Contents

1 Introduction 1
M.C. GOWER and D. PROCH
References 7

2 Nonlinear Optical Phase Conjugation by Four-Wave Mixing in Kerr Media (With 18 Figures) 8
R. SAXENA and P. YEH

2.1 Introduction 8
2.2 Phase-Conjugate Electromagnetic Waves 9
2.3 Phase Conjugation by Externally Pumped DFWM 11
2.3.1 Coupled Wave Equations 11
2.3.2 Analytic Solutions with Negligible Absorption and Undepleted Pumps 15
2.3.2.1 Equal Pump Intensities 16
2.3.2.2 Unequal Pump Intensities 19
2.3.3 Analytic Solutions with Pump Depletion but Negligible Absorption 21
2.3.3.1 The Transmission Grating 21
2.3.3.2 The Reflection Grating 24
2.4 Mutually Pumped Phase Conjugation (MPPC) in Electrostrictive Kerr Media 25
2.4.1 Theoretical Formulation 26
2.4.2 Numerical Results 30
2.5 Summary 35
References 35

3 Brillouin-Induced Four-Wave Mixing (With 11 Figures) 38
K.D. RIDLEY and A.M. SCOTT

3.1 Introduction 38
3.2 Theory 41
3.3 Relative Scattering Efficiency and Noise 50
3.4 Pump Depletion and Computer Modelling 53
3.5 Experiments 56
3.5.1 The Instability Threshold and Bandwidth 60
3.5.2 Scattering Efficiency and Noise 62

3.5.3 The Conjugate Beam Quality 63
3.5.4 Beam Tilting Effects 65
3.5.5 Pump Beam Coupling 66
3.5.6 Self-Oscillation 66
3.5.7 Self-Pumped Four-Wave Mixing 67
3.5.8 Chaos 68
3.6 Applications 68
3.6.1 Imaging 69
3.6.2 Beam Steering 70
3.7 Conclusion 70
References 71

4 Phase Conjugation by SMBS in Optical Fibers (With 10 Figures) 74
E.A. KUZIN, M.P. PETROV, and A.A. FOTIADI

4.1 Introduction 74
4.2 Phase Conjugation by SMBS in Fibers: Theoretical Principles 74
4.3 Phase Conjugation in Fibers: Experimental Results 79
4.4 Specific Features of the Stokes Wave Dynamics During SMBS in Optical Fibers 87
4.5 Conclusion 95
References 95

5 Spectroscopy and Phase Conjugation by Resonant Four-Wave Mixing (With 7 Figures) 97
M. DUCLOY and D. BLOCH

5.1 Introduction 97
5.2 Resonant FWM and Holographic Interpretation 98
5.3 Choice of the NL Medium and Diagnostics Applications 99
5.4 Properties of Degenerate FWM in Resonant Gas Media 101
5.4.1 General Considerations 101
5.4.2 Pump-Probe Angular Separation and Thermal Motion ... 102
5.4.3 Saturation Effects 103
5.4.4 Polarization Properties and Collisional Effects 106
5.5 High-Order Nonlinearities and Degenerate Multiwave Mixing .. 107
5.6 Multifrequency Wave Mixing 109
5.7 Heterodyne Nonlinear Spectroscopy and FWM 112
5.8 Some Applications of Resonant FWM to Optical Systems 114
References 116

6 Two-Wave Mixing Processes in Resonant Systems (With 19 Figures) 120
C.J. GAETA, J.F. LAM, and D.M. PEPPER

6.1 Introduction 120

6.2 Physics of Resonant Two-Wave Mixing 121
6.2.1 Dynamic Stark Effect 121
6.2.2 Pressure-Induced Effects 127
6.2.3 Light-Induced Drift and Oscillations 131
6.3 Applications 136
6.3.1 Resonators 136
6.3.2 Self-Pumped PCMs 137
6.3.3 Retromodulators 144
6.3.4 Beam Clean-Up and Combining 150
6.4 Conclusions 151
References 152

7 Models of the Photorefractive Effect (With 29 Figures) 154
A.K. POWELL and T.J. HALL

7.1 Introduction 154
7.2 The Physics of the Photorefractive Effect 156
7.3 The Band Transport Model 160
7.4 Main Properties of the Band Transport Model 164
7.5 Space-Charge Field Enhancement Techniques 171
7.5.1 D.C. Fields 172
7.5.2 A.C. Fields 174
7.5.3 Dynamic Response 181
7.6 Effects at Large Depths of Modulation 183
7.7 Electron and Hole Effects 189
7.7.1 No Applied Field 194
7.7.2 Applied D.C. Field 196
7.7.3 Applied A.C. Field 197
7.8 Further Developments in Photorefraction 199
References 200

8 Photorefractive Materials (With 12 Figures) 202
C. MEDRANO and P. GÜNTER

8.1 Introduction 202
8.2 Photorefractive Effects in Electrooptic Crystals 203
8.2.1 The Generation and Transport of Charge Carriers 203
8.2.2 Band Transport Equations: The Kukhtarev Model 205
8.2.3 Photoinduced Space-Charge Fields 207
8.2.3.1 Steady-State Approximation 209
8.2.4 Transient Gratings and Time Resolved Experiments 212
8.2.5 Extensions of the Kukhtarev Model 213
8.2.5.1 Electron-Hole Competition: One Donor Level 213
8.2.5.2 Electron-Hole Competition: Two Donor Levels 217
8.2.5.3 Other Charge Carriers 218

8.2.6 Wave Interactions 219
8.2.6.1 Two-Wave Mixing 219
8.2.6.2 Four-Wave Mixing 221
8.2.6.3 Self-Pumped Optical Phase Conjugation 224
8.2.7 Requirements of Photorefractive Materials 226
8.3 Photorefractive Ferroelectric Materials 229
8.4 Photorefractive Sillenites 230
8.5 Other Materials 231
8.6 Photorefractive Semiconductors 231
8.7 Photorefractive Organic Materials 232
8.8 Conclusions 234
References 235

9 Self-Pumped Phase-Conjugate Mirrors and Other Oscillators (With 11 Figures) 238
M. CRONIN-GOLOMB

9.1 Introduction 238
9.2 The Photorefractive Gain Mechanism 238
9.3 The Coupled Wave Equations 241
9.4 Unidirectional Ring Resonator 243
9.5 Photorefractive Phase-Conjugate Mirrors 246
9.5.1 Photorefractive Phase Conjugation in the Undepleted Pumps Approximation 247
9.5.2 Solution of the Transmission Grating with Depleted Pumps 250
9.5.3 Externally Pumped Phase-Conjugate Resonators 255
9.5.4 Self-Pumped Phase-Conjugate Mirrors 256
9.5.4.1 The Linear Self-Pumped Phase Conjugate Mirror 257
9.5.4.2 The Double Phase Conjugate Mirror 257
9.5.4.3 The Semilinear Self-Pumped Phase Conjugate Mirror 261
9.5.4.4 The Ring Self-Pumped Phase Conjugator 261
9.5.4.5 The Cat Mirror 263
9.6 Conclusion 265
References 265

10 Phase-Conjugate Resonators (With 10 Figures) 267
P.A. BÉLANGER and C. PARÉ

10.1 Introduction 267
10.2 Gaussian Mode Analysis 268
10.3 The Phase-Conjugate Resonator 270
10.3.1 Ideal Resonator without Apertures 270
10.3.2 The Phase-Conjugate Resonator with Soft Apertures ... 270

10.3.3 Minimum Loss Property of PCRs 272
10.3.4 Diffractional Analysis of PCRs 273
10.3.5 Minimum Diffraction Loss Property of PCRs [10.24] .. 276
10.3.6 Miscellaneous 278
10.3.7 Summary 279
10.4 Mode-Locking of a Phase-Conjugate Laser 280
10.5 Nonlinear Effects in a Phase-Conjugate Laser 283
