# CONTENTS

PREFACE TO THE SECOND EDITION	ix
PREFACE TO THE FIRST EDITION	x
CONTENTS OF VOLUMES II AND III	xii

## Chapter 1. Polymerization of Olefinic and Diolefinic Hydrocarbons

1. Introduction	2
2. Free Radical Polymerizations	3
3. Cationic Polymerizations	21
4. Anionic Polymerizations	35
5. Coordination Catalyst Polymerizations	46
6. Miscellaneous Methods	56
References	58

## Chapter 2. Polyesters

1. Introduction	68
2. Condensation Reactions	75
3. Miscellaneous Methods	85
References	86

## Chapter 3. Polycarbonates

1. Introduction	91
2. Condensation Reactions	92
3. Miscellaneous Methods	106
References	107

## Chapter 4. Polyamides

1. Introduction	111
2. Condensation Reactions	114
3. Miscellaneous Methods	137
References	138

**Chapter 5. Polymerization of Aldehydes**

1. Introduction	143
2. Polymerization of Formaldehyde to Polyoxymethylene	144
3. Polymerization of Trioxane to Polyoxymethylene	154
4. Polymerization of Acetaldehyde	160
5. Polymerization of Halogenated Aldehydes	165
6. Polymerization of Other Aldehydes	172
7. Miscellaneous Methods	175
References	176

**Chapter 6. Polymerization of Epoxides and Cyclic Ethers**

1. Introduction	184
2. Condensation Methods	187
3. Miscellaneous Methods	211
References	213

**Chapter 7. Polyureas**

1. Introduction	218
2. Condensation Methods	220
3. Miscellaneous Methods	227
References	228

**Chapter 8. Polyurethanes**

1. Introduction	232
2. Condensation Methods	234
3. Miscellaneous Methods	249
References	250

**Chapter 9. Thermally Stable Polymers**

1. Introduction	255
2. Polyimides	256
3. Polybenzimidazoles	266
4. Polyquinoxalines	276
5. Polyphenylene Ethers	283
6. Poly-1,3,4-oxadiazoles and Poly-1,2,4-triazoles	292
7. Polyaromatic Sulfones	296
8. Polybenzothiazoles	299
9. Polybenzoxazoles	300
10. Aromatic Polyether Ketones	305
11. Miscellaneous High-Temperature Polymers	308
References	309

**Chapter 10. Polymerization of Acrylate and Methacrylate Esters**

1. Introduction	318
2. General Considerations	318
3. Reactants and Reaction Conditions	322
4. Polymerization Procedures	330
5. Miscellaneous Methods	369
References	371

**Chapter 11. Polymerization of Nitrile Monomers**

1. Introduction	378
2. Polymerization of Acrylonitrile and Methacrylonitrile	382
3. Polymerization of Miscellaneous Nitrile Monomers	408
4. Miscellaneous Methods	412
References	413

**Chapter 12. Polyacrylamide and Related Amides**

1. Introduction	420
2. Free Radical Polymerization	423
3. Anionic Polymerization	448
4. Hydrogen- (or Proton-) Transfer Polymerization	449
5. Miscellaneous Methods	453
References	454

**Chapter 13. Organophosphorus Polymers**

1. Introduction	461
2. Organophosphate Polymers	472
3. Polyphosphonates	485
4. Polyphosphites	507
5. Polyphosphorylamides, Polyphosphonamides, and Polyphosphinamides	512
6. Polyphosphines and Derivatives	518
7. Phosphonitrilic Polymers and Related Compounds	519
8. Miscellaneous Methods	532
References	535

**Chapter 14. Free Radical Initiation of Vinyl and Related Monomers**

1. Introduction	547
2. Free Radical Initiation	549
3. Miscellaneous Methods	576
References	576

**Appendix**

1. Nomenclature	582
2. Polymer Isomerism	583
3. Polymer Characterization	584
4. Viscosity	585
5. Molecular Weight Measurements	586
6. Chain-Transfer Equation	588
7. Copolymerization	589
8. Glass-Transition Temperature of Copolymers	591
References	591
