Pr	eface	to the Second Edition		xiii	
1	Overview and Motivation				
	1.1	From Mechanisms to Computation		4	
	1.2	Historical Context		5	
	1.3	<b>Biological Inspiration</b>		11	
	1.4	Operational Regimes		11	
	1.5	Operational Modes		11	
	1.6	A Guide to This Book		12	
	1.7	Further Reading		13	
	1.8	Problems		16	
2	Fundamental Problems				
	2.1	Path Planning for a Point Robot		19	
	2.2	Localization for a Point Robot		21	
	2.3	Sensing for a Point Robot		23	
	2.4	Mapping for a Point Robot		25	
	2.5	SLAM for a Point Robot		25	
	2.6	Looking Forward		26	
	2.7	Further Reading		27	
	2.8	Problems		27	
Pa	rt Or	e: Locomotion and Perception		29	
3	Mol	oile Robot Hardware		31	
	3.1	Locomotion		31	
	3.2	Off-Board Communication		71	
	3.3	Processing		75	
	3.4	Further Reading		76	
	3.5	Problems		77	
4	Non	-Visual Sensors and Algorithms		82	
	4.1	Basic Concepts		82	
	4.2	Contact Sensors: Bumpers		86	

	4.3	Inertial Sensors		87
	4.4	Infrared Sensors		90
	4.5	Sonar		91
	4.6	Radar		98
	4.7	Laser Rangefinders		98
	4.8	Satellite-Based Positioning		100
	4.9	Data Fusion		102
	4.10	Biological Sensing		118
	4.11	Further Reading		120
	4.12	Problems		121
5	Visual Sensors and Algorithms			
	5.1	Visual Sensors		124
	5.2	Object Appearance and Shading		131
	5.3	Signals and Sampling		132
	5.4	Image Features and Their Combination		134
	5.5	Obtaining Depth		149
	5.6	Active Vision		155
	5.7	Other Sensors		158
	5.8	Biological Vision		162
	5.9	Further Reading		163
	5.10	Problems		164
Pa	rt Two	o: Representation and Planning		165
6	Repr	resenting and Reasoning About Space		167
	6.1	Representing Space		167
	6.2	Representing the Robot		176
	6.3	Path Planning for Mobile Robots		179
	6.4	Planning for Multiple Robots		208
	6.5	Biological Mapping		209
	6.6	Further Reading		210
	6.7	Problems		210
7	System Control 2			
	7.1	Horizontal Decomposition		213
	7.2	Vertical Decomposition		217
	7.3	Hybrid Control Architectures		223
	7.4	Middleware		226
	7.5	High-Level Control		226
	7.6	Alternative Control Formalisms		230
	7.7	The Human–Robot Interface		235
	7.8	Mobile Robot Software Development as		
		Experimentation		237
	7.9	Standard Software Toolkits		237

	7.10	Further Reading	238
	7.11	Problems	239
8	Pose	Maintenance and Localization	240
	8.1	Simple Landmark Measurement	241
	8.2	Servo Control	249
	8.3	Recursive Filtering	250
	8.4	Non-Geometric Methods: Perceptual Structure	260
	8.5	Correlation-Based Localization	267
	8.6	Global Localization	267
	8.7	Biological Approaches to Localization	273
	8.8	Further Reading	274
	8.9	Problems	274
9	Мар	ping and Related Tasks	276
	9.1	Sensorial Maps	278
	9.2	Geometric Maps	279
	9.3	Topological Maps	287
	9.4	Exploration	291
	9.5	Further Reading	294
	9.6	Problems	294
10	Poh	at Collectives	295
10	10.1	Concentres	293
	10.1	Control Architectures	290
	10.2	Collective Communication	290
	10.5	Sensing	300
	10.4	Dianning for Action	300
	10.5	Framming for Action	302
	10.0		302
	10.7	Localization	303
	10.0	Mapping	304
	10.9	Problems	305
	10.10	Tiobenis	500
11	Roh	nts in Practice	307
	11 1	Delivery Robots	307
	11.1	Intelligent Vehicles	309
	11.2	Robots for Survey and Inspection	314
	11.5	Mining Automation	316
	11.4	Snace Robotics	317
	11.5	Autonomous Aircraft	319
	11.0	Military Reconnaissance	320
	11.7	Romb/Mine Disposal	320
	11.0	Underwater Inspection	320
	11.7	) A griculture/Forestry	322
	11 11	Aids for the Disabled	325

	11.12	Entertainment	326
	11.13	Domestic Robots	327
	11.14	Further Reading	327
	11.15	Problems	328
12	The <b>F</b>	Future of Mobile Robotics	329
	12.1	Locomotion	329
	12.2	Sensors	331
	12.3	Control	332
	12.4	System Integration	332
	12.5	Standardization	333
	12.6	Future Directions	333
An	nondi	x A · Drobability and Statistics	225
Ар		Drohohililty	335
	A.1	Some Simple Statistics	220
	A.2	Some Simple Statistics	220
	A.3 A.4	Problems	339
Ap	pendi	x B: Linear Systems, Matrices, and Filtering	341
	<b>B</b> .1	Linear Algebra	341
	<b>B.2</b>	Matrix Algebra	341
	B.3	Signals and Systems	343
	B.4	Fourier Theory	344
	B.5	Sampling and the Nyquist Theorem	344
	<b>B.6</b>	Further Reading	345
	<b>B</b> .7	Problems	345
An	pendiy	x C: Markov Models	346
P	C 1	Discrete Markov Process	346
	$C_{2}$	Hidden Markov Models	348
	C 3	Markov Decision Process	349
	C.4	POMDP	350
	C.5	Further Reading	351
	C.6	Problems	351
	2.0		201
