# Table of contents

<b>1</b>	<b>General characteristics of ions</b>	7
1.1	Monatomic ions	7
1.2	Multiatomic and complex ions	22
1.3	The concept of the stoichiometric mixture of ions	28
<b>2</b>	<b>Methods for the thermodynamic description of ions</b>	29
2.1	The choice of standard and reference states for the thermodynamic functions	29
2.2	Thermodynamic characteristics of ions	48
2.3	Physical meaning of the thermodynamic characteristics of ions in solutions.	92
<b>3</b>	<b>Thermodynamic characteristics of processes of solvation of ions</b>	97
3.1	Solvation of ions	98
3.2	Changes of thermodynamic characteristics during solvation	117
3.3	Entropy characteristics of the influence of the medium on the state of a solute in solutions	131
<b>4</b>	<b>Thermodynamics of structural changes in the solvent during solvation of ions</b>	140
4.1	Properties and structural peculiarities of liquid solvents and solutions	141
4.2	Thermodynamic characteristics of structural peculiarities of solvents.	167
4.3	Entropy characteristics of solvent structural changes during solvation of ions.	172
<b>5</b>	<b>Thermodynamics of dissolution of ionic crystals</b>	195
5.1	The change of Gibbs free energy and its constituents on dissolution of ionic crystals.	195
5.2	Temperature coefficients of $\Delta H_{\text{soln}}^{\circ}$ and structural constituents of the thermodynamic characteristics of dissolution of ionic crystals	223
5.3	Thermodynamic characteristics of dissolution of salts in concentrated solutions	238

<b>6 Thermodynamic characteristics of reactions in solution</b> . . . . .	250
6.1 Ionic reaction equilibria . . . . .	251
6.2 Solvation processes and chemical reactions in solutions . . . . .	262
6.3 The influence of additives . . . . .	264
<b>References</b> . . . . .	269
<b>Index</b> . . . . .	282
