Contents

<i>Preface</i>	V
<i>Contents</i>	VII
Part 1: Materials physics and chemistry	
Introduction	3
<i>K. Suzuki</i>	
Short-range structure	
Static structure of amorphous solids and liquids by pulsed neutron diffraction	4
<i>M. Misawa and T. Fukunaga</i>	
Characterization of the environmental structure of disordered materials using anomalous X-ray scattering	14
<i>E. Matsubara and Y. Waseda</i>	
Dynamical structure	
Characterization of the medium-range dynamic structure of palladium-metalloid amorphous alloys by pulsed-neutron inelastic scattering	22
<i>K. Suzuki and K. Shibata</i>	
Structural fluctuation in microclusters	29
<i>M. Doyama, H. Matsui, H. Matsuaoka, T. Uchida and T. Hirokawa</i>	
Medium-range structure	
Medium-range atomic ordering in amorphous alloys studied by high-resolution electron microscopy	39
<i>Y. Hirotsu and K. Anazawa</i>	
Medium-range structure and relaxation in chalcogenide glasses investigated by Raman scattering ...	47
<i>K. Murase, K. Inoue and O. Matsuda</i>	
Quasicrystals	
Topological disorder in medium-range structure of amorphous solids and quasicrystals	59
<i>T. Ninomiya</i>	
Structure and properties of quasicrystals	65
<i>S. Takeuchi</i>	
Electronic and magnetic properties	
A unified picture for electron scattering mechanisms in amorphous alloys and quasicrystals	74
<i>U. Mizutani</i>	

Electronic states and chemical bonds in amorphous alloys	90
<i>K. Tanaka</i>	
Current topics in the magnetism of amorphous transition metals and alloys	98
<i>K. Fukamichi</i>	
 Part 2: Amorphous materials	
Introduction	111
<i>T. Masumoto</i>	
Processing	
Solid-state amorphization by hydrogen absorption	112
<i>K. Aoki and T. Masumoto</i>	
Solid-state amorphization by irradiation	120
<i>H. Mori</i>	
Solid-state amorphization: interdiffusion of multilayers	127
<i>M. Matsuura</i>	
Amorphization by chemical reduction	135
<i>J. Saida</i>	
Amorphous plating	137
<i>T. Watanabe</i>	
Atomized powders and consolidation	150
<i>A. Inoue and T. Masumoto</i>	
New amorphous alloys and properties	
Light-metal based amorphous alloys	159
<i>A. Inoue and T. Masumoto</i>	
Chemical properties — corrosion, electrochemistry and catalysis	167
<i>K. Hashimoto</i>	
Nanocrystalline alloys produced by crystallization of amorphous alloys	177
<i>A. Inoue and T. Masumoto</i>	
Applications	
Application of amorphous superconductors to liquid-helium level indicators	185
<i>U. Mizutani, T. Oka, A. Inoue and T. Masumoto</i>	
Mechanical application	191
<i>M. Hagiwara</i>	
 Part 3: Progress in magnetic material and applications	
Introduction	199
<i>Y. Sakurai</i>	
Materials and magnetic properties	
Amorphous ribbon	201
<i>M. Yagi</i>	
Amorphous wire	206
<i>I. Ogasawara and S. Ueno</i>	
Soft magnetic film	211
<i>Y. Shimada</i>	

Amorphous RE–TM film	216
<i>S. Uchiyama and T. Kobayashi</i>	
Garnet film	221
<i>A. Itoh</i>	
Giant magnetic moment of epitaxially grown Fe ₁₆ N ₂ films	225
<i>Y. Sugita, M. Komuro and K. Mitsuoka</i>	
Oxide magnetic film	227
<i>M. Abe</i>	
Super fine crystal material	234
<i>Y. Yoshizawa and K. Yamauchi</i>	
Hard magnetic materials	239
<i>A. Higuchi</i>	
Artificial superstructure films	244
<i>T. Shinjo, K. Mibu and N. Hosoi</i>	
Ion-implanted film	249
<i>Y. Gondō</i>	
Applications	
Magneto-optic memory	253
<i>S. Hashimoto and K. Aso</i>	
Perpendicular magnetic rigid disks	258
<i>T. Ozeki, T. Sakata and S. Yura</i>	
Magnetic heads	265
<i>H. Sakakima</i>	
Amorphous transformers	272
<i>T. Sato</i>	
Micro-magnetic devices	278
<i>K. Shirae</i>	
Sensors	284
<i>K. Mohri</i>	
Power devices	294
<i>T. Chou and Y. Narumiya</i>	

Part 4: Physics and technology of amorphous semiconductors

Introduction	301
<i>Y. Hamakawa</i>	
Structure and related knowledges	
NMR studies of a-Si:H	312
<i>S. Hayashi</i>	
ESR characterization	318
<i>T. Shimizu</i>	
ENDOR and ODMR characterization	323
<i>K. Morigaki</i>	
Electronic and optical properties	
First principles of the molecular-dynamics study of light-induced defect formation in a-Si:H	329
<i>F. Yonezawa</i>	

Implications of electroabsorption spectra for band edge parameters in amorphous silicon.....	334
<i>H. Okamoto</i>	
Dispersive photoresponse in phosphorus-doped hydrogenated amorphous silicon	339
<i>H. Oheda</i>	
Film deposition technologies	
Mechanism of plasma chemical-vapor deposition of hydrogenated amorphous silicon.....	345
<i>A. Matsuda</i>	
ECR CVD	351
<i>Y. Hattori</i>	
Devices physics and superlattices	
Delta doping in a-Si devices	357
<i>M. Konagai</i>	
Ultrathin film and superlattices	363
<i>K. Hattori</i>	
Bandgap profiling of stacked solar cells	369
<i>Y. Nakata</i>	
Light-induced effects in a-Si solar cells	377
<i>H. Yamagishi and Y. Tawada</i>	
Devices	
Amorphous silicon solar cells	384
<i>Y. Kuwano</i>	
a-Si stacked solar cells	391
<i>K. Sato</i>	
Large-area a-Si solar cell production	395
<i>H. Sakai and Y. Ichikawa</i>	
a-Si TFT and applications	403
<i>S. Tomiyama</i>	
a-Si photoreceptor	410
<i>S. Shirai and I. Kajita</i>	
Light-emitting device	415
<i>M. Yoshimi</i>	
HARPICON: a highly sensitive TV pickup tube with avalanche multiplication mode.....	421
<i>E. Maruyama</i>	
<i>Subject Index</i>	425
