# CONTENTS

Contributors	xv
Preface	xxiii
Dedication	xxv

## PART I Forward and Reverse Genetics

### 1. Retroviral-Mediated Insertional Mutagenesis in Zebrafish

*Adam Amsterdam and Nancy Hopkins*

I. Introduction	3
II. Mutagenesis	5
III. Cloning the Mutated Genes	8
IV. Future Directions	14
References	18

### 2. Genetic Screens for Maternal-Effect Mutations

*Francisco Pelegri and Mary C. Mullins*

I. Introduction	22
II. Strategies for Maternal-Effect Screens	23
III. Selection of Lines for Genetic Screens	33
IV. Recovery and Maintenance of Maternal-Effect Mutations	37
V. Mapping Maternal-Effect Mutations	41
VI. Solutions, Materials, and Protocols	44
VII. Conclusions	48
References	49

### 3. Behavioral Screening Assays in Zebrafish

*Michael B. Orger, Ethan Gahtan, Akira Muto, Patrick Page-McCaw, Matthew C. Smear, and Herwig Baier*

I. Introduction	53
II. General Considerations	54

III. Behavioral Assays	56
IV. Conclusions	66
References	66
4. Target-Selected Gene Inactivation in Zebrafish	
<i>Erno Wienholds and Ronald H. A. Plasterk</i>	
I. Introduction	70
II. Gene Targeting Strategies	71
III. Target-Selected Mutagenesis in Zebrafish	75
IV. Discussion	83
V. Materials and Methods	85
References	87
5. A High-Throughput Method for Identifying <i>N</i> -Ethyl- <i>N</i> -Nitrosourea (ENU)-Induced Point Mutations in Zebrafish	
<i>Bruce W. Draper, Claire M. McCallum, Jennifer L. Stout, Ann J. Slade, and Cecilia B. Moens</i>	
I. Introduction	92
II. Rationale for Reverse Genetics in Zebrafish	95
III. Rationale for Using the CEL1 Assay to Detect Induced Mutations	96
IV. Rationale for Generating a Cryopreserved Mutant Library	98
V. Method of <i>N</i> -Ethyl- <i>N</i> -Nitrosourea (ENU) Mutagenesis and Rearing of F <sub>1</sub> Founder Fish	98
VI. Generating a Cryopreserved Mutant Library	99
VII. Isolating Genomic DNA	102
VIII. Choosing Fragments to Screen	104
IX. CEL1 Endonuclease Assay	104
X. Recovery of Mutations from Cryopreserved Sperm	109
XI. Materials Cost Estimate	110
References	111
6. Production of Zebrafish Germline Chimeras by Using Cultured Embryonic Stem (ES) Cells	
<i>Lianchun Fan, Jennifer Crodian, and Paul Collodi</i>	
I. Introduction	113
II. Methods	114
III. Reagents	117
IV. Future Directions	118
References	118

V. Internet Web Sites Relevant to Medaka Resources and Databases	193
References	194
11. Transgenesis and Gene Trap Methods in Zebrafish by Using the <i>Tol2</i> Transposable Element	
<i>Koichi Kawakami</i>	
I. Introduction	201
II. Transgenesis by Using the <i>Tol2</i> Transposable Element in Zebrafish	203
III. A Gene Trap Approach that Uses the <i>Tol2</i> Transposon System in Zebrafish	210
IV. Summary and Perspectives	219
References	220

## PART II The Zebrafish Genome and Mapping Technologies

12. The Zebrafish Genome Project: Sequence Analysis and Annotation	
<i>Kerstin Jekosch</i>	
I. Introduction	225
II. Automated Annotation of Whole Genome Shotgun (WGS) Assemblies	227
III. Clone-by-Clone Analysis and Annotation	230
IV. The Sanger Zebrafish Web Services	234
V. Future Releases	238
References	238
13. Molecular Cytogenetic Methodologies and a Bacterial Artificial Chromosome (BAC) Probe Panel Resource for Genomic Analyses in Zebrafish	
<i>Charles Lee and Amanda Smith</i>	
I. Introduction	241
II. Methods	242
III. First-Generation Zebrafish BAC Probe Panel	248
References	254
14. Automated Analysis of Conserved Syntenies for the Zebrafish Genome	
<i>John Postlethwait, Victor Ruotti, Michael J. Carvan, and Peter J. Tonellato</i>	
I. Introduction	256
II. The Conservation of Zebrafish and Mammalian Genomes	256
III. Using Genome Conservation in Zebrafish Research	258

193	IV. Genomic Connections Between Zebrafish and Tetrapods Facilitate Disease Research	260
194	V. Bioinformatic Approaches to Automating Zebrafish Connections and Comparative Maps	264
	VI. A Conserved Syntenic Map for Zebrafish: Preliminary Results	266
	VII. Conclusion	267
	References	268
201		
203		
210	15. Update of the Expressed Sequence Tag (EST) and Radiation Hybrid Panel Projects	
219	<i>Yi Zhou</i>	
220	I. Expressed Sequence Tag (EST) Projects	274
	II. Radiation Hybrid (RH) Panel Project	277
	III. Future Directions	291
	References	292
225	16. Bacterial Artificial Chromosome (BAC) Clones and the Current Clone Map of the Zebrafish Genome	
227	<i>Romke Koch, Gerd-Jörg Rauch, Sean Humphray, Robert Geisler, and Ronald Plasterk</i>	
230	I. Introduction	296
234	II. Physical Map of Fingerprinted Clones	296
238	III. Screening Methods and Utilization of the Current Zebrafish Clone Map	300
238	IV. Example: Discovery of the Zebrafish <i>dicer1</i> Gene	302
	References	304
	17. The Zon Laboratory Guide to Positional Cloning in Zebrafish	
	<i>Nathan Bahary, Alan Davidson, David Ransom, Jennifer Shepard, Howard Stern, Nikolaus Trede, Yi Zhou, Bruce Barut, and Leonard I. Zon</i>	
241	I. Introduction	306
242	II. Mapping Strains	306
248	III. Families and Genetic Markers	307
254	IV. Crosses for Line Maintenance and Mapping	307
	V. Preparation of the DNA	309
	VI. Mapping Genes	310
	VII. Overgo Strategy for Rapidly Doing Chromosomal Walks and Positional Cloning	317
	VIII. Protocol for Overgo Probing of High-Density Filters	318
256	IX. General Flow of Information from the Radiation Hybrid Panel Maps, the Sanger Institute Sequencing Project, and Fingerprinting the BACs	321
256	X. Synteny Between Human, Zebrafish, and <i>Fugu</i> Genomes	325
258		

XI. Proving a Candidate Gene Is Responsible for the Mutant Phenotype	326
XII. Morpholinos	327
References	328

### PART III Transgenesis

18. Lessons from Transgenic Zebrafish Expressing the Green Fluorescent Protein (GFP) in the Myeloid Lineage	
<i>Karl Hsu, A. Thomas Look, and John P. Kanki</i>	
I. Introduction	334
II. Myeloid Cells in Zebrafish	334
III. Expression of <i>pu.1</i> in Myeloid Development	335
IV. Analysis of the Zebrafish <i>pu.1</i> Locus	336
V. Germline Expression of Enhanced Green Fluorescent Protein (EGFP) Under Control of the Zebrafish <i>pu.1</i> Promoter	338
VI. Conclusions	345
References	346
19. <i>Sleeping Beauty</i> Transposon for Efficient Gene Delivery	
<i>Spencer Hermanson, Ann E. Davidson, Sridhar Sivasubbu, Darius Balciunas, and Stephen C. Ekker</i>	
I. Introduction	349
II. Transgenesis Constructs	350
III. Microinjection of the Zebrafish Embryo	351
IV. Raising Injected Embryos	355
V. Identifying Transgenic Founders	356
VI. Visualizing Fluorescent Reporters	357
VII. Molecular Characterization of the Transposon Integration Site	358
References	361
20. Transgene Manipulation in Zebrafish by Using Recombinases	
<i>Jie Dong and Gary W. Stuart</i>	
I. Introduction	363
II. Recombinase-Mediated Transgene Exchange and Mobilization	367
III. Summary and Conclusion	375
References	376

326  
327  
328  
  
  
  
334  
334  
335  
336  
  
338  
345  
346

21. Highly Efficient Zebrafish Transgenesis Mediated by the Meganuclease I-SceI  
*Clemens Grabher, Jean-Stephane Joly, and Joachim Wittbrodt*
- I. Introduction 381  
II. Transgenesis by Meganucleases 386  
References 398
22. Cloning Zebrafish by Nuclear Transfer  
*Bensheng Ju, Haigen Huang, Ki-Young Lee, and Shuo Lin*
- I. Introduction 403  
II. Recipes for Cell Culture and Nuclear Transfer 404  
III. Cell Culture 404  
IV. Nuclear Transfer 405  
V. Summary of Nuclear Transfer 408  
VI. Potential Applications of Zebrafish Cloning 409  
References 410

#### PART IV Informatics and Comparative Genomics

349  
350  
351  
355  
356  
357  
358  
361  
  
  
363  
367  
375  
376

23. Data Mining the Zebrafish Genome  
*Lynn M. Schriml and Judy Sprague*
- I. Introduction 415  
II. National Center for Biotechnology Information (NCBI) Tools, Resources, and Data Sets 416  
III. Zebrafish Information Network (ZFIN) 428  
IV. Tutorial 433  
References 437
24. The Zebrafish DVD Exchange Project: A Bioinformatics Initiative  
*Mark S. Cooper, Greg Sommers-Herivel, Cara T. Poage, Matthew B. McCarthy, Bryan D. Crawford, and Carey Phillips*
- I. Introduction 440  
II. Economic Aspects of Visual Bioinformatics 440  
III. Building Infrastructures to Access Images 442  
IV. Prior Experiences with Visual Data Dissemination (Mark Cooper) 443  
V. Goals of the Zebrafish DVD Exchange Project 445  
VI. Production of the Compact Disc (CD) Set: "Zebrafish: The Living Laboratory" (Greg Sommers-Herivel) 447  
VII. Visual Bioinformatics and Databases 451

VIII. Internet2	452
IX. Hyper Text Markup Language (HTML) and eXtensible Markup Language XML (Bryan Crawford)	453
X. Virtual Reality and Data Visualization Tools (Carey Phillips)	454
XI. Summary	456
References	457
25. Comparative Genomics—An Application for Positional Cloning of the <i>weissherbst</i> Mutant	
<i>Anhua Song and Yi Zhou</i>	
I. Introduction	459
II. Resources for Comparative Genomics Studies	460
III. An Example of Using Comparative Genomic Resources in a Positional Cloning Project	461
References	473
26. Comparative Genomics in Erythropoietic Gene Discovery: Synergisms Between the Antarctic Icefishes and the Zebrafish	
<i>H. William Detrich, III and Donald A. Yergeau</i>	
I. Introduction	476
II. Representational Difference Analysis (RDA) Protocol	477
III. Analysis of Unidentified RDA Contigs	485
IV. Isolation of Full-Length cDNAs Corresponding to RDA Products	493
V. Model Hopping: Functional Analysis of the Zebrafish Ortholog of the Novel Antarctic Fish Gene <i>bloodthirsty</i>	498
VI. General Considerations	500
References	501
27. Spatial and Temporal Expression of the Zebrafish Genome by Large-Scale <i>In Situ</i> Hybridization Screening	
<i>Bernard Thisse, Vincent Heyer, Aline Lux, Violaine Alunni, Agnès Degrave, Iban Seiliez, Johanne Kirchner, Jean-Paul Parkhill, and Christine Thisse</i>	
I. Introduction and Goals	506
II. Preparation of Antisense Digoxigenin (DIG)-Labeled RNA Probes	506
III. Preparation of Embryos	508
IV. Reagents and Buffers for <i>In Situ</i> Hybridization	509
V. <i>In Situ</i> Hybridization Protocol	510
VI. Double <i>In Situ</i> Protocol	514

452	VII. Recording Results	517
453	VIII. Concluding Remarks	517
454	References	519
456		
457		
	<b>28. Design, Normalization, and Analysis of Spotted Microarray Data</b>	
	<i>F. B. Pichler, M. A. Black, L. C. Williams, and D. R. Love</i>	
	I. Introduction	522
	II. Design of Microarray Experiments	522
	III. Array Preprocessing	530
	IV. Analysis of Microarray Experiments	535
459	V. Discussion	540
460	References	542
461		
473		
	<b>29. Comparative Genomics, <i>cis</i>-Regulatory Elements, and Gene Duplication</b>	
	<i>Allan Force, Cooduvalli Shashikant, Peter Stadler, and Chris T. Amemiya</i>	
	I. Introduction	545
	II. Comparative Genomics and Identification of <i>cis</i> -Regulatory Elements (CREs)	546
476	III. Duplicated Genomes, Duplicated Genes	552
477	References	556
485		
493		
498		
500		
501		
	<b>PART V Infrastructure</b>	
	<b>30. Zebrafish Facilities for Small and Large Laboratories</b>	
	<i>Bill Trevarrow</i>	
	I. Introduction	566
	II. Zebrafish Biology	568
	III. Fish Housing	569
	IV. Quarantining	586
	V. Injections	587
	VI. Mutagenesis Room	587
	VII. Treating Outflow	588
506	VIII. Disposing of the Dead	588
506	IX. Disease Prevention	589
508	X. Cleaning	590
509	XI. Human Safety	590
510	References	591
514		

31. A Nursery that Improves Zebrafish Fry Survival	
<i>Peter Cattin and Phil Crosier</i>	
I. Introduction	593
II. General Methods for Raising Embryos and Larvae	594
III. A Nursery that Improves Fry Survival	594
References	598
32. Genetic Backgrounds, Standard Lines, and Husbandry of Zebrafish	
<i>Bill Trevarrow and Barrie Robison</i>	
I. Introduction	599
II. Nomenclature and Definitions	602
III. Goals for Line Use	603
IV. Breeding Strategies	604
V. Cryopreservation	612
VI. Monitoring and Response	613
VII. Distribution	614
VIII. Summary and Recommendations	614
References	615
33. Common Diseases of Laboratory Zebrafish	
<i>Jennifer L. Matthews</i>	
I. Introduction	617
II. Diagnostic Evaluation	618
III. Common Diseases of Laboratory Zebrafish	618
IV. Zoonosis	640
References	641
34. Zebrafish Sperm Cryopreservation	
<i>Stéphane Berghmans, John P. Morris IV, John P. Kanki, and A. Thomas Look</i>	
I. Introduction: Benefits of Zebrafish Sperm Cryopreservation	645
II. Critical Variables Affecting Sperm Cryopreservation	646
III. Zebrafish Sperm Cryopreservation with <i>N,N</i> -Dimethylacetamide	650
IV. Future Directions	656
References	658
Index	661
Volumes in Series	679
