

# **ELECTRONIC STRUCTURE OF METAL-SEMICONDUCTOR CONTACTS**

edited by

**Winfried Mönch**  
Universität Duisburg

KLUWER ACADEMIC PUBLISHERS

**Jaca Book**

## Table of Contents

W. Mönch, Electronic Structure of Metal-Semiconductor Contacts

Introduction	1
1. Preliminary Remarks	1
2. Conceptual Models	4
2.1 Schottky-Mott Rule	5
2.2 Interface States	7
2.3 Continuum of Metal-Induced Gap States	9
2.4 MIGS-plus-Defects Model	11
2.5 Charge Transfer at Interface	12
3. Computational Results	13
4. Experimental Data	15
4.1 Chemical Trend of the Slope Parameters	16
4.2 Correlations with Chemical Reactivity	17
4.3 Effective Work Function Model	17
4.4 MIGS-plus-Defect Model	18
4.5 Direct Observation of the Continuum of MIG States	22
5. Surface-Science Approach to Schottky <u>C</u> ontacts	23
5.1 Growth Modes of Nonreactive Metals on Semiconductors	24
5.2 Surface Band-Bending as a Function of Metal Coverage	25
5.3 Unified Defect Model	27
6. Concluding Remarks	28
