## Contents

Preface	vii
Authors' Biographies	xi
<b>Part I</b>	<b>Introductions</b>
Basic Properties of Metal Surfaces	3
<i>A. L. Vázquez de Parga and R. Miranda</i>	
Basic Properties of Silicon Surfaces	29
<i>M. J. Butcher and M. Y. Simmons</i>	
<b>Part II</b>	<b>Experimental Methods</b>
Scanning Tunneling Microscopy and Scanning Force Microscopy	69
<i>S. Hembacher and F. Giessibl</i>	
Optical Detection of Single Molecules at Interfaces	89
<i>B. Hecht</i>	
<b>Part III</b>	<b>Theoretical Methods</b>
<i>Ab Initio</i> Modeling of Molecular Electronics	121
<i>D. Roubtsov, N. Sergueev and H. Guo</i>	
Perturbation Methods in Scanning Tunneling Microscopy	147
<i>W. A. Hofer</i>	

<b>Part IV</b>	<b>Spectroscopy of Single Molecule(s) on Surfaces</b>	
	Properties of Single Molecules: Manipulation, Dissociation and Synthesis with the Scanning Tunneling Microscope	183
	<i>K.-F. Braun and S.-W. Hla</i>	
	Single-Molecule Vibrational Spectroscopy and Chemistry	209
	<i>J. I. Pascual and N. Lorente</i>	
<b>Part V</b>	<b>Local Modification of Surfaces Induced by Adsorbed Molecules</b>	
	Superlattices of Atoms, Molecules and Islands	247
	<i>H. Brune</i>	
	Mobility of Complex Organic Species at Metal Surfaces	269
	<i>J. V. Barth</i>	
	Molecular Monolayers on Silicon Surfaces	287
	<i>G. P. Lopinski and D. D. M. Wayner</i>	
	Functionalization of Semiconductor Surfaces by Organic Layers: Concerted Cycloaddition versus Stepwise Free-Radical Reaction Mechanisms	333
	<i>A. Bilić, J. R. Reimers and N. S. Hush</i>	
<b>Part VI</b>	<b>Electronic Properties of Single Molecules on Metal Surfaces</b>	
	Molecular Electronics	363
	<i>R. Stadler</i>	
	Exploring the Catalytic Activity of a Noble Metal: The Ag Catalyzed Ethylene Epoxidation Reaction	389
	<i>M.-L. Bocquet and A. Michaelides</i>	
	Index	425
