

Optical Propagation in Linear Media

*Atmospheric Gases and Particles,
Solid-State Components, and Water*

Michael E. Thomas

OXFORD
UNIVERSITY PRESS
2006

Contents

PART I: BACKGROUND THEORY AND MEASUREMENT

1 Optical Electromagnetics I, 3

1.1 Introduction, 3

1.1.1 The Electromagnetic Spectrum, 3

1.1.2 Classical and Quantum Concepts, 5

1.2 Macroscopic Properties in Vacuum, 7

1.2.1 Plane-Wave Propagation, 7

1.2.2 Diffraction: Physical Optics, 12

1.3 Optical Propagation in Vacuum, 16

1.3.1 Beam Propagation, 16

1.3.2 Pulse Propagation, 19

Problems, 20

Notes, 21

Bibliography, 23

2 Optical Electromagnetics II, 25

2.1 Macroscopic Properties in Matter, 25

2.1.1 Plane-Wave Propagation and Linear Response Theory, 25

2.1.2 Elastic Scattering: Physical Optics, 55

2.2 Optical Propagation in Matter, 70

2.2.1 *Beam Propagation, 70*

2.2.2 *Pulse Propagation, 71*

2.3 Microscopic Properties in Matter, 71

2.3.1 *The Dipole Moment, 72*

2.3.2 *Polarizability, 73*

Problems, 74

Bibliography, 76

3 Spectroscopy of Matter, 77

3.1 Quantum Mechanics I, 77

3.1.1 *Early Quantum Mechanics and Light, 77*

3.1.2 *Formal Introduction, 79*

3.1.3 *Wave and Matrix Mechanics, 81*

3.1.4 *Single-Particle Propagation, 83*

3.2 Introduction to Spectroscopy, 84

3.2.1 *Line Position, Strength, and Shape, 84*

3.2.2 *Dipole Moments and Selection Rules, 87*

3.3 Spectroscopy of Gases, 89

3.3.1 *Rotational Spectroscopy, 90*

3.3.2 *Vibrational Spectroscopy, 96*

3.3.3 *Electronic Spectroscopy, 111*

3.4 Spectroscopy of Solids, 112

3.4.1 *Lattice Vibrations and Phonons, 113*

3.4.2 *Electronic Structure, 122*

3.5 Spectroscopy of Liquids, 127

3.5.1 *Orientalional Polarizability, 127*

3.5.2 *Vibrational and Electronic Structure, 129*

Problems, 130

Bibliography, 132

4 Electrodynamics I: Macroscopic Interaction
of Light and Matter, 133

4.1 Classical Electrodynamics, 134

4.2 Classical Oscillator Model, 134

4.2.1 *Gases at Low Density, 134*

4.2.2 *Lorentz–Lorenz Formula, 141*

4.2.3 *Solids and the Classical Oscillator Model, 142*

- 4.2.4 *Time-Domain Susceptibility for Lattice Vibrations*, 149
- 4.2.5 *Free Carriers and Debye Relaxation*, 150
- 4.2.6 *Dyadic Permittivity*, 156
- 4.3 Reflection and Refraction at a Plane Boundary, 157
 - 4.3.1 *Cubic Media*, 158
 - 4.3.2 *Biaxial and Uniaxial Media*, 161
- 4.4 Single Scattering, 162
 - 4.4.1 *Rayleigh Scattering*, 162
 - 4.4.2 *Mie Scattering*, 165
 - 4.4.3 *Rayleigh-Gans Scattering*, 170
- Problems, 172
- Bibliography, 174
- 5 Electrodynamics II: Microscopic Interaction of Light and Matter, 175
 - 5.1 Quantum Optics, 175
 - 5.2 Statistical Distribution Functions, 176
 - 5.2.1 *Maxwell-Boltzmann Statistics*, 176
 - 5.2.2 *Fermi-Dirac Statistics*, 180
 - 5.2.3 *Bose-Einstein Statistics*, 180
 - 5.3 Quantum Mechanics II, 182
 - 5.3.1 *Time-Dependent Perturbation Theory*, 182
 - 5.3.2 *Fermi's Golden Rule*, 185
 - 5.3.3 *Density Matrix Formalism*, 187
 - 5.4 Semiclassical Oscillator Model, 189
 - 5.5 The Einstein Relation and Spontaneous Emission, 193
 - 5.6 Quantum Optics of Low-Density Gases, 195
 - 5.6.1 *Formal Development*, 195
 - 5.6.2 *Line Strength*, 200
 - 5.6.3 *Line Shape Profiles*, 201
 - 5.6.4 *Refractivity*, 212
 - 5.7 Quantum Electronics, 213
 - 5.7.1 *Electronic Band-to-Band Transitions*, 213
 - 5.7.2 *Exciton Band Absorption*, 217
 - 5.7.3 *Band Edge Absorption and Urbach's Rule*, 218
 - Problems, 220
 - Bibliography, 222

6 Experimental Techniques, 225

6.1 Refractive Index and Absorption Coefficient Measurements, 225

6.1.1 *Transmission and Reflection Measurements, 226*

6.1.2 *Laser Techniques, 243*

6.1.3 *Ellipsometry, 246*

6.1.4 *Refractometry, 247*

6.1.5 *Broad-Band Interferometry, 248*

6.1.6 *Emissometry, 251*

6.2 Scatter Measurements, 252

6.2.1 *Scatterometers, 252*

6.2.2 *Integrating Spheres, 256*

Problems, 257

Bibliography, 259

PART II: PRACTICAL MODELS FOR VARIOUS MEDIA

7 Optical Propagation in Gases and the Atmosphere of the Earth, 263

7.1 The Atmosphere of the Earth, 263

7.1.1 *Atmospheric Structure, 264*

7.1.2 *Gas Composition, 264*

7.1.3 *Particle Composition, 268*

7.1.4 *Pressure Variation with Altitude, 269*

7.2 Molecular Absorption and Refraction, 271

7.2.1 *Absorption by Atmospheric Gases, 271*

7.2.2 *HITRAN Database, 300*

7.2.3 *Band Models, 304*

7.2.4 *Refractive Effects of the Atmosphere, 311*

7.3 Molecular Scattering, 328

7.3.1 *Molecular Rayleigh Scatter, 328*

7.3.2 *Blue Sky Background, 329*

7.4 Applications and Computer Codes, 330

7.4.1 *Remote Sensing of Gases, 330*

7.4.2 *Synthetic Spectra, 336*

7.4.3 *Human Breath Spectra, 337*

7.4.4 *Computer Codes, 337*

Problems, 342

Note, 344

Bibliography, 344

8 Optical Propagation in Solids, 353

8.1 Solid-State Optics, 353

8.1.1 *Classification of Materials, 353*

8.1.2 *Thermal, Mechanical, and Chemical Properties, 354*

8.2 Absorption and Refraction, 361

8.2.1 *Crystalline Insulators, 361*

8.2.2 *Amorphous Insulators: Glasses, 392*

8.2.3 *Semiconductors, 397*

8.2.4 *Metals, 402*

8.3 Scattering, 404

8.3.1 *Intrinsic, 404*

8.3.2 *Extrinsic, 405*

8.4 Computer Codes and Examples, 407

8.4.1 *OPTIMATR, 409*

8.4.2 *Reflectance and Emittance Calculations of Bulk Materials and Coatings, 409*

8.4.3 *Athermal Materials, 412*

8.4.4 *Optical Fibers, 413*

8.4.5 *Pyrometry, 417*

Problems, 419

Bibliography, 423

9 Optical Propagation in Water, 427

9.1 Optical Properties of Pure Water, 427

9.1.1 *Debye Relaxation, 427*

9.1.2 *Vibrational Modes, 429*

9.1.3 *Electronic Band Edge, 432*

9.1.4 *Scattering, 432*

9.2 Seawater, 434

9.2.1 *Introduction to Optical Oceanography, 434*

9.2.2 *Absorption and Refraction, 436*

9.2.3 *Scattering, 438*

9.3 Applications, 438

9.3.1 *Ocean Reflectance and Emittance, 438*

9.3.2 *Biomedical Media, 439*

Problems, 441

Bibliography, 441

10 Particle Absorption and Scatter, 443

10.1 Particle Distributions and Composition, 443

10.1.1 Particle Size Distribution Function, 443

10.1.2 Particle Vertical Concentration Profile, 444

10.1.3 Particle Composition, 445

10.2 Particle Absorption and Scatter, 446

10.2.1 Extinction Coefficient, 446

10.2.2 Visibility Range, 448

10.2.3 Henyey–Greenstein Phase Function, 448

10.2.4 Humidity and Cross-Section, 449

10.3 Scatter and Atmospheric Optics, 449

10.3.1 Raindrops and Rainbows, 450

10.3.2 Ice Crystal Effects, 451

10.3.3 Clouds and Cloud Color, 451

10.3.4 Fog, 452

10.4 Scatter and Ocean Optics, 453

10.5 Computer Codes and Examples, 454

10.5.1 MODTRAN, 454

10.5.2 Imaging within Scattering Media, 456

Problems, 456

Bibliography, 457

11 Propagation Background and Noise, 459

11.1 Path and Background Emission, 459

11.2 Scattering into the Path, 463

11.3 Photon Noise, 464

11.4 Examples of Path Emission and Scatter, 465

11.4.1 Clear Sky Radiance, 465

11.4.2 Detector Window Radiance, 467

11.4.3 Atmospheric Spectral Radiance, 468

11.4.4 Solar Reflection and Scatter, 471

Problems, 473

Bibliography, 473

Appendix 1: Symbols and Units, 475

Appendix 2: Special Functions, 479

Appendix 3: Hilbert and Fourier Transforms, 483

Appendix 4: Model Parameters for Gases, Liquids, and Solids, 491

Appendix 5: Electromagnetic Field Quantization, 547

Index, 553
