Robust Resource Allocation in Future Wireless Networks

 Springer

Contents

1 Introduction	1
1.1 Motivation	1
1.2 Formulating Resource Allocation Problems	4
1.3 Mathematical Background	8
1.3.1 Stochastic Robust Optimization	8
1.3.2 Worst-Case Robust Optimization	9
1.3.3 Hybrid Approach: Bounded Uncertainty and Probabilistic Constraints	11
1.4 Generic System Model	15
1.4.1 System Model for Wireless Networks with Homogeneous Users	17
1.4.2 System Model for Wireless Networks with Heterogeneous Users	18
1.4.3 Physical Layer Security in Wireless Channels	20
1.5 Cost of Robustness	25
1.6 Organization of This Book	26
References	27
2 Robust Cooperative Resource Allocation	33
2.1 Introduction	33
2.2 Single-Channel Cellular Cognitive Radio Networks	35
2.2.1 Robust Problem	36
2.3 Multi-channel Cognitive Radio Networks	49
2.3.1 Robust Problems	52
2.3.2 Trade-Off Algorithms	60
2.4 Overview of Other Works on Robust Cooperative Resource Allocation	68
2.5 Concluding Remarks	70
Appendices	71
References	77

3	Robust Noncooperative Resource Allocation	81
3.1	Introduction	81
3.2	Overview of Nominal Noncooperative Strategic Games	83
3.2.1	Existence, and Uniqueness of NE	85
3.2.2	Social Utility (Sum Rate) at NE	91
3.2.3	Distributed Algorithms	93
3.3	Worst-Case Robust Power Control in Noncooperative Games	95
3.3.1	Robust Power Control for Noncooperative Homogeneous Users	95
3.3.2	Robust Power Control in Noncooperative CRNs.....	111
3.3.3	Robust Power Control for Noncooperative Heterogeneous Users	114
3.4	Concluding Remarks.....	122
	Appendices	124
	References	140
4	Nonconvex Robust Problems	145
4.1	Introduction	145
4.2	Taxonomy of Relaxation Methods	146
4.2.1	Direct Relaxation	148
4.2.2	Lagrangian Relaxation.....	177
4.3	Application of Relaxation Methods for Robust Resource Allocation	180
4.3.1	Partial CSI Feedback: Bounded Uncertainty	181
4.3.2	Partial CSI Feedback: Stochastic Uncertainty	212
4.3.3	No CSI Feedback.....	222
4.4	Concluding Remarks.....	227
	Appendices	228
	References	229
5	Conclusions and Future Research	233
5.1	Future Wireless Networks	233
5.2	Future of Resource Allocation.....	236
5.3	Concluding Remarks.....	237
	References	238
	Index	241
