Volume 1

I BASIC FUNCTIONS OF READING: IDENTIFICATION AND RECOGNITION OF LETTERS

1.1 Language and Reading	2
1.2 Functions of Reading and their Neural Basis	3
1.2.1 Functions of Language comprehension	3
1.2.2 Functions of Reading	4
1.2.3 Attentional and Coordination Processes in Reading	6
1.3 Experimental Research on Letter Identification and Letter Recognition as Basic Functions of Reading	8
1.3.1 Congruence Effects in Letters and Non-letters	8
1.3.2 Experiments	16
1.3.2.1 Experiment 1	16
1.3.2.2 Experiment 2	22
1.3.2.3 Experiment 3	28
1.3.2.4 Experiment 4	31
1.3.2.5 Experiment 5	35
1.3.2.6 Experiment 6	38
1.3.2.7 The Choice of the Perceptual Strategy Depends on Task Demands	41
1.3.2.8 General Discussion of Experiment 1-6	42
1.3.3 Memory and Presentation Time: Congruence Effects in Letter Recognition	46
1.3.3.1 Experiment 7	48
1.3.3.2 Experiment 8	56
1.3.3.3 General Discussion: Letter Recognition as a Specific Function of Reading	60
1.4 Short Summary	62

II EXPERIMENTAL EXPLORATION OF DYSFUNCTIONS IN LEARNING TO READ

2.1 Introduction to the Functional Coordination Deficit Model of Developmental Reading Disability	64
2.1.1 The beginning of a scientific interest in reading disability	64
2.1.1.1 The Educational Concept of Reading Disability	64
2.1.1.2 From Aphasia to Congenital Word-Blindness	65
2.1.1.3 The Neurological Basis of Education	67
2.1.1.4 Strephosymbolia as a Developmental Learning Disability	68
2.1.1.5 Abnormal Hemispheric Dominance in Children with Reading Disability?	70

2.1.1.6	Post Orton	73
2.1.1.7	The Phonological Turnaround	74
2.1.2	Functional Coordination in Reading	76
2.1.2.1	The Reading Process	76
2.1.2.2	Learning to Read: <i>Paris in the the Spring</i>	77
2.1.3	Functional Fragmentation: The Dilemma of Experimental Reading Disability Research	78
2.1.3.1	Fragmentation of the Reading Process	78
2.1.3.2	The Specificity of the Coordination Process in Reading	80
2.1.4	The Symmetry-Generalization Model	83
2.1.4.1	Revival of an Unpopular Dinosaur: Welcome Back to Orton	83
2.1.4.2	Symmetry-Generalization in Object Recognition: Advantage	84
2.1.4.3	Symmetry-Generalization in Reading: Disadvantage	86
2.1.5	Summary and conclusions	88
2.2	Theories of Reading Disability	90
2.2.1	Classification of Reading Disability Models	90
2.2.1.1	Processing Domain	90
2.2.1.2	Mono-/ Multi-causality	92
2.2.1.3	Level of Processing	93
2.2.2	Methodological Inconsistencies in Experimental Reading Disability Research	97
2.2.2.1	Premises of Comparing Experimental Results on Reading Disability	97
2.2.2.2	Sample Creation	97
2.2.2.3	The Discrepancy Criterion and the Definition of Dyslexia	98
2.2.2.4	The Silver Lining of the Demerit: Practical Educational Arguments in Advance of the Discrepancy Definition	101
2.3	Summary	101
2.4	Empirical Evidence for Symmetry Generalization in Disabled Readers: Reviewed and Own Experimental Results on Reversal Errors	104
2.4.1	Introduction	104
2.4.2	Review: The Classical Studies	106
2.4.3	Review: Studies in the Last Decades	108
2.4.4	Review: Related Studies	111
2.4.4.1	The Name Code Deficit Model	111
2.4.4.2	Critique on an Influential Study	113
2.4.5	Review: Evidence for the Symmetry Generalization Model from Own Experiments	114
2.4.5.1	Discrimination of Orientational Related Letters and Patterns	114
2.4.5.1.1	The Task	115
2.4.5.1.2	Main Results and Discussion	116
2.4.5.2	Mental Rotation of Letters in Reading Disability	117
2.4.5.2.1	Mental Rotation	117
2.4.5.2.2	Mental rotation studied in disabled readers	118
2.4.5.2.3	The Task	119
2.4.5.2.4	Results and Discussion	119

2.4.6	General Discussion	123
2.4.6.1	Comparing and Evaluating the Reviewed Studies	123
2.4.6.2	Reinterpretation of the Reviewed Studies: Reducing to a Common Denominator	127
2.5	Experimental Exploration of Component Functions of Reading in Subgroups of Developmental Dyslexics	129
2.5.1	General Introduction	129
2.5.1.1	Functions under Investigation	129
2.5.1.2	General Aspects of the Method: Dyslexia Definition and Sample Creation	129
2.5.2	The Visual Domain:	
	Evidence for a Temporal Processing Deficit in a Subgroup of Dyslexics	131
2.5.2.1	The Temporal Processing Deficit Hypothesis	131
2.5.2.2	The relationship Between Visuo-Perceptual Organization, Temporal Processing and Reading	133
2.5.2.3	The Identification of Subgroups by Testing their Impaired Subfunction	139
2.5.2.4	Method of Experiment 9 and 10	140
2.5.2.5	Results of Experiments 9 and 10	144
2.5.2.5.1	Definition of Subgroups	144
2.5.2.5.2	Experiment 9: Results and Discussion	146
2.5.2.5.3	Experiment 10: Results and Discussion	149
2.5.2.6	General Discussion of Experiments 9 and 10	154
2.5.2.7	Summary and Conclusions	160
2.5.3	Diagnostic Subgroups of Developmental Dyslexia Have Deficits in Different Subfunctions of Reading	162
2.5.3.1	Patterns of Reading Problems: <i>Diagnostic Clusters</i>	162
2.5.3.2	Experiments: General Points of Methodology and Sample Creation of Experiments 11-13	166
2.5.3.2.1	Sample creation	166
2.5.3.2.2	The Ascertainment of Subgroups in Experiments 11 - 13	168
2.5.3.3	The Auditory Domain:	
	Sound Discrimination in Developmental Dyslexia	168
2.5.3.3.1	Phonological versus Auditory Deficit	168
2.5.3.3.2	Electrophysiological Methods: Neural Correlates of Sound Processing and Discrimination	169
2.5.3.3.3	The Mismatch Negativity in Dyslexia	171
2.5.3.3.4	Experiment 11 (Sound Discrimination)	172
2.5.3.3.5	General Discussion	184
2.5.3.3.6	Summary and Conclusions	187
2.5.3.4	Functions of Visual-Auditory Coordination:	
	Experiments 12 and 13 (Syllable and Letter Processing)	189
2.5.3.4.1	General Introduction: Experiments 12 and 13	189
2.5.3.4.2	Experiment 12 (Inter-modal Syllable Discrimination)	190
2.5.3.4.3	Experiment 13 (Letter and Non-Letter Matching)	200

III SUMMARY

3.1 Basic Functions of Reading:	
Negative Congruence Effects in Letter Processing	
Point to Different Perceptual Feature Integration Strategies	
for Letters and Non-Letters	216
3.2 The Functional Coordination Deficit Framework of Reading Disability	
and the Model of Symmetry Generalization	218
3.3 Experimental Exploration of Distinct Deficits in Diagnostic	
Subgroups of Dyslexics	220
3.3.1 Visual Temporal Processing in Subgroups of Dyslexics	220
3.3.2 Visual-Phonological Coordination: Grapheme, Phoneme and	
Syllable Processing in Diagnostic Subgroups of Dyslexics	221
3.3.2.1 Neuronal Correlates of Sound Reception	
and Discrimination	221
3.3.2.2 Inter-modal Syllable Matching	222
3.3.2.3 Specific Congruence Effects in Letter Matching	224
3.4 Finally (...)	225
