CONTENTS

CHAPTER 1	WHAT IS ACTIVATION SPECTROMETRY?	1
	References	7
PRINCIPLES		
CHAPTER 2	NEUTRON ACTIVATION	8
	Nuclear reactions	8
	Activation with neutrons	10
	Cross section	11
	Decay rate	13
	Induced activity	15
	Nuclear interferences	17
	References	19
CHAPTER 3	IRRADIATION FACILITIES	20
	Nuclear reactors	20
	Irradiation containers	22
	Irradiation devices	24
	Epithermal neutron activation	30
	Neutron flux distribution	32
	Other neutron sources	35
	References	38
CHAPTER 4	GAMMA RAYS	39
	Radioactive decay	39
	Decay schemes	41
	Branching ratios	44
	Detection of gamma rays	47
	Semiconductor detectors	51
	References	55

CHAPTER 5	SPECTROMETRY EQUIPMENT	56
	Detector	56
	Preamplifier	61
	Spectroscopy amplifier	63
	Pulse height analyzer	64
	Gamma ray spectrum	66
	Data processing	70
	Automation	74
	References	75
CHAPTER 6	ACTIVATION SPECTROMETRY	77
	Nuclide identification	77
	Peak evaluation	78
	Efficiency correction	81
	Quantitative determination of activity	84
	“Absolute” activation analysis	85
	Single comparator methods	86
	Chemical standards	87
	References	89
TECHNIQUES		
CHAPTER 7	SAMPLE PREPARATION	90
	Sample size	90
	Sample geometry	92
	Sample collection	94
	Homogenization	96
	Preconcentration	97
	References	98
CHAPTER 8	IRRADIATION CONTAINERS	100
	Shape and size	100
	Material	102
	Impurities	103
	Effect on neutron flux	107
	References	108

CHAPTER 9	PREPARATION OF STANDARDS	109
	Single-element standards	109
	Multielement standards	111
	Flux monitors	113
	Geometry	114
	References	115
CHAPTER 10	REFERENCE MATERIALS	117
	Choice of reference material	117
	Geochemical reference samples	118
	Biological reference materials	124
	Environmental reference materials	127
	Industrial reference materials	129
	In-house reference materials	129
	References	129
CHAPTER 11	IRRADIATION TECHNIQUES	131
	Choice of irradiation conditions	131
	Thermal neutron activation	132
	Epithermal neutron activation	134
	Fast neutron activation	138
	Photon activation	139
	Charged particle activation	141
	Length of irradiation	143
	References	146
CHAPTER 12	COUNTING TECHNIQUES	148
	Choice of gamma ray energy	148
	Choice of detector	149
	Counting time	153
	Cyclic activation analysis	154
	Cumulative activation analysis	157
	Delayed neutron counting	159
	References	161
APPLICATIONS		
CHAPTER 13	BIOMEDICAL APPLICATIONS	163
	Blood and tissue	163
	Stable tracers	167

	Hair and nails	168
	Bones	171
	Urine and feces	171
	<i>In vivo</i> analysis	172
	Nutrition	174
	References	177
CHAPTER 14	ENVIRONMENTAL APPLICATIONS	181
	Air pollutants	181
	Water	185
	Vegetation	190
	References	193
CHAPTER 15	GEOLOGICAL APPLICATIONS	196
	Soils	196
	Humus, mull and till	199
	Sediments	200
	Marble	202
	Silicate rocks	202
	Uranium ore	206
	Gold ore	207
	Platinum group minerals	208
	Borehole logging	209
	References	210
CHAPTER 16	INDUSTRIAL APPLICATIONS	213
	Carbon and boron	213
	Petroleum, oil and polymers	214
	Pharmaceuticals and cosmetics	217
	Coal and metalliferous ores	219
	Metals and alloys	221
	Semiconductor materials and glasses	225
	Clays and ceramics	228
	References	230
