure Call (RPC)</i>	2
1.1.5 <i>Introduction to Message-Oriented Middleware (MOM)</i>	4
1.1.6 <i>When to use MOM or RPC</i>	6
1.2 Message Queues	7
1.3 Messaging Models	8
1.3.1 <i>Point-to-Point</i>	8
1.3.2 <i>Publish/Subscribe</i>	9
1.3.3 <i>Comparison of Messaging Models</i>	11
1.4 Common MOM Services	12
1.4.1 <i>Message Filtering</i>	12
1.4.2 <i>Transactions</i>	12
1.4.3 <i>Guaranteed Message Delivery</i>	15
1.4.4 <i>Message Formats</i>	15
1.4.5 <i>Load Balancing</i>	15
1.4.6 <i>Clustering</i>	16
1.5 Java Message Service	16
1.5.1 <i>Programming using the JMS API</i>	17
1.6 Service-Oriented Architectures	22
1.6.1 <i>XML</i>	22
1.6.2 <i>Web Services</i>	23

1.6.3	<i>MOM</i>	23
1.6.4	<i>Developing Service-Oriented Architectures</i>	24
1.7	Summary	26
	Bibliography	26
2	Adaptive and Reflective Middleware	29
	<i>Edward Curry</i>	
2.1	Introduction	29
2.1.1	<i>Adaptive Middleware</i>	30
2.1.2	<i>Reflective Middleware</i>	30
2.1.3	<i>Are Adaptive and Reflective Techniques the Same?</i>	32
2.1.4	<i>Triggers of Adaptive and Reflective Behavior</i>	33
2.2	Implementation Techniques	33
2.2.1	<i>Meta-Level Programming</i>	33
2.2.2	<i>Software Components and Frameworks</i>	34
2.2.3	<i>Generative Programming</i>	35
2.3	Overview of Current Research	35
2.3.1	<i>Reflective and Adaptive Middleware Workshops</i>	35
2.3.2	<i>Nonfunctional Properties</i>	36
2.3.3	<i>Distribution Mechanism</i>	37
2.4	Future Research Directions	42
2.4.1	<i>Advances in Programming Techniques</i>	42
2.4.2	<i>Open Research Issues</i>	44
2.4.3	<i>Autonomic Computing</i>	47
2.5	Summary	48
	Bibliography	49
3	Transaction Middleware	53
	<i>Stefan Tai, Thomas Mikalsen, Isabelle Rouvellou</i>	
3.1	Introduction	53
3.2	Transaction Processing Fundamentals	54
3.2.1	<i>ACID Transactions</i>	55
3.2.2	<i>Distributed Transactions</i>	57
3.2.3	<i>Common Extensions</i>	58
3.2.4	<i>Programming Models for Transactions</i>	60
3.3	Distributed Object Transactions	61
3.3.1	<i>Transaction Model</i>	61
3.3.2	<i>Transaction APIs</i>	63
3.3.3	<i>Container-Managed Transactions</i>	63
3.4	Messaging Transactions	65
3.4.1	<i>Messaging Models</i>	65
3.4.2	<i>Programming Models</i>	66
3.4.3	<i>Queued Transaction Processing</i>	67
3.5	Web Transactions	68
3.5.1	<i>Web Services Coordination and Transactions</i>	69
3.5.2	<i>Programming model</i>	69

3.5.3	<i>Web Services Messaging</i>	70
3.6	Advanced Transactions	70
3.6.1	<i>Long Running Unit of Work (LRUOW)</i>	71
3.6.2	<i>Conditional Messaging and D-Spheres</i>	72
3.6.3	<i>Transactional Attitudes (TxA)</i>	74
3.7	Conclusion	77
	Bibliography	78
4	Peer-to-Peer Middleware	81
	<i>Markus Oliver Junginger</i>	
4.1	Introduction	81
4.1.1	<i>Peer-to-Peer and Grids</i>	82
4.1.2	<i>Lack of Peer-to-Peer Middleware</i>	82
4.1.3	<i>Group Communication</i>	83
4.1.4	<i>Challenges</i>	83
4.1.5	<i>Chapter Outline</i>	83
4.2	JXTA	84
4.2.1	<i>Overview</i>	84
4.2.2	<i>Resources and Advertisements</i>	84
4.2.3	<i>Peer Groups</i>	85
4.2.4	<i>Services and Modules</i>	85
4.2.5	<i>Protocols</i>	86
4.2.6	<i>Messages and Pipes</i>	86
4.2.7	<i>Security</i>	87
4.2.8	<i>Relay and Rendezvous Peers</i>	87
4.2.9	<i>Group Communication</i>	88
4.2.10	<i>Applications using JXTA</i>	89
4.2.11	<i>Challenges</i>	89
4.2.12	<i>Summary</i>	90
4.3	P2P Messaging System	90
4.3.1	<i>Self-Organizing Overlay Networks</i>	90
4.3.2	<i>Failure Tolerance</i>	92
4.3.3	<i>Implicit Dynamic Routing</i>	93
4.3.4	<i>Quality-of-Service</i>	94
4.3.5	<i>System Model</i>	95
4.3.6	<i>Network Abstraction Layer</i>	96
4.3.7	<i>Implementation</i>	96
4.3.8	<i>Challenges and Comparison with JXTA</i>	96
4.3.9	<i>Summary</i>	97
4.4	Hybrid Middleware – a Conceptual Proposal	97
4.4.1	<i>Service Providers</i>	99
4.4.2	<i>Conceptual Model and Services</i>	99
4.4.3	<i>Service Connectors</i>	100
4.4.4	<i>Peer Group Membership Service</i>	101
4.4.5	<i>Synchronization Service and P2P Synchronization</i>	102
4.4.6	<i>Summary</i>	104
4.5	Conclusion	105
	Bibliography	105

5	Grid Middleware	109
	<i>Gregor von Laszewski and Kaizar Amin</i>	
5.1	The Grid	110
5.2	Grid Architecture	112
5.3	Grid Middleware Software	114
5.4	Grid Middleware Challenges	115
5.5	Grid Middleware Standardization	115
5.6	Grid Middleware Services	115
	5.6.1 <i>Elementary Grid Middleware Services</i>	116
	5.6.2 <i>Advanced Grid Management Services</i>	117
5.7	Grid Middleware Toolkits	118
	5.7.1 <i>Globus Toolkit</i>	118
	5.7.2 <i>Commodity Grid Kits</i>	120
	5.7.3 <i>Open Grid Services Architecture</i>	120
5.8	Portal Middleware for Grids	123
5.9	Applications Using and Enhancing Grid Middleware	125
	5.9.1 <i>Astrophysics</i>	125
	5.9.2 <i>Earthquake Engineering</i>	126
	5.9.3 <i>High-energy Physics Grids</i>	126
5.10	Concluding Remarks	127
	Acknowledgments	127
	Bibliography	128
6	QoS-enabled Middleware	131
	<i>Nanbor Wang, Christopher D. Gill, Douglas C. Schmidt, Aniruddha Gokhale, Balachandran Natarajan, Joseph P. Loyall Richard E. Schantz, and Craig Rodrigues</i>	
6.1	Introduction	131
	6.1.1 <i>Emerging Trends</i>	131
	6.1.2 <i>Key Technical Challenges and Solution Approaches</i>	132
	6.1.3 <i>Chapter Organization</i>	135
6.2	The Evolution of Middleware	135
	6.2.1 <i>Overview of Middleware</i>	135
	6.2.2 <i>Limitations of Conventional Middleware</i>	137
6.3	Component Middleware: A Powerful Approach to Building DRE Applications	138
	6.3.1 <i>Overview of Component Middleware and the CORBA Component Model</i>	138
	6.3.2 <i>Limitations with Conventional Component Middleware for Large- scale DRE Systems</i>	142
6.4	QoS Provisioning and Enforcement with CIAO and QuO Qoskets	144
	6.4.1 <i>Static QoS Provisioning via QoS-enabled Component Middleware and CIAO</i>	145
	6.4.2 <i>Dynamic QoS Provisioning via QuO Adaptive Middleware and Qoskets</i>	150
	6.4.3 <i>Integrated QoS provisioning via CIAO and Qoskets</i>	154

6.5	Related Work	156
6.6	Concluding Remarks	158
	Bibliography	159
7	Model Driven Middleware	163
	<i>Aniruddha Gokhale, Douglas C. Schmidt, Balachandran Natarajan, Jeff Gray, Nanbor Wang</i>	
7.1	Introduction	163
7.2	Overview of the OMG Model Driven Architecture (MDA)	169
	7.2.1 <i>Capabilities of the MDA</i>	169
	7.2.2 <i>Benefits of the MDA</i>	172
7.3	Overview of Model Driven Middleware	172
	7.3.1 <i>Limitations of Using Modeling and Middleware in Isolation</i>	173
	7.3.2 <i>Combining Model Driven Architecture and QoS-enabled Component Middleware</i>	173
7.4	Model Driven Middleware Case Study: Integrating MDA with QoS-enabled Middleware	178
7.5	Related Work	181
7.6	Concluding Remarks	183
	Bibliography	184
8	High-Performance Middleware-Based Systems	189
	<i>Shikharesh Majumdar</i>	
8.1	Introduction	189
8.2	Performance of CORBA Middleware	191
8.3	Impact of Client-Server Interaction Architectures	192
	8.3.1 <i>Three Interaction Architectures</i>	192
	8.3.2 <i>Performance Comparison</i>	194
8.4	Middleware Performance Optimization	197
	8.4.1 <i>Systems with Limited Heterogeneity</i>	198
	8.4.2 <i>Flyover</i>	198
	8.4.3 <i>Performance of Flyover</i>	201
8.5	Application Level Performance Optimizations	204
	8.5.1 <i>Connection Setup Latency</i>	204
	8.5.2 <i>Parameter Passing</i>	205
	8.5.3 <i>Combination of Methods and Performance Recovery</i>	206
	8.5.4 <i>Method Placement and Object Packing</i>	207
	8.5.5 <i>Load Balancing</i>	207
8.6	Summary and Conclusions	208
8.7	Acknowledgments	208
	Bibliography	208
9	Concepts and Capabilities of Middleware Security	211
	<i>Steven Demurjian, Keith Bessette, Thuong Doan, Charles Phillips</i>	
9.1	Introduction	211

9.2	Security in CORBA, .NET, and J2EE	212
9.2.1	<i>CORBA Security Capabilities</i>	213
9.2.2	<i>.NET Security Capabilities</i>	217
9.2.3	<i>J2EE Security Capabilities</i>	223
9.3	RBAC and MAC using CORBA and JINI	227
9.3.1	<i>Overview of the RBAC/MAC Security Model</i>	228
9.3.2	<i>The Security Services of USR</i>	229
9.3.3	<i>Prototyping/Administrative and Management Tools</i>	231
9.4	Conclusion	232
	Bibliography	234
10	Middleware for Scalable Data Dissemination	237
	<i>Panos K. Chrysanthis, Vincenzo Liberatore, Kirk Pruhs</i>	
10.1	Introduction	237
10.2	Architecture Overview	238
10.3	Background and Historical Notes	242
10.3.1	<i>Multicast Data Dissemination</i>	242
10.3.2	<i>Multicast</i>	242
10.4	Middleware Components	243
10.4.1	<i>Transport Adaptation Layer</i>	243
10.4.2	<i>Document Selection</i>	244
10.4.3	<i>Multicast Push Scheduling</i>	245
10.4.4	<i>Multicast Pull Scheduling</i>	247
10.4.5	<i>Multicast Indexing</i>	249
10.4.6	<i>Data Consistency and Currency</i>	250
10.4.7	<i>Client Cache</i>	251
10.5	Building Block Integration	252
10.5.1	<i>Integration</i>	252
10.5.2	<i>Scheduling for Layered Multicast</i>	253
10.6	Application: Real-Time Outbreak and Disease Surveillance	253
10.7	Conclusions	254
	Bibliography	255
11	Principles of Mobile Computing Middleware	261
	<i>Cecilia Mascolo, Licia Capra, Wolfgang Emmerich</i>	
11.1	Introduction	261
11.2	Mobile Distributed Systems	262
11.2.1	<i>Characterization of Distributed Systems</i>	263
11.2.2	<i>Traditional Distributed Systems</i>	264
11.2.3	<i>Mobile Nomadic Systems</i>	264
11.2.4	<i>Mobile Ad Hoc Systems</i>	265
11.3	Middleware Systems: A Reference Model	266
11.3.1	<i>Middleware for Fixed Distributed Systems</i>	267
11.3.2	<i>Middleware for Mobile Nomadic and Ad hoc Systems</i>	268

11.4	Fault Tolerance	269
	<i>11.4.1 Connectivity</i>	269
	<i>11.4.2 Data-sharing</i>	271
11.5	Heterogeneity	272
11.6	Openness	273
11.7	Scalability	274
	<i>11.7.1 Discovery</i>	274
	<i>11.7.2 Quality of Service</i>	275
11.8	Resource-sharing	276
	<i>11.8.1 Transactions</i>	276
	<i>11.8.2 Security</i>	277
11.9	Conclusions	278
	Bibliography	278
12	Application of Middleware Technologies to Mobile Enterprise Information Services	281
	<i>Guijun Wang, Alice Chen, Surya Sripada, Changzhou Wang</i>	
12.1	Introduction	281
12.2	Wireless Technologies	283
12.3	Middleware Technologies for Enterprise Application Integrations	286
12.4	An Integrated Architecture for Mobile Enterprise Information Services	289
	<i>12.4.1 Enterprise Requirements</i>	289
	<i>12.4.2 Design Considerations and Our Approach</i>	289
	<i>12.4.3 An Integrated Mobile EIS Architecture</i>	290
	<i>12.4.4 Deployment and Operation</i>	291
12.5	J2EE-Based Middleware in Mobile EIS	292
	<i>12.5.1 J2EE Middleware Platform</i>	292
	<i>12.5.2 JMS</i>	292
	<i>12.5.3 JMS in Our Mobile EIS</i>	295
12.6	Data Representation and Presentation in Mobile Enterprise Information Services	296
12.7	Challenges and Future Directions	299
12.8	Summary and Conclusions	301
12.9	Acknowledgment	302
	Bibliography	302
13	Middleware for Location-based Services: Design and Implementation Issues	305
	<i>Peter Langendörfer, Oliver Maye, Zoya Dyka, Roland Sorge, Rita Winkler, Rolp Kraemer</i>	
13.1	Introduction	305
13.2	Related Work	306
13.3	Architecture	307
	<i>13.3.1 Infrastructure</i>	307

13.3.2	<i>Platform Components</i>	311
13.4	Concepts of Selected Components	314
13.4.1	<i>Event Engine and Auras and Objects Engine</i>	314
13.4.2	<i>Profile Servers and Profile Database</i>	319
13.5	Measurements	321
13.5.1	<i>Testbed Settings</i>	321
13.5.2	<i>Results</i>	322
13.5.3	<i>Conclusions</i>	324
13.6	Realization of PLASMA	325
13.6.1	<i>Design Decisions and Lessons Learned</i>	325
13.6.2	<i>Implementation Notes</i>	326
13.7	Conclusions	327
	Bibliography	327
14	QoS-Enabled Middleware for MPEG Video Streaming	331
	<i>Karl R.P.H. Leung, Joseph Kee-Yin Ng, Calvin Kin-Cheung Hui</i>	
14.1	Introduction	331
14.2	Related Works	333
14.2.1	<i>Overview of MPEG</i>	333
14.2.2	<i>Quality of Services</i>	334
14.2.3	<i>Video Distribution</i>	335
14.3	Requirements for QoS-enabled MPEG-Streaming Middleware	336
14.3.1	<i>Environment Analysis</i>	336
14.3.2	<i>Requirements for the Middleware</i>	337
14.4	QoS Facilities	337
14.4.1	<i>QoS-GFS</i>	337
14.4.2	<i>Transmission Scheme</i>	338
14.4.3	<i>QoS Tuning Scheme</i>	341
14.5	Architecture	341
14.5.1	<i>Clientware</i>	341
14.5.2	<i>Serverware</i>	345
14.6	Experiments	347
14.6.1	<i>System Setup</i>	347
14.6.2	<i>Experiment Results</i>	348
14.6.3	<i>QoS in QoS-Index</i>	353
14.6.4	<i>QoS-Frame and QoS-Byte</i>	353
14.7	Discussions	353
14.8	Acknowledgment	354
14.9	Conclusion & Future Works	355
	Bibliography	355
15	Middleware for Smart Cards	359
	<i>Harald Vogt, Michael Rohs, Roger Kilian-Kehr</i>	
15.1	Introduction	359
15.2	ISO 7816	360
15.2.1	<i>Communication between Card and Card Reader</i>	360

15.3	Data Structures on Smart Cards	361
15.3.1	<i>Command Sets</i>	362
15.4	JavaCards	362
15.4.1	<i>Hardware Architecture</i>	363
15.4.2	<i>Runtime Environment</i>	363
15.4.3	<i>Developing JavaCard Applets</i>	365
15.5	PC/SC: Data Communications	369
15.6	OpenCard Framework	371
15.6.1	<i>Architectural Concepts</i>	371
15.6.2	<i>Configuration</i>	373
15.6.3	<i>Programming Model</i>	373
15.6.4	<i>Summary</i>	374
15.7	JavaCard RMI	375
15.7.1	<i>On-Card JCRMI</i>	375
15.7.2	<i>Off-Card JCRMI</i>	378
15.7.3	<i>Summary</i>	382
15.8	PKCS #11 Security Tokens	382
15.9	Smart Cards as Distributed Objects	383
15.10	Smart Card Middleware for Mobile Environments	383
15.10.1	<i>SIM Application Toolkit</i>	383
15.10.2	<i>J2ME Smart Card Middleware</i>	385
15.11	JiniCard	386
15.12	Smart Cards on the Internet	387
15.12.1	<i>A Browser Interface for Smart Cards</i>	387
15.12.2	<i>Smart Cards as Mobile Web Servers</i>	387
15.12.3	<i>Internet Smart Cards</i>	388
15.13	Conclusion	389
	Bibliography	389
16	Application-Oriented Middleware for E-Commerce	393
	<i>Jesús Martínez, Luis R. López, Pedro Merino</i>	
16.1	Introduction	393
16.2	Previous Work on Networked Smart Card Applications	394
16.3	A Public Transport Ticketing System for e-Commerce	396
16.3.1	<i>The System Architecture</i>	396
16.3.2	<i>The Electronic Ticket</i>	399
16.3.3	<i>Choosing a Smart Card for the System</i>	400
