CONTENTS

Preface to the series	ix
Preface	xi
Contents	xiii
1. Dislocations and internal stresses	1
<i>V.L. Indenbom</i>	
2. Dislocations in continuous elastic media.	175
<i>J. Lothe</i>	
3A. Crystal lattice effects	237
<i>J.P. Hirth</i>	
3B. The microscopic theory of cracks	253
<i>V.L. Indenbom</i>	
4. Dislocations in anisotropic media.	269
<i>J. Lothe</i>	
5. Dislocations interacting with surfaces, interfaces or cracks . . .	329
<i>J. Lothe</i>	
6. Dislocations emerging at planar boundaries.	391
<i>A.Yu. Belov</i>	
7. Uniformly moving dislocations; surface waves	447
<i>J. Lothe</i>	
8. Dislocation motion over the Peierls barrier	489
<i>V.L. Indenbom, B.V. Petukhov and J. Lothe</i>	
9. Thermally activated glide of a dislocation in a point defect field	517
<i>V.L. Indenbom and V.M. Chernov</i>	
10. Dislocation glide and climb	571
<i>V.L. Indenbom and Z.K. Saralidze</i>	
11. The phonon-dislocation interaction and its rôle in dislocation dragging and thermal resistivity.	625
<i>V.I. Alshits</i>	
12. Dislocations in irradiated crystals.	699
<i>V.L. Indenbom and Z.K. Saralidze</i>	
Author index	745
Subject index	757
Cumulative index.	765
