

Theory of Chemisorption

Edited by J. R. Smith

With Contributions by

J. A. Appelbaum F. J. Arlinghaus T. L. Einstein
Ş. Ellialtıođlu J. G. Gay D. R. Hamann J. A. Hertz
A. B. Kunz J. R. Schrieffer J. R. Smith T. Wolfram
S. C. Ying

With 116 Figures

Springer-Verlag Berlin Heidelberg New York 1980

Contents

1. <i>Introduction</i> . By J.R. Smith	1
2. <i>Density Functional Theory of Chemisorption on Simple Metals</i> By S.C. Ying (With 12 Figures)	3
2.1 Background Information	3
2.1.1 Importance of Self-Consistency	3
2.1.2 Density Functional Theory	4
2.2 Statistical Approach	7
2.2.1 Linear Response Function	7
2.2.2 Chemisorption on Jellium: Hydrogen and the Alkalies	11
2.2.3 Effect of Field Emission Fields on Chemisorption	18
2.2.4 Perturbative Introduction of Single Crystal Lattice Structure for the Substrate: Application to Aluminum Substrate	21
2.2.5 Nonlinear Response for Sodium Chemisorption	25
2.3 Approach Based on the Solution of Effective One-Electron Schrödinger Equation	27
2.3.1 Methods of Solving the Kohn-Sham Equation for Chemi- sorption Systems	27
2.3.2 Single-Atom Chemisorption on Jellium; H, Li, O, Na, Si and Cl	30
2.3.3 Reintroduction of Single-Crystal Lattice Structure; Si, O, and H on Al	34
2.3.4 Core Hole and Relaxation Effects; O, Na, Si and Cl	36
2.4 Concluding Remarks	39
References	40
3. <i>Chemisorption on Semiconductor Surfaces</i> By J.A. Appelbaum and D.R. Hamann (With 24 Figures)	43
3.1 Background Information	43
3.2 Bulk Properties	44
3.3 General Surface Properties	45

3.4	Computational Approaches	48
3.5	Clean Semiconductor Surfaces	52
3.6	H Chemisorption on Si Surfaces	54
3.6.1	H on Si(111)–Simple Phase	56
3.6.2	H on Si(111)–Disordered	57
3.6.3	H on Si(111)–Trihydride Phase	58
3.6.4	H Chemisorbed on 2×1 Si(100)	59
3.6.5	H Interacting with 1×1 Si(100)	60
3.7	Cl Chemisorption on Si(111) and Ge(111)	62
3.8	Al Chemisorption on Si(111)	64
3.9	Al Chemisorption on GaAs(110)	66
	References	68
4.	<i>Chemisorption on d-Band Metals</i>	
	By F.J. Arlinghaus, J.G. Gay, and J.R. Smith (With 35 Figures)	71
4.1	Moments Method	73
4.2	Muffin-Tin Methods	74
4.3	Parametrized LCAO Methods	76
4.3.1	Slater-Koster Method for Clean Surfaces	77
4.3.2	Extended Huckel Theory	77
4.3.3	Parametrized LCAO for Chemisorption	79
4.3.4	Tight Binding	81
4.4	Linear Combination of Muffin-Tin Orbitals (LCMTO) Method	82
4.5	Self-Consistent Methods	85
4.5.1	Gaussian Expansion Method	85
4.5.2	Numerical Basis Set Method	87
4.6	Fully Self-Consistent Methods	90
4.6.1	Pseudopotential Method	91
4.6.2	Self-Consistent Local Orbital Method	97
4.7	Summary	111
	References	111
5.	<i>Cluster Chemisorption.</i> By B. Kunz (With 9 Figures)	115
5.1	Ideal Choice of Problem for Cluster Simulation	116
5.2	Methods of Obtaining a Solution	118
5.3	Interaction of Cluster and Environment	129
5.4	Examples of Cluster Calculations	135
	References	145

6. <i>Concepts of Surface States and Chemisorption on d-Band Perovskites</i> By T. Wolfram and Ş. Ellialtıođlu (With 17 Figures)	149
6.1 Introductory Remarks	149
6.1.1 General Comments	149
6.1.2 The Perovskites	151
6.2 Cluster Models of Transition Metal Oxides	153
6.3 Bulk and Surface Electronic Properties of the Perovskites	158
6.3.1 Bulk Electronic Properties	158
6.3.2 Surface Electronic Properties	161
6.3.3 Qualitative Features of Chemisorption	165
6.3.4 Effect of Electron-Electron Interactions	167
6.4 Surface Oxygen Vacancy States (SOVS)	169
6.5 Photoemission Experiments on SrTiO ₃	172
6.5.1 Surface State Emission	172
6.5.2 Comparisons with Theory	174
6.5.3 Oxygen Adsorption on (100) SrTiO ₃	177
6.6 Summary	178
References	180
7. <i>Theoretical Issues in Chemisorption</i> By T.L. Einstein, J.A. Hertz, and J.R. Schrieffer (With 19 Figures) ...	183
7.1 Local Density Approximations and Generalizations	184
7.1.1 Excitation Spectrum	188
7.2 The Anderson Model Picture	190
7.2.1 Hartree-Fock Calculations for Simple Tight-Binding Model Substrates: Surface Densities of States	191
7.2.2 Improvements of the Anderson Model	196
7.3 Beyond the Hartree-Fock Theory	203
7.3.1 The Valence-Bond Picture	203
7.3.2 Spin Fluctuation Model	207
7.3.3 Interpolative Decoupling Methods	211
7.3.4 Variational Methods	217
7.4 Adatom-Adatom Interactions	220
7.5 Photoemission	227
7.6 Concluding Remarks	232
