## CONTENTS

Preface to the series.....	ix
Preface.....	xi
Contents.....	xiii
1. Hopping conduction in the critical regime approaching the metal-insulator transition.....	1
<i>T.G. Castner</i>	
2. Hopping in band tails, far from equilibrium.....	49
<i>D. Monroe</i>	
3. Non-Ohmic microwave hopping conductivity.....	81
<i>Yu.M. Galperin, V.L. Gurevich and D.A. Parshin</i>	
4. Thermal conduction due to hopping processes in amorphous solids ...	125
<i>A. Jagannathan, R. Orbach and O. Entin-Wohlman</i>	
5. The hopping thermopower.....	143
<i>I.P. Zvyagin</i>	
6. Slow processes in disordered solids.....	175
<i>M. Pollak and A. Hunt</i>	
7. Hopping conductivity in the intermediate frequency regime.....	207
<i>A.R. Long</i>	
8. Hopping in mesoscopic samples.....	233
<i>A.B. Fowler, J.J. Wainer and R.A. Webb</i>	
9. Scattering and interference effects in variable range hopping conduction.....	271
<i>B.I. Shklovskii and B.Z. Spivak</i>	
10. Hopping conduction in III-V compounds.....	349
<i>R. Mansfield</i>	
11. Hopping conduction in electrically conducting polymers.....	377
<i>S. Roth</i>	
12. Hopping conduction in heavily doped semiconductors.....	397
<i>A.N. Ionov and I.S. Shlimak</i>
