|------------------|--|----|
| Chapter 1 | Wireless LANs: An Overview | 1 |
| 1.1 | Introduction | 1 |
| 1.2 | Technologies | 2 |
| 1.2.1 | Radio Frequency | 2 |
| 1.2.2 | Infrared | 4 |
| 1.3 | Requirements | 10 |
| 1.3.1 | Reliability | 10 |
| 1.3.2 | Transparency | 10 |
| 1.3.3 | Throughput | 11 |
| 1.3.4 | Security | 11 |
| 1.3.5 | Mobility | 11 |
| 1.3.6 | Network Topology | 12 |
| 1.3.7 | Flexibility | 12 |
| 1.3.8 | Price | 12 |
| 1.3.9 | Safety and Regulations | 12 |
| 1.4 | Network Topologies | 13 |
| 1.4.1 | Ring | 13 |
| 1.4.2 | Bus | 15 |
| 1.4.3 | Star | 16 |
| 1.5 | Standardization Efforts | 17 |
| 1.6 | Going Out | 18 |
| 1.7 | Conclusions | 19 |
| | References | 20 |
| Chapter 2 | Optoelectronic Devices And Circuits | 23 |
| 2.1 | Introduction | 23 |
| 2.2 | Optical Sources | 24 |
| 2.2.1 | External Quantum Efficiency | 25 |
| 2.2.2 | Silicon Photodetectors | 27 |
| 2.3 | LED's Array | 29 |
| 2.4 | LED Drivers | 31 |

| | |
|--|-----------|
| 2.5 Photodiodes | 39 |
| 2.6 Optical Preamplifier Circuits | 40 |
| 2.7 Conclusions | 42 |
| References | 43 |
| Chapter 3 Design of Optical Systems For IR Wireless Links | 45 |
| 3.1 Introduction | 45 |
| 3.2 Statement of the Problem | 50 |
| 3.3 Relationship Between the Concentration and the Angular Spread | 53 |
| 3.4 Combination of Aspheric Nonimaging Lenses With the FLC | 55 |
| 3.5 Three-Dimensional Ray Tracing of the RR Concentrators | 63 |
| 3.6 The XR Concentrator | 67 |
| 3.7 Three-Dimensional Ray Tracing of the XR Concentrator | 70 |
| 3.8 The RXI Concentrator | 70 |
| 3.9 Comparison of the XR and the RXI Concentrator With Other Nonimaging Concentrators and With Image-Forming Systems | 72 |
| 3.10 Summary | 76 |
| References | 76 |
| Chapter 4 Codification And Modulation Techniques For IR Wireless LANs | 79 |
| 4.1 Introduction | 79 |
| 4.2 Medium Access Methods for LANs | 80 |
| 4.2.1 Carrier Sense Multiple Access with Collision Detection (CSMA/CD) | 80 |
| 4.2.2 Token Bus Multiple Access | 81 |
| 4.2.3 Token Ring Multiple Access | 81 |
| 4.3 Noise and Interference Due to Background Light in Wireless IR Transmission | 82 |
| 4.3.1 Noise Due to Ambient Light | 82 |
| 4.3.2 Interference Caused by Artificial Ambient Light Sources | 84 |
| 4.3.3 Noise and Interference Reduction | 85 |
| 4.4 Signal Level on IR Wireless Links | 86 |
| 4.4.1 Example | 89 |
| 4.5 Modulation and Codification Techniques for IR WLANs | 90 |
| 4.5.1 On-Off Keying | 90 |
| 4.5.2 Multisubcarrier Modulation | 93 |
| 4.5.3 Frequency Shift Keying (FSK) | 94 |
| 4.6 Summary | 97 |
| References | 97 |
| Chapter 5 Long-Haul Atmospheric Infrared Links | 99 |
| 5.1 Introduction | 99 |

| | | |
|---|---|-----|
| 5.2 | The Atmospheric Channel | 100 |
| 5.3 | Atmospheric Attenuation | 101 |
| 5.3.1 | Gas Absorption | 101 |
| 5.3.2 | Molecular Scattering | 104 |
| 5.3.3 | Aerosol Extinction | 105 |
| 5.4 | Turbulence Distortion | 108 |
| 5.4.1 | Beam Spread and Beam Wandering | 110 |
| 5.4.2 | Angle-of-Arrival Fluctuations and Focal Spot Broadening | 111 |
| 5.4.3 | Power Scintillation | 113 |
| 5.5 | Steady Power Budget in Atmospheric Optical Links | 115 |
| 5.5.1 | Telescope Losses | 117 |
| 5.5.2 | Propagation Losses (L_{prop}) | 117 |
| 5.5.3 | Mispointing Losses (L_{point}) | 118 |
| 5.5.4 | Atmospheric Losses (L_{atm}) | 119 |
| 5.5.5 | Collection Losses (L_{col}) | 119 |
| 5.6 | Statistical Budget for Atmospheric Optical Links | 119 |
| 5.6.1 | Probability Density Function of Losses Due to Beam Wandering | 121 |
| 5.6.2 | Probability Density Function of Losses Due to Angle-of-Arrival Fluctuations | 122 |
| 5.6.3 | Probability Density Function of Scintillation Losses | 122 |
| 5.7 | Conclusions | 124 |
| | References | 125 |
| Chapter 6 Properties of Wireless RF Channels | | 129 |
| 6.1 | Propagation Models | 129 |
| 6.1.1 | Definition of a Mobile Channel Model | 129 |
| 6.1.2 | Propagation Aspects | 129 |
| 6.1.3 | Modeling Requirements | 131 |
| 6.1.4 | Scope of Modeling | 131 |
| 6.1.5 | Channel Parameters | 132 |
| 6.2 | Indoor Model | 132 |
| 6.2.1 | Path loss | 132 |
| 6.2.2 | Location: Tx and Rx On the Same Floor | 133 |
| 6.2.3 | Location: Tx At a Different Floor From the Rx—Both Inside the Same Building | 136 |
| 6.2.4 | Location: Tx Outside the Building, Rx Inside the Building | 137 |
| 6.2.5 | Summary of Models | 144 |
| 6.3 | Indoor Model for Impulse Response | 148 |
| 6.3.1 | Channel Model | 148 |
| 6.3.2 | Impulse Response Parameters | 149 |
| 6.3.3 | Measurements Locations | 151 |

| | | |
|---|--|-----|
| 6.3.4 | Transversal Filter Representation: Tap Setting | 153 |
| 6.4 | Annexes: Building Description | 155 |
| 6.4.1 | British Telecom | 155 |
| 6.4.2 | Shopping Center: Tower Ramparts, Ipswich | 157 |
| 6.4.3 | Railway Station: Euston Station, London | 157 |
| 6.4.4 | Office Block | 159 |
| 6.5 | Conclusions | 161 |
| | References | 163 |
| Chapter 7 Antenna Systems For Wireless LANs | | 165 |
| 7.1 | Introduction | 165 |
| 7.2 | Simple Antennas | 167 |
| 7.2.1 | Wire Antennas | 167 |
| 7.2.2 | Slot Antennas | 170 |
| 7.2.3 | Microstrip Antennas | 172 |
| 7.3 | Directional Antennas | 175 |
| 7.4 | Diversity Reception | 179 |
| 7.4.1 | General | 179 |
| 7.4.2 | Combining Techniques | 181 |
| 7.4.3 | Examples of Diversity Antennas | 184 |
| 7.5 | Influence of the Indoor Environment to the Antenna Performance | 191 |
| 7.5.1 | Safety Aspects | 191 |
| 7.5.2 | Statistical Model | 192 |
| 7.6 | Conclusions | 194 |
| | References | 195 |
| Chapter 8 Coding And Modulation Techniques For RF LANs | | 197 |
| 8.1 | Introduction | 197 |
| 8.2 | Digital Modulation Techniques | 198 |
| 8.2.1 | Phase Shift Keying | 198 |
| 8.2.2 | Quadrature Phase Shift Keying | 200 |
| 8.2.3 | Multilevel PSK Systems | 202 |
| 8.2.4 | Frequency Shift Keying | 202 |
| 8.2.5 | The Spectral Characteristics of the Modulation Schemes | 205 |
| 8.2.6 | Error Rates | 206 |
| 8.2.7 | Conclusions | 207 |
| 8.3 | Spread-Spectrum Modulation | 208 |
| 8.3.1 | Direct Sequence Spread Spectrum | 208 |
| 8.3.2 | Frequency Hopped Spread Spectrum | 209 |
| 8.4 | Channel Access Schemes | 210 |
| 8.4.1 | Frequency Division Multiple Access | 210 |
| 8.4.2 | Time Division Multiple Access | 211 |
| 8.4.3 | Code Division Multiple Access | 212 |

| | | |
|-------|--|-----|
| 8.5 | Equalization | 212 |
| 8.5.1 | Linear Transversal Equalizers | 213 |
| 8.5.2 | Decision Feedback Equalizers | 214 |
| 8.5.3 | Maximum Likelihood Sequence Estimators | 215 |
| 8.6 | Coding | 215 |
| 8.6.1 | Block Coding | 216 |
| 8.6.2 | Convolutional Codes | 216 |
| 8.6.3 | Code Interleaving and Concatenated Codes | 217 |
| 8.7 | Synchronization | 218 |
| 8.7.1 | Carrier Recovery | 219 |
| 8.7.2 | Bit Synchronization | 220 |
| 8.8 | Summary | 221 |
| | References | 222 |
| | Appendix Safety and Regulations | 225 |
| A.1 | Introduction | 225 |
| A.2 | Effects of Optical Radiation on the Eye | 226 |
| A.2.1 | Injury to the Eye | 227 |
| A.2.2 | Pupil Size | 228 |
| A.2.3 | Eye Optics | 228 |
| A.3 | Safety Standards for Fiber Optics | 230 |
| A.4 | Safety Standards for Nonlaser Sources | 230 |
| A.5 | Maximum Permissible Exposure (MPE) | 231 |
| A.6 | Minimum Safe Distance | 232 |
| A.7 | Risks From IRED | 233 |
| A.8 | Laser Radiation Standards | 236 |
