# Contents

1. Description of a Dislocation	1
<i>Discovery of the Dislocation</i>	1
<i>Description of the Dislocation Line</i>	4
<i>Prismatic Dislocation Loop</i>	9
<i>Motion of Dislocations</i>	11
<i>Burgers Vector of a Dislocation</i>	15
2. The Stress Field Around a Dislocation	22
<i>Review of Elasticity Theory</i>	22
DISPLACEMENT	22
STRAIN	23
STRESS	26
LINEAR ELASTICITY THEORY	29
EQUILIBRIUM EQUATIONS	30
<i>Stress and Displacement Field of a Dislocation</i>	32
STATIONARY SCREW DISLOCATIONS	32
STATIONARY EDGE DISLOCATIONS	35
MIXED DISLOCATIONS	38
UNIFORMLY MOVING DISLOCATIONS	39
<i>Appendix to Chapter 2:</i>	
<i>Transformation of Stress Components</i>	40
3. Forces on a Dislocation	45
<i>Self-Energy of a Dislocation Line</i>	45
STRAIN ENERGY	45
SCREW DISLOCATION	46
ALTERNATIVE SELF-ENERGY CALCULATION	47
EDGE DISLOCATIONS	49
MIXED DISLOCATIONS	50
ENERGY OF A CURVED DISLOCATION LINE	50

<i>Line Tension</i>	52
<i>Forces on Dislocations</i>	54
FORCES DUE TO EXTERNALLY APPLIED STRESS	
(THE PEACH-KOEHLER EQUATION)	55
MIXED DISLOCATIONS	58
FORCE DUE TO INTERNAL STRESSES	61
<i>Forces Between Dislocations</i>	65
PARALLEL SCREW DISLOCATIONS	65
PARALLEL EDGE DISLOCATIONS WITH PARALLEL BURGERS VECTORS	66
PARALLEL EDGE DISLOCATIONS WITH PERPENDICULAR	
BURGERS VECTORS	67
GENERAL CASE	69
FORCES BETWEEN PERPENDICULAR DISLOCATIONS	69
TWO PERPENDICULAR SCREW DISLOCATIONS	69
AN EDGE AND A SCREW DISLOCATION PERPENDICULAR TO	
EACH OTHER	70
<i>Chemical Force on a Dislocation</i>	72
<i>Total Force on a Dislocation</i>	77
4. Dislocation Reactions in Crystals	84
<i>Burgers Vectors of Two or More Combined Dislocations</i>	84
<i>Burgers Vectors of Dislocations Joined at the Node</i>	84
<i>Energy Considerations</i>	86
<i>Face-Centered Cubic Crystals</i>	87
<i>Two Dislocations on the Same (111) Plane</i>	92
<i>Two Dislocations on Different (111) Planes</i>	92
<i>The Frank Sessile Dislocation</i>	94
<i>The Shockley Partial Dislocation</i>	94
<i>Reactions Involving Perfect and Imperfect Crystals</i>	103
<i>Stair-Rod Dislocation</i>	105
<i>Cottrell-Lomer Lock</i>	107
<i>Hexagonal Close-Packed Lattice</i>	108
<i>Body-Centered Cubic Crystals</i>	114
5. Dislocation Multiplication, Twinning, Peierls Force and	
Related Topics	123
<i>Dislocations Multiplication</i>	123
<i>Dislocation Pile-up</i>	126
<i>Dislocation Intersection and Dislocation Jogs</i>	131
<i>Conservative and NonConservative Motion of Jogs</i>	136
<i>Pole Mechanism</i>	139

<i>Twinning</i>	141
<i>Emissary Dislocations</i>	144
<i>Stacking Fault Tetrahedron</i>	146
<i>Peierls Stress</i>	147
SIMPLIFIED CALCULATIONS OF THE PEIERLS STRESS OF A SCREW	
DISLOCATION	149
SELF-ENERGY	153
PEIERLS FORCE	156
6. Image Forces, Interactions with Point Defects and Other Topics	168
<i>Image Forces</i>	168
IMAGE DISLOCATION	168
IMAGE FORCE NEAR AN INTERFACE SEPARATING MATERIAL OF DIFFERENT ELASTIC CONSTANTS	170
<i>Point Defect Interactions—Cottrell-Pinning</i>	173
SUZUKI OR CHEMICAL INTERACTION	178
<i>Other Interactions of Alloying Atoms and Dislocations</i>	181
STRESS INDUCED ORDER (SCHOECK-SNOEK EFFECT)	181
LONG-RANGE ORDER	183
SHORT-RANGE ORDER AND CLUSTERING	184
<i>Drift of Pinned Dislocations at High Temperatures and Low Stresses</i>	184
<i>Small Angle Grain Boundaries</i>	187
SYMMETRIC TILT BOUNDARY	187
ENERGY OF A SIMPLE TILT BOUNDARY	189
NONSYMMETRIC TILT BOUNDARY	189
GENERAL TILT BOUNDARY	192
SYMMETRIC TWIST BOUNDARY	192
NONSYMMETRIC TWIST BOUNDARY	195
GENERAL SMALL ANGLE BOUNDARY	195
<i>Curvature of a Crystal Lattice</i>	195
<i>Origin of Dislocations</i>	196
THERMAL STRESSES	198
IMPURITY ATOMS	198
VACANCY AND INTERSTITIAL COLLAPSE	198
SCREW DISLOCATION MECHANISM	199
WHISKERS	201
Appendix	209
Index	211
