# Introduction to Optics

With 440 Figures

 Springer

---

# Contents

Preface .....	vii
<b>1 Orders of Magnitude in Optics .....</b>	<b>1</b>
1.1 Main Applications of Electromagnetic Waves .....	1
1.2 Wave-Particle Duality .....	5
1.3 What Is a Wave? .....	6
1.4 Electric Dipole Radiation .....	13
1.5 Light Detectors .....	21
1.6 Interference, Diffraction .....	33
1.7 Photometry .....	41
1.8 Perception and Reproduction of Colors .....	52
<b>2 Electromagnetic Waves .....</b>	<b>57</b>
2.1 Mathematical Formulation of Electromagnetism .....	57
2.2 The Different Kinds of Waves .....	61
2.3 Solutions of Maxwell's Equations for Harmonic Planar Waves .....	65
2.4 Structure of an Electromagnetic Planar Wave .....	70
2.5 General Harmonic Waves .....	73
2.6 Spherical Waves .....	77
<b>3 Geometrical Optics .....</b>	<b>91</b>
3.1 Geometrical Propagation of Light .....	91
3.2 Fermat's Principle .....	94
3.3 Formation of Images .....	102
3.4 Thin Lenses .....	105
3.5 Centered Systems Under Gauss Conditions .....	112
<b>Annex 3.A Thin Lenses .....</b>	<b>126</b>
3.A.1 Lens Considered as a Prism Having a Variable Angle ....	126
3.A.2 Lens Considered as a Phase Correcting Device .....	127
3.A.3 Matrices for the Association of Thin Lenses .....	127

<b>Annex 3.B Optical Prisms</b> .....	<b>131</b>
3.B.1 Definition and Description of Optical Prisms .....	131
3.B.2 Light Propagation Inside a Prism .....	131
3.B.3 Reflecting Prisms .....	134
<b>Annex 3.C Gradient Index Devices—Light Optics and Electron Optics</b> .....	<b>136</b>
3.C.1 The Eikonal Equation .....	137
3.C.2 Differential Equation of Light Rays .....	138
3.C.3 Centered Optical System with a Nonconstant Index of Refraction .....	142
3.C.4 Optics of Charged Particle Beams .....	146
<b>4 Polarized Light—Laws of Reflection</b> .....	<b>149</b>
4.1 Light Vibration Is a Vector .....	149
4.2 Analyzers—Polarizers .....	152
4.3 Reflection—Refraction .....	155
<b>Annex 4.A TE Modes—TM Modes</b> .....	<b>174</b>
4.A.1 Scalar Nature of Two-Dimensional Electromagnetic Problems .....	174
<b>Annex 4.B Determination of an Unknown Polarization</b> ..	<b>176</b>
<b>5 Birefringence</b> .....	<b>179</b>
5.1 Double Refraction .....	179
5.2 Permittivity Tensor .....	180
5.3 Planar Waves Obeying Maxwell's Equations in an Anisotropic Material .....	183
5.4 Constructions of the Refracted Beams .....	188
5.5 Aspect of the Surfaces of the Indices and the Inverse of the Indices .....	193
5.6 Circular Birefringence .....	198
5.7 Induced Birefringence .....	203
<b>Annex 5.A Ray Tracing in Uniaxial Media</b> .....	<b>225</b>
5.A.1 Construction of the Refracted Beam on an Isotropic/Uniaxial Interface .....	225
5.A.2 Refraction of a Monochromatic Beam by a Birefringent Prism .....	227
5.A.3 Separation of Extraordinary Rays from Ordinary Rays by a Birefringent Plate .....	229
5.A.4 Realization of Polarizers .....	230
5.A.5 Birefringence and Dispersion .....	232

<b>Annex 5.B</b>	<b>Characteristic Surfaces in Anisotropic Media</b>	<b>233</b>
5.B.1	Fresnel Formulas in Anisotropic Media	233
5.B.2	Surface of the Normals (or Surface of the Indices)	234
5.B.3	Wave Surface (or Surface of the Inverse of the Indices)	235
5.B.4	Index Ellipsoid	237
<b>Annex 5.C</b>	<b>Interference Using Polarized Light Beams. Wave Plates</b>	<b>240</b>
5.C.1	Orthogonally Polarized Beams Are Unable to Interfere	240
5.C.2	Interference Using Polarized Monochromatic Light Beams	241
5.C.3	Wave Plates	242
5.C.4	Interference with Polarized White Beams	247
<b>Annex 5.D</b>	<b>Liquid Crystals</b>	<b>250</b>
5.D.1	Introduction	250
5.D.2	Physical-Chemistry of Liquid Crystals	250
5.D.3	Orientation of Molecules in a Nematic Phase	252
5.D.4	Liquid Crystal Display	254
5.D.5	Light Valve	257
<b>6</b>	<b>Interference</b>	<b>259</b>
6.1	Wave Front Division Interferometers	259
6.2	Amplitude Splitting Interferometers	265
6.3	Dual-Beam Interference	274
6.4	The Fabry-Perot Interferometer	278
6.5	Interference Using Stacks of Thin Transparent Layers	289
<b>7</b>	<b>Diffraction</b>	<b>299</b>
7.1	The Huygens-Fresnel Postulate	299
7.2	Fraunhofer Diffraction	308
7.3	Fresnel Diffraction	318
7.4	Diffraction Gratings	322
7.5	Holography	333
7.6	Diffraction and Image Processing	342
<b>8</b>	<b>Index of Refraction</b>	<b>351</b>
8.1	Physical Mechanisms Involved with Propagation in a Transparent Material	352
8.2	Determination of the Index of Refraction	353
8.3	The Index of Refraction Is a Complex Number	359
8.4	Index of Refraction and Populations of the Energy Levels of a Transition	364

<b>Annex 8.A Electric Dipolar Radiation</b> .....	<b>366</b>
8.A.1 Definition of an Oscillating Dipole .....	366
8.A.2 Electric and Magnetic Fields Created by a Dipole .....	366
8.A.3 Power Radiated by an Oscillating Dipole .....	369
8.A.4 Field Radiated by a Planar Distribution of Oscillating Dipoles .....	373
<b>Annex 8.B The Kramers-Krönig Formula</b> .....	<b>375</b>
8.B.1 Demonstration of the Kramers-Krönig Formula .....	375
8.B.2 Normal Dispersion .....	377
<b>9 Lasers</b> .....	<b>379</b>
9.1 Laser, a Feedback Oscillator .....	379
9.2 Optical Amplification .....	389
9.3 How to Obtain an Inversion of Population .....	412
9.4 The Fabry-Perot Resonator .....	417
9.5 Spectral Characteristics of Light Emitted by a Laser ....	426
9.6 Laser Transient Effects .....	432
9.7 Originality of Laser Light .....	439
<b>Annex 9.A Light-Semiconductor Interaction</b> .....	<b>441</b>
9.A.1 Energy Levels in a Semiconductor .....	441
9.A.2 Spontaneous and Stimulated Effects in a Semiconductor .....	443
9.A.3 The Bernard-Duraffourg Formula, Inversion of Population .....	444
<b>Annex 9.B Spectral Width of a Laser Oscillation</b> .....	<b>447</b>
<b>10 Nonlinear Optics</b> .....	<b>449</b>
10.1 Microscopic Interpretation of a Nonlinear Optical Interaction .....	451
10.2 Phase Matching Condition .....	452
10.3 Nonlinear Polarization .....	456
10.4 Equations of Propagation in a Nonlinear Material .....	460
10.5 Third-Order Nonlinear Phenomena .....	470
<b>11 Raman-Brillouin-Rayleigh Diffusion</b> .....	<b>479</b>
11.1 Raman, Brillouin, Rayleigh, and Mie Scattering .....	479
11.2 Experimental Introduction to the Raman Effect .....	481
11.3 Theoretical Analysis of the Raman Effect .....	487
11.4 Brillouin Diffusion .....	500
<b>Annex 11.A Diffusion of Light by a Scattered Medium</b> ...	<b>512</b>
<b>12 Guided Optics</b> .....	<b>517</b>
12.1 Introduction .....	518
12.2 Propagation in a Step Index Planar Guide .....	522
12.3 Optical Fibers .....	536

<b>Annex 12.A Splitters and Couplers</b> .....	<b>543</b>
12.A.1 The Y-Junction .....	543
12.A.2 Distributed Couplers .....	544
12.A.3 Coupled Mode Theory .....	546
<b>Annex 12.B Attenuation of Silica Fibers</b> .....	<b>553</b>
<b>Annex 12.C Elaboration of Optical Guides</b> .....	<b>555</b>
12.C.1 Optical Fibers .....	555
12.C.2 Integrated Optics .....	560
<b>13 Fourier Analysis and Fourier Transform</b> .....	<b>567</b>
13.1 Fourier Series .....	567
13.2 Fourier Integrals and Fourier Transform .....	568
13.3 Some Important Properties of the Fourier Transform ...	569
13.4 Two-Dimensional Fourier Transform .....	571
13.5 Some Famous Fourier Transforms .....	571
13.6 Wave Packet .....	575
<b>Index</b> .....	<b>579</b>
