
Understanding Music with AI: Perspectives on Music Cognition

Edited by Mira Balaban, Kemal Ebcioglu, and Otto Laske

Cambridge • Menlo Park • London
The AAAI Press/The MIT Press

Contents

| | |
|--|-------|
| Foreword: A Conversation with Marvin Minsky <i>Marvin Minsky & O. Laske</i> | ix |
| Introduction | xxxix |
| <i>Section One</i> | |
| Two Views on Cognitive Musicology | |
| 1. Artificial Intelligence and Music: A Cornerstone of Cognitive Musicology <i>O. Laske</i> | 3 |
| 2. Beyond Computational Musicology <i>P. Kugel</i> | 30 |
| <i>Section Two</i> | |
| General Problems in Modeling Musical Activities | |
| Overview | 49 |
| 3. Representing Listening Behavior: Problems and Prospects <i>S. W. Smoliar</i> | 53 |
| 4. Symbolic and Sonic Representations of Sound-Object Structures <i>B. Bel</i> | 64 |
| 5. Music Structures: Interleaving the Temporal and Hierarchical Aspects in Music <i>B. Balaban</i> | 110 |
| 6. On Designing a Typed Music Language <i>E. B. Blevis, M. A. Jenkins, J. I. Glasgow</i> | 140 |

| | |
|---|-----|
| 7. Logical Representation and Induction for Computer Assisted Composition <i>F. Courtot</i> | 156 |
| <i>Section Three</i> | |
| Music Composition | |
| Overview | 182 |
| 8. Cybernetic Composer: An Overview <i>C. Ames and M. Domino</i> | 186 |
| 9. Wolfgang: A System Using Emoting Potentials to Manage Musical Design <i>R. D. Riecken</i> | 206 |
| 10. On the Application of Problem Reduction Search to Automated Composition <i>S. C. Marsella and C. F. Schmidt</i> | 238 |
| 11. The Observer Tradition of Knowledge Acquisition <i>O. Laske</i> | 258 |
| <i>Section Four</i> | |
| Analysis | |
| Overview | 290 |
| 12. An Expert System for Harmonizing Chorales in the Style of J. S. Bach <i>K. Ebcioğlu</i> | 294 |
| 13. An Expert System for Harmonic Analysis of Tonal Music <i>H. J. Maxwell</i> | 335 |
| 14. On the Algorithmic Representation of Musical Style <i>D. Cope</i> | 354 |
| <i>Section Five</i> | |
| Performance | |
| Overview | 364 |
| 15. Bol Processor Grammars <i>B. Bel and J. Kippen</i> | 366 |
| 16. A New Approach to Music Through Vision <i>S. Ohteru and S. Hashimoto</i> | 402 |

Section Six
Perception

| | |
|---|-----|
| Overview | 411 |
| 17. On Analyzing and Representing Musical Rhythm <i>C. Linster</i> | 414 |
| 18. On the Perception of Meter <i>B. O. Miller, D. L. Scarborough, J. A. Jones</i> | 428 |
| 19. The Quantization Problem: Traditional and Connectionist Approaches <i>P. Desain & H. Honing</i> | 448 |

Section Seven**Learning and Tutoring**

| | |
|---|-----|
| Overview | 464 |
| 20. An Architecture for an Intelligent Tutoring System <i>M. J. Baker</i> | 466 |
| 21. A Knowledge Intensive Approach to Machine Learning in Tonal Music. <i>G. Widmer</i> | 490 |

| | |
