Fast Fourier Transforms

CRC PRESS

Boca Raton Ann Arbor Boston London

Contents

| | | |
|----------|--|-----------|
| | <i>Introduction</i> | <i>xi</i> |
| <i>1</i> | <i>Basic Aspects of Fourier Series</i> | <i>1</i> |
| 1 | Definition of Fourier series | 1 |
| 2 | Examples of Fourier series | 4 |
| 3 | Fourier series of real functions | 9 |
| 4 | Pointwise convergence of Fourier series | 12 |
| 5 | Further aspects of convergence of Fourier series | 14 |
| 6 | Fourier sine series and cosine series | 21 |
| 7 | Convergence of Fourier sine and cosine series | 25 |
| | Exercises | 30 |
| <i>2</i> | <i>The Discrete Fourier Transform (DFT)</i> | <i>34</i> |
| 1 | Derivation of the DFT | 34 |
| 2 | Basic properties of the DFT | 36 |
| 3 | Relation of the DFT to Fourier coefficients | 39 |
| 4 | Relation of the DFT to sampled Fourier series | 41 |
| 5 | Discrete sine and cosine transforms | 43 |
| | Exercises | 47 |
| <i>3</i> | <i>The Fast Fourier Transform (FFT)</i> | <i>49</i> |
| 1 | Decimation in time, radix 2, FFT | 49 |
| 2 | Bit reversal | 54 |
| 3 | Rotations in FFTs | 58 |
| 4 | Computation of sines | 60 |

| | | |
|----------|--|-----|
| 5 | Computing two real FFTs simultaneously | 63 |
| 6 | Computing a real FFT | 65 |
| 7 | Fast sine and cosine transforms | 66 |
| 8 | Inversion of discrete sine and cosine transforms | 70 |
| 9 | Inversion of the FFT of a real sequence | 74 |
| | Exercises | 76 |
| 4 | <i>Some Applications</i> | 78 |
| 1 | Heat equation | 78 |
| 2 | The wave equation | 84 |
| 3 | Schrödinger's equation for a free particle | 88 |
| 4 | Filters used in signal processing | 97 |
| 5 | Designing filters | 103 |
| 6 | Convolution and point spread functions | 109 |
| 7 | Discrete convolutions using FFTs | 116 |
| 8 | Kernels for some common filters | 119 |
| 9 | Convergence of filtered Fourier series | 124 |
| | Exercises | 130 |
| 5 | <i>Fourier Transforms</i> | 135 |
| 1 | Introduction | 135 |
| 2 | Properties of Fourier transforms | 140 |
| 3 | Inversion of Fourier transforms | 144 |
| 4 | The relation between Fourier transforms and DFTs | 149 |
| 5 | Convolution — An introduction | 154 |
| 6 | The convolution theorem | 160 |
| 7 | Filtering | 165 |
| 8 | Poisson summation | 171 |
| 9 | An example of Poisson summation in quantum mechanics | 174 |
| 10 | Summation kernels arising from Poisson summation | 178 |
| 11 | The sampling theorem | 183 |
| 12 | Aliasing | 188 |
| 13 | Sine and cosine transforms | 191 |
| | Exercises | 194 |
| 6 | <i>Fourier Optics</i> | 199 |
| 1 | Introduction, diffraction and coherency of light | 199 |
| 2 | Fresnel diffraction | 205 |
| 3 | Fraunhofer diffraction | 212 |
| 4 | Circular apertures | 214 |
| 5 | Interference | 221 |

| | | |
|----------|---|-----|
| 6 | Diffraction gratings | 222 |
| 7 | Spectral analysis with diffraction gratings | 229 |
| 8 | The phase transformation induced by a thin lens | 233 |
| 9 | Imaging with a single lens | 238 |
| 10 | Coherent imaging | 241 |
| 11 | Fourier transforming properties of a lens | 249 |
| 12 | Incoherent imaging | 254 |
| | Exercises | 258 |
| A | <i>User's Manual for FAS</i> | 272 |
| B | <i>Some Computer Programs</i> | 300 |
| | <i>Bibliography</i> | 312 |
| | <i>Index</i> | 315 |
