TABLE OF CONTENTS

	Page
EDITOR'S PREFACE	v
PREFACE	ix
FOREWORD BY P. A. REBINDER	xi
NOMENCLATURE	xiii
CHAPTER 1 - STRUCTURE AND PHYSICAL PROPERTIES OF POLYMERS	1
1.1 Physical States of Polymers	1
1.2 Physical Properties of Macromolecules and Polymer Structure	2
1.3 Special Characteristics of Thermal Motion in Polymers	4
1.4 The Rubbery State in Polymers	7
1.5 Relaxation Properties of Polymers	8
1.6 The Principle of Time-Temperature Equivalence	11
1.7 Polymer Glass-Transition Processes	16
1.8 Cold Flow of Polymers	19
1.9 Prolonged Strength (Fatigue) of Polymers	21
References	27
CHAPTER 2 - FRICTION OF METALS	30
2.1 Basic Characteristics of Friction	30
2.2 The Real Contact Area	34
2.3 Theories of Solid Friction	38
2.4 Friction Force and Friction Coefficient	47
Effect of stationary contact time	47
Effect of sliding velocity	49
Effect of free, normally oriented contact vibrations	53
Effect of temperature	62
References	63
CHAPTER 3 - POLYMER FRICTION IN THE GLASSY AND CRYSTALLINE STATES	67
3.1 Nature of Rigid-Polymer Friction	67
3.2 Real Area of Contact	74
3.3 Friction Force and Coefficient of Friction	80
Effect of normal load (law of friction)	80
Effects of contact time, sliding velocity, and temperature	86
Effects of other factors	100
3.4 Selection of Friction Pairs	105
References	108

	Page
CHAPTER 4 - POLYMER FRICTION IN THE RUBBERY STATE	111
4.1 Nature and Mechanism of Elastomer Friction	113
Molecular-kinetic theory of friction	113
Effect of temperature and sliding velocity	134
Molecular-mechanical theories of friction	138
4.2 Real Area of Contact	145
Effect of contact time and sliding velocity	145
The effect of normal load	150
Effect of temperature	152
4.3 Friction Force	155
Effect of normal load	155
Effect of contact time and the rate of application of the tangential force	166
Effect of the nature of the polymer and the characteristics of the surface	175
Effect of internal stress in a polymer	177
Selection of friction pairs	180
References	185
CHAPTER 5 - SLIDING AND FRICTION OF POLYMERS IN THE VISCOUS STATE	187
5.1 Mechanisms of Boundary Sliding in Viscous and Dispersed Systems	187
5.2 The Theory of Boundary Sliding	190
5.3 Some Experimental Results and Basic Principles	194
Effect of normal load	194
Effect of sliding velocity	198
5.4 The Significance of the Effect of Boundary Sliding	200
References	201
CHAPTER 6 - WEAR OF POLYMERS	202
6.1 Relationship Between Friction and Wear	203
6.2 Fatigue Wear	205
Theoretical studies	206
Basic experimental results	213
Effect of pressure	215
Effect of friction coefficient	218
Effect of temperature	221
Effect of sliding velocity	227
Effect of polymer physico-mechanical properties and composition	229
Effect of surface friction. Transition to abrasive wear	235
6.3 Abrasive Wear	238
General principles of abrasive wear	239
Effect of external factors	243
6.4 Special Types of Wear for Friction on Smooth Hard Surfaces	248
6.5 Practical Recommendations and Prospects for the Use of Polymers at Friction Contacts	253
References	257

CHAPTER 7 - INSTRUMENTS AND METHODS FOR FRICTION AND WEAR RESEARCH	261
7.1 General Information	261
7.2 Methods for Measuring External Parameters of Friction	263
Measurement of friction force	264
Measurement of temperature	267
Measurement of sliding velocity	268
Measurement of load	269
7.3 General-Purpose Instruments and Machines	269
Reciprocal-motion instruments	269
Rotary motion instruments	279
7.4 Special-Purpose Instruments and Machines	284
Instruments for measuring the area of real contact	285
Instruments for measuring polymer friction force at high pressure	288
Vacuum tribometers	293
Instruments for special uses	298
References	302
AUTHOR INDEX	305
SUBJECT INDEX	313
