Table of contents

Preface	10
1	
Introduction	12
2	
Classification of polymers	14
2.1 Classification by origin	14
2.1.1 Synthetic organic polymers	14
2.1.2 Biopolymers	14
2.1.3 Semi-synthetic polymers	15
2.1.4 Inorganic polymers	15
2.2 Classification by chain structure	16
2.3 Classification by thermal behaviour	18
2.3.1 Thermoplastics	18
2.3.2 Thermosets	18
2.4 Classification by monomer composition	19
2.5 Classification by polymerization mechanism	19
2.6 Classification by chain configurations	22
2.6.1 Monomer orientation	22
2.6.2 Geometric or <i>cis-trans</i> -isomerism	23
2.6.3 Stereoisomerism or tacticity	23
2.7 Classification by application	25
2.8 Problems	28

3

Polymerizability	29
3.1 Functionality of monomers	29
3.2 Reactivity of monomers	31
3.3 Purity of monomers	31
3.4 Thermodynamics of polymerization	32
3.5 Problems	35

4

Reactivity of polymer molecules	36
4.1 Flory's principle of equal reactivity	36
4.2 Influence of viscosity on reactivity	37
4.3 The functional group approach	39
4.4 Problems	40

5

Condensation polymerization	41
5.1 Extent of reaction and average degree of polymerization	41
5.2 Kinetics of condensation polymerization	44
5.3 Limits to the degree of polymerization	45
5.3.1 Stoichiometric imbalance and impurity	45
5.3.2 Polycondensation equilibrium	46
5.3.3 Ring formation	47
5.4 Molar mass distribution in linear condensation polymers	48
5.5 Important condensation polymers	52
5.5.1 Polyesters	52
5.5.2 Polyamides	55
5.5.3 Polyurethanes	57
5.5.4 Epoxy resins	59
5.5.5 Phenol-formaldehyde resins	60
5.5.6 Amino resins	61
5.5.7 Some special and new condensation polymers	62
5.6 Problems	64

6

Addition polymerization	66
6.1 Classification	66
6.2 Radical addition polymerization	67
6.3 Kinetics of radical addition polymerization	71
6.4 Cationic polymerization	76
6.5 Anionic polymerization	79

6.6 Coordination polymerization	81
6.6.1 Ziegler-Natta polymerization	82
6.6.2 Ring opening metathesis polymerization	85
6.7 Problems	86
7	
Copolymerization	87
7.1 The copolymer equation	87
7.2 Graft copolymers	91
7.3 Block copolymers	93
7.4 Problems	95
8	
Polymerization techniques	96
8.1 Polymerization systems	96
8.1.1 Bulk polymerization	96
8.1.2 Solution polymerization	97
8.1.3 Suspension polymerization	98
8.1.4 Emulsion polymerization	98
8.2 Polymerization reactors	101
8.2.1 Condensation polymerization	102
8.2.2 Radical addition polymerization	104
8.3 Problems	104
9	
Inorganic polymers	106
9.1 Classification by chemical structure	106
9.2 Some important 'inorganic' polymerization reactions	109
9.2.1 Condensation polymerization	109
9.2.2 Addition polymerization	111
9.2.3 Ring opening polymerization	111
9.3 Problems	112
10	
Polymer solutions	113
10.1 Solubility of polymers	113
10.2 Shape of long chain molecules in solution	114
10.3 Viscosity of polymer solutions	118
10.4 Thermodynamics of polymer solutions	120
10.5 Problems	123

11

Measurements of molar masses and molar mass distribution	124
11.1 Determination of average molar masses	124
11.1.1 End group analysis	124
11.1.2 Membrane osmometry	125
11.1.3 Vapour pressure osmometry	128
11.1.4 Light scattering	129
11.1.5 Viscometry on dilute polymer solutions	133
11.2 Determination of the molar mass distribution	135
11.2.1 Introduction	135
11.2.2 Turbidimetric titration	137
11.2.3 Fractionation	139
11.2.4 Gel permeation chromatography	140
11.3 Problems	142

12

Physical properties	144
12.1 Thermal behaviour of polymers	144
12.1.1 Glass transition	144
12.1.2 Crystallization	147
12.1.3 Relation between structure and thermal properties	150
12.2 Mechanical properties	154
12.2.1 Influence of temperature on modulus	154
12.2.2 Stress-strain behaviour	157
12.2.3 Time-dependence of mechanical behaviour	160
12.3 Viscoelasticity	163
12.3.1 Models	163
12.3.2 Stress relaxation	166
12.3.3 Creep	168
12.4 Problems	170

13

Polymer processing	172
13.1 Introduction	172
13.2 Additives	173
13.3 Compression moulding	174
13.4 Calendering	174
13.5 Extrusion	175

13.6 Fibre spinning	178
13.6.1 Melt spinning	178
13.6.2 Dry spinning	179
13.6.3 Wet spinning	179
13.7 Injection moulding	180
13.8 Problems	182
Appendix A: List of important linear polymers	183
Appendix B: Bibliography	184
Index	186
