# Magnetism and the Electronic Structure of Crystals

With 79 Figures

Springer-Verlag

Berlin Heidelberg New York

London Paris Tokyo

Hong Kong Barcelona Budapest

# Contents

|  |     |
|--|-----|
| <b>1. Introduction</b> . . . . .   | 1   |
| <b>2. Superexchange Interaction in Magnetic Insulators</b> . . . . .                                     | 7   |
| 2.1 Anderson Model of Superexchange. . . . .   | 7   |
| 2.2 Many-Electron Superexchange . . . . .  | 13  |
| 2.3 Orbital Degeneracy and Magnetism. . . . .  | 16  |
| 2.4 Charge-Transfer Magnetic Insulators . . . . .  | 18  |
| <b>3. Localized Magnetic Moments of Impurities in Metals</b> . . . . .                                   | 24  |
| 3.1 Virtual Bound State . . . . .  | 24  |
| 3.2 Anderson Model of Localized Magnetic Moments. . . . .  | 27  |
| 3.3 Interaction of Impurities. . . . .   | 30  |
| 3.4 Orbital Degeneracy and Quenching of Orbital Moment . . . . .   | 34  |
| 3.5 Criteria for the Existence of Magnetic Moments<br>Based on Ab Initio Calculations. . . . .           | 37  |
| <b>4. Exchange Interactions in Metals</b> . . . . .  | 41  |
| 4.1 Stoner's Model of Ferromagnetism. . . . .  | 41  |
| 4.2 Spin-Fluctuation Theories of Itinerant Magnetism. . . . .  | 43  |
| 4.3 High-Temperature Magnetic Structures of Ferromagnets. . . . .  | 49  |
| <b>5. Ab Initio Approaches to the Electronic Structure of Magnetic Crystals</b> . . . . .                | 55  |
| 5.1 Spin-Density Functional Approach. . . . .  | 55  |
| 5.2 Band-Structure Approaches in the Green Function Formalism . . . . .                                  | 61  |
| 5.3 Magnetic Interactions Within the LSDA . . . . .  | 68  |
| <b>6. Results of Band-Structure Calculations for Transition Metals<br/>and Their Compounds</b> . . . . . | 76  |
| 6.1 Electronic Structure of Magnetic 3d Metals . . . . .   | 76  |
| 6.2 Intermetallic Compounds and the Concept of Covalent Magnetism . . . . .                              | 88  |
| 6.3 Antiferromagnetic Monoxides. . . . .   | 95  |
| 6.4 Magnetic Structure and Exchange Interactions in<br>High-Temperature Superconductors . . . . .        | 107 |
| 6.4.1 Magnetic Ordering in Non-superconducting Cuprates:<br>Experimental Results . . . . .               | 108 |

|  |     |
|--|-----|
| 6.4.2 Band-Structure and Cluster Calculations<br>of Antiferromagnetic Ordering . . . . . | 109 |
| 6.4.3 Exchange Interaction Parameters<br>in High- $T_C$ Superconductors . . . . .        | 112 |
| <b>7. Magnetic Impurities in Metals.</b> . . . . .                                       | 115 |
| 7.1 Impurities in Aluminium. . . . .   | 115 |
| 7.2 Impurities in Transition Metals . . . . .  | 119 |
| 7.2.1 Impurities in Pd. . . . .  | 125 |
| 7.2.2 Impurities in Nb and Mo. . . . .   | 128 |
| 7.2.3 Impurities in Early Transition Metals (Ti, Zr). . . . .                            | 131 |
| 7.3 Impurities in Magnetic Metals . . . . .  | 135 |
| 7.3.1 Fe-Based Impurity Systems . . . . .  | 135 |
| 7.3.2 Ni-Based Systems. . . . .  | 141 |
| 7.3.3 Co-Based Impurities. . . . .   | 145 |
| 7.3.4 Impurities in Antiferromagnets . . . . .   | 146 |
| 7.3.5 Impurities in FeCo Alloys . . . . .  | 149 |
| 7.4 Interaction of Impurities. . . . .   | 152 |
| <b>8. Conclusion</b> . . . . .   | 158 |
| <b>References</b> . . . . .  | 159 |
| <b>Subject Index</b> . . . . .   | 169 |
| <b>Index of Compounds</b> . . . . .  | 171 |
