

POLYMERS FOR LIGHTWAVE AND INTEGRATED OPTICS

TECHNOLOGY AND APPLICATIONS

LAWRENCE A. HORNAK

*AT&T Bell Laboratories
Holmdel, New Jersey*

*West Virginia University
Morgantown, West Virginia*

Marcel Dekker, Inc.

New York • Basel • Hong Kong

Contents

<i>About the Series</i>	iii
<i>Preface</i>	v
<i>Advisory Board</i>	xi
<i>Contributors</i>	xiii

Part I: Passive Optical Polymers and Applications

Chapter 1	Polymer Optical Fibers <i>Toshikuni Kaino</i>	1
Chapter 2	Polymer Optical Fibers in Data Communications and Sensor Applications <i>J. Theis, A. Brockmeyer, W. Groh, and T. F. Stehlin</i>	39
Chapter 3	Graded Index Materials and Components <i>Yasuhiro Koike</i>	71
Chapter 4	Patterning Poly(methyl methacrylate) <i>Hilmar Franke</i>	105
Chapter 5	Photopolymers for Holography and Waveguide Applications <i>Bruce M. Monroe and William K. Smothers</i>	145
Chapter 6	Microoptical Grating Elements <i>Nobuhiro Kawatsuki and Masao Uetsuki</i>	171
Chapter 7	Synthesis and Applications of Polysilyne Thin Film Optical Waveguide Media <i>Timothy W. Weidman, Elizabeth W. Kwock, Patricia A. Bianconi, and Lawrence A. Hornak</i>	195

Chapter 8	Polyimide Lightguides <i>Hilmar Franke</i>	207
Chapter 9	Optical Interconnection Polymers <i>B. L. Booth</i>	231
Chapter 10	Polymer Optics in the Information Age <i>Davis H. Hartman</i>	267
 Part II: Nonlinear Optical Polymers and Applications		
Chapter 11	Optical Polymers and Multifunctional Materials <i>R. A. Norwood, T. Findakly, H. A. Goldberg, G. Khanarian, J. B. Stamatoff, and H. N. Yoon</i>	287
Chapter 12	Molecular Polymeric Materials for Nonlinear Optics <i>Kenneth D. Singer</i>	321
Chapter 13	Guest-Host Polymer Systems for Second-Order Optical Nonlinearities <i>Philip Pantelis and Julian R. Hill</i>	343
Chapter 14	Nonlinear Optical Side-Chain Polymers and Electro-Optic Test Devices <i>C. P. J. M. van der Vorst, W. H. G. Horsthuis, and G. R. Möhlmann</i>	365
Chapter 15	Fabrication and Characterization of Polymeric Lightwave Devices <i>William R. Holland</i>	397
Chapter 16	Large-Scale Integration of Electro-Optic Polymer Waveguides <i>R. Lytel, G. F. Lipscomb, J. T. Kenney, and E. S. Binkley</i>	433
Chapter 17	Polymer Etalons and Free Space Interconnects <i>Stephen T. Kowel and Charles A. Eldering</i>	473
Chapter 18	Third-Order Optical Processes in Linear Chains: Electron Correlation Theory and Experimental Dispersion Measurements <i>J. R. Heflin and A. F. Garito</i>	501
Chapter 19	Third-Order Nonlinear Optical Processes and Ultrafast Dynamics in Polymers <i>Takayoshi Kobayashi</i>	543
Chapter 20	Third-Order Materials: Processes and Characterization <i>F. Kajzar, J. Messier, J. M. Nunzi, and P. Raimond</i>	595
Chapter 21	Third-Order Nonlinear Optical Properties of Polymeric Materials <i>Toshikuni Kaino and Takashi Kurihara</i>	647
Chapter 22	All-Optical Phase Modulation in Polydiacetylene Waveguides <i>M. Thakur</i>	667

Contents

ix

Chapter 23	Holographic Memories Using Organic Storage Materials <i>W. Driemeier and M. D. Lechner</i>	681
Chapter 24	Material Structures of Organic Molecules and Matrices for Persistent Spectral Hole Burning <i>Uichi Itoh and Toshiro Tani</i>	707
<i>Index</i>		735
