# Contents

|          |  |    |
|----------|--|----|
| <b>I</b> | <b>III-V Quantum Wells and Superlattices</b> .....   | 19 |
| I.1      | Manybody-Effects in Nonlinear Optics of Semiconductor Structures.....<br><i>W. Schäfer</i> | 21 |
| I.1.1    | Introduction .....   | 21 |
| I.1.2    | Theoretical Background .....   | 24 |
| I.1.3    | Optical Bloch Equations for Quantum-Well Systems.....                                      | 27 |
| I.1.4    | A Simple Four-Wave-Mixing Configuration .....  | 32 |
| I.1.5    | Results and Discussion .....   | 34 |
| I.1.6    | A Local Field Model.....   | 46 |
| I.1.7    | Conclusions .....  | 48 |
|          | References .....   | 48 |
| I.2      | Optical Stark Effect in Quantum Wells.....<br><i>R. Zimmermann and D. Fröhlich</i>         | 51 |
| I.2.1    | Introduction .....   | 51 |
| I.2.2    | Interband Stark Effect.....  | 53 |
| I.2.3    | Theory of the Intraband Stark Effect .....   | 56 |
| I.2.4    | x-Polarization .....   | 60 |
| I.2.5    | z-Polarization .....   | 62 |
| I.2.6    | Modelling the Mixed Polarization .....   | 64 |
| I.2.7    | Experimental Results and Discussion .....  | 66 |
|          | Appendix .....   | 70 |
|          | References .....   | 74 |

|        |  |     |
|--------|--|-----|
| 1.3    | Coherent Nonlinear Spectroscopy of Excitons in Quantum Wells .....               | 75  |
|        | <i>D. G. Steel, H. Wang, and S. T. Cundiff</i>                                   |     |
| 1.3.1  | Introduction .....   | 75  |
| 1.3.2  | Frequency Domain Four-Wave Mixing Spectroscopy .....                             | 79  |
| 1.3.3  | Picosecond Coherent Transient Four-Wave Mixing Spectroscopy .....                | 98  |
| 1.3.4  | Summary .....  | 121 |
|        | References .....   | 122 |
| 1.4    | Quantum Beats in Quantum Wells .....   | 127 |
|        | <i>K. Leo</i>  |     |
| 1.4.1  | Introduction .....   | 127 |
| 1.4.2  | Experimental Set-up .....  | 129 |
| 1.4.3  | Quantum Beats between Heavy-Hole and Light-Hole Excitons ..                      | 132 |
| 1.4.4  | Polarization Interference Beats in Quantum Wells .....                           | 138 |
| 1.4.5  | Quantum Beats between Free and Bound Excitons .....                              | 143 |
| 1.4.6  | Conclusion .....   | 146 |
|        | References .....   | 147 |
| 1.5    | Optical Studies of Coherent and Incoherent Tunneling in Quantum Wells .....      | 149 |
|        | <i>J. Shah</i>   |     |
| 1.5.1  | Introduction .....   | 149 |
| 1.5.2  | Asymmetric Double Quantum Well Structures (a-DQWS) ...                           | 151 |
| 1.5.3  | Time-Resolved Luminescence Studies of Incoherent Tunneling ..                    | 161 |
| 1.5.4  | Coherent Oscillations of an Electronic Wavepacket .....                          | 168 |
| 1.5.5  | Coherent Emission of Submillimeter-Wave Radiation .....                          | 172 |
| 1.5.6  | Summary .....  | 176 |
|        | References .....   | 177 |
| 1.6    | Superlattices under Electric Fields: The Stark Ladder and its Consequences ..... | 181 |
|        | <i>E. E. Mendez</i>  |     |
| 1.6. 1 | Introduction .....   | 181 |
| 1.6. 2 | An Electron in a Periodic Potential under an Electric Field ...                  | 183 |

|           |   |     |
|-----------|---|-----|
| I.6. 3    | The Stark Ladder in Semiconductor Superlattices .....   | 187 |
| I.6. 4    | The Stark Ladder and Electronic Coherence .....   | 193 |
| I.6. 5    | Calculations of the Stark Ladder in Superlattices .....   | 195 |
| I.6. 6    | Beyond the Simple Stark Ladder .....  | 197 |
| I.6. 7    | Tamm States and the Stark Ladder .....  | 198 |
| I.6. 8    | Superlattices under Electric and Magnetic Fields .....  | 201 |
| I.6. 9    | Applications of the Stark Ladder .....  | 204 |
| I.6.10    | Conclusions .....   | 205 |
|           | References .....  | 206 |
| <br>      |   |     |
| I.7       | <b>Charge Transfer in Indirect GaAs/AlAs Hetero-<br/>structures</b> .....                       | 209 |
|           | <i>J. Feldmann and E. O. Göbel</i>  |     |
| I.7.1     | Introduction .....  | 209 |
| I.7.2     | Charge Transfer in Type II Quantum Wells .....  | 213 |
| I.7.3     | Charge Transfer in Mixed Type I Type II Double Quantum<br>Wells .....                           | 219 |
| I.7.4     | Ultrafast Optical Nonlinearities .....  | 220 |
| I.7.5     | Summary .....   | 224 |
|           | References .....  | 226 |
| <br>      |   |     |
| <b>II</b> | <b>II–VI Quantum Wells</b> .....  | 229 |
| <br>      |   |     |
| II.1      | <b>Physics and Application of II–VI Quantum Confined<br/>Structures</b> .....                   | 231 |
|           | <i>A. V. Nurmikko and R. L. Gunshor</i>   |     |
| II.1.1    | Introduction .....  | 231 |
| II.1.2    | Electronic Confinement and Two Dimensional Electron-Hole<br>Systems in Wide-Gap II–VI QWs ..... | 233 |
| II.1.3    | Stimulated Emission Phenomena in ZnSe-based Quantum<br>Wells .....                              | 242 |
| II.1.4    | (Zn, Cd)Se QWs as the Active Region in LEDs and Diode<br>Lasers .....                           | 251 |
| II.1.5    | Summary .....   | 259 |
|           | References .....  | 260 |

|         |   |     |
|---------|---|-----|
| II.2    | Physics of Excitons in Wide Bandgap II–VI Quantum Wells .....             | 263 |
|         | <i>R. P. Stanley and J. Hegarty</i>                                       |     |
| II.2.1  | Introduction .....  | 263 |
| II.2.2  | Materials and Exciton Properties .....                                    | 266 |
| II.2.3  | Exciton-Phonon Dynamics and Localization .....                            | 269 |
| II.2.4  | Measurement of Exciton Scattering Times.....                              | 279 |
| II.2.5  | Exciton-Photon Interactions .....   | 285 |
| II.2.6  | Conclusion .....  | 287 |
|         | References .....  | 288 |
| II.3    | Polaron Dynamics and Spin Scattering in Magnetic Quantum Structures ..... | 291 |
|         | <i>D. D. Awschalom and N. Samarth</i>                                     |     |
| II.3.1  | Introduction .....  | 291 |
| II.3.2  | Time-resolved Magnetic Spectroscopy: Magnetic Polaron Dynamics .....      | 295 |
| II.3.3  | Carrier Spin Dynamics in DMS Quantum Structures .....                     | 303 |
| II.3.4  | Concluding Remarks.....   | 310 |
|         | References .....  | 310 |
| III     | <b>Quantum Wires</b> .....  | 313 |
| III.1   | Linear and Nonlinear Optical Properties of Quantum Wires .....            | 315 |
|         | <i>H. Lage, D. Heitmann, and R. Cingolani</i>                             |     |
| III.1.1 | Introduction .....  | 315 |
| III.1.2 | Preparation and Structural Analysis .....                                 | 318 |
| III.1.3 | Center-of-Mass Quantization .....   | 319 |
| III.1.4 | One-Dimensional Electron-Hole Plasma .....                                | 325 |
| III.1.5 | Two-Photon Absorption.....  | 329 |
| III.1.6 | Summary .....   | 332 |
|         | References .....  | 332 |

|           |   |     |
|-----------|---|-----|
| III.2     | Optical Fermi Edge Singularities of the<br>One-Dimensional Electron Gas in Semiconductor<br>Quantum Wires ..... | 335 |
|           | <i>J. M. Calleja, J. S. Weiner, A. R. Goñi,<br/>and A. Pinczuk</i>  |     |
| III.2.1   | Introduction .....  | 335 |
| III.2.2   | Experimental Methods and 1D Structure .....   | 339 |
| III.2.3   | Experimental Results .....  | 343 |
| III.2.4   | Theory and Discussion .....   | 354 |
| III.2.5   | Conclusions .....   | 358 |
|           | References .....  | 359 |
| III.3     | Size Scaling and Exciton Coherence-Size in the<br>Optical Nonlinearities of Conjugated Polyenes ....            | 361 |
|           | <i>S. Mukamel and H. X. Wang</i>  |     |
| III.3.1   | Introduction .....  | 361 |
| III.3.2   | Wannier Representation of the PPP Hamiltonian .....   | 364 |
| III.3.3   | Equations of Motion in the Electron-Hole Anharmonic<br>Oscillator Representation .....                          | 367 |
| III.3.4   | Green Function Expression for $\chi^{(3)}$ .....  | 370 |
| III.3.5   | Calculations and Discussion .....   | 373 |
| III.3.6   | Concluding Comments .....   | 389 |
|           | Appendix: Equations of Motion .....   | 391 |
|           | References .....  | 393 |
| <b>IV</b> | <b>Quantum Dots</b> .....   | 397 |
| IV.1      | Femtosecond Nonlinear Optical Response of<br>Magnetically Confined Quantum Well Excitons ....                   | 399 |
|           | <i>J. B. Stark, W. H. Knox, and D. S. Chemla</i>  |     |
| IV.1.1    | Introduction .....  | 399 |
| IV.1.2    | Linear Magneto-Optics .....   | 401 |
| IV.1.3    | 1shh Resonant Excitation .....  | 405 |
| IV.1.4    | Resonant Excitation above 1shh .....  | 426 |
| IV.1.5    | Nonresonant Excitation .....  | 435 |

|          |  |            |
|----------|--|------------|
| IV.1.6   | Conclusions .....  | 443        |
|          | References .....   | 444        |
| IV.2     | Quantum Confinement of Excitons in High-Quality<br>Semiconductor Microcrystallites in Organic Hosts .. | 447        |
|          | <i>K. Misawa, S. Nomura, and T. Kobayashi</i>  |            |
| IV.2.1   | Introduction .....   | 447        |
| IV.2.2   | Problems in Semiconductor Microcrystallites .....  | 449        |
| IV.2.3   | Theoretical Background .....   | 450        |
| IV.2.4   | Preparation Techniques .....   | 461        |
| IV.2.5   | CdS Microcrystallites Synthesized by GDF Method .....  | 467        |
| IV.2.6   | Assignment of Luminescence Bands .....   | 479        |
| IV.2.7   | Discussions .....  | 484        |
| IV.2.8   | Concluding Remarks .....   | 491        |
|          | References .....   | 493        |
| IV.3     | Optical Properties of Quantum Dots Embedded in<br>Glass .....  | 497        |
|          | <i>F. Henneberger and J. Puls</i>  |            |
| IV.3.1   | Introduction .....   | 497        |
| IV.3.2   | Electronic Structure .....   | 498        |
| IV.3.3   | Carrier Dynamics in Quantum Dots .....   | 517        |
| IV.3.4   | Quantum Confined Electro-Absorption .....  | 532        |
| IV.3.5   | Summary .....  | 537        |
