Preface *xi*
List of Symbols *xiii*

1	Introduction	<i>1</i>
2	Experimental Methods	<i>5</i>
2.1	Surface Forces Apparatus	<i>6</i>
2.1.1	Mica	<i>8</i>
2.1.2	Multiple Beam Interferometry	<i>9</i>
2.1.3	Friction Force Measurements	<i>12</i>
2.1.4	Surface Modification	<i>13</i>
2.2	Atomic Force Microscope	<i>13</i>
2.2.1	Force Measurements with the AFM	<i>14</i>
2.2.2	AFM Cantilevers	<i>16</i>
2.2.3	Calibration of the Spring Constant	<i>18</i>
2.2.4	Microfabricated Tips and Colloidal Probes	<i>21</i>
2.2.5	Friction Forces	<i>22</i>
2.2.6	Force Maps	<i>24</i>
2.2.7	Dynamic Modes	<i>25</i>
2.3	Optical Tweezers	<i>26</i>
2.3.1	Calibration	<i>30</i>
2.3.2	Multiple Traps	<i>32</i>
2.4	Total Internal Reflection Microscopy	<i>33</i>
2.5	Magnetic Tweezers	<i>36</i>
2.6	Summary	<i>40</i>
2.7	Exercises	<i>41</i>
3	van der Waals Forces	<i>43</i>
3.1	van der Waals Forces between Molecules	<i>43</i>
3.1.1	Coulomb Interaction	<i>43</i>
3.1.2	Monopole–Dipole Interaction	<i>44</i>
3.1.3	Dipole–Dipole Interaction	<i>47</i>
3.1.3.1	Keesom Interaction	<i>48</i>

3.1.3.2	Debye Interaction	49
3.1.3.3	London Dispersion Interaction	50
3.2	The van der Waals Force between Macroscopic Solids	52
3.2.1	Microscopic or Hamaker Approach	52
3.2.2	Macroscopic Calculation: Lifshitz Theory	57
3.2.3	Hamaker Constants	64
3.2.3.1	Calculation of Hamaker Constants	64
3.2.3.2	Combining Relations for Hamaker Constants	70
3.2.3.3	Table of Hamaker Constants	71
3.2.4	Surface Energy and Hamaker Constant	71
3.3	The Derjaguin Approximation	78
3.3.1	The General Equation	78
3.3.2	van der Waals Forces for Different Geometries	81
3.4	Retarded van der Waals Forces	82
3.4.1	Screening of van der Waals Forces in Electrolytes	84
3.5	Measurement of van der Waals Forces	85
3.6	The Casimir Force	88
3.6.1	Casimir Forces between Metal Surfaces	88
3.6.1.1	The Effect of Temperature	90
3.6.1.2	Finite Conductivity of Real Metals	90
3.6.1.3	Surface Roughness	91
3.6.1.4	Casimir Force for Nontrivial Geometries	92
3.6.2	Measurements of Casimir Forces	92
3.6.3	Critical Casimir Force	94
3.7	Summary	97
3.8	Exercises	98
4	Electrostatic Double-Layer Forces	99
4.1	The Electric Double Layer	99
4.2	Poisson–Boltzmann Theory of the Diffuse Double Layer	100
4.2.1	The Poisson–Boltzmann Equation	100
4.2.2	Planar Surfaces	101
4.2.3	The Full One-Dimensional Case	104
4.2.4	The Electric Double Layer around a Sphere	106
4.2.5	The Grahame Equation	107
4.2.6	Capacity of the Diffuse Electric Double Layer	108
4.3	Beyond Poisson–Boltzmann Theory	109
4.3.1	Limitations of the Poisson–Boltzmann Theory	109
4.3.2	The Stern Layer	111
4.4	The Gibbs Energy of the Electric Double Layer	112
4.5	The Electrostatic Double-Layer Force	114
4.5.1	General Equations	115
4.5.2	Electrostatic Interaction between Two Identical Surfaces	117
4.5.3	Electrostatic Interaction between Different Surfaces	118
4.6	The DLVO Theory	120

4.7	Electrostatic Forces in Nonpolar Media	123
4.8	Summary	128
4.9	Exercises	129
5	Capillary Forces	131
5.1	Equation of Young and Laplace	132
5.2	Kelvin Equation	135
5.2.1	Capillary Condensation	137
5.3	Young's Equation	138
5.4	Capillary Forces Calculated with the Circular Approximation	139
5.4.1	Capillary Force between a Sphere and a Plane	140
5.4.2	Two Different Spheres	144
5.4.3	Other Geometries	146
5.4.4	Assumptions and Limits	148
5.5	Influence of Roughness	150
5.6	Kinetics of Capillary Bridge Formation and Rupture	152
5.7	Capillary Forces in Immiscible Liquid Mixtures and Other Systems	155
5.8	Normal Forces Acting on a Particle at a Liquid Interface	157
5.9	Lateral Forces between Particles at a Fluid Interface	160
5.10	Summary	164
5.11	Exercises	165
6	Hydrodynamic Forces	167
6.1	Fundamentals of Hydrodynamics	167
6.1.1	The Navier–Stokes Equation	167
6.1.2	Laminar and Turbulent Flow	170
6.1.3	Creeping Flow	171
6.2	Hydrodynamic Force between a Solid Sphere and a Plate	172
6.2.1	Force in Normal Direction	172
6.2.2	Force on a Sphere in Contact with a Plate in Linear Shear Flow	178
6.2.3	Motion of a Sphere Parallel to a Wall	179
6.3	Hydrodynamic Boundary Condition	182
6.4	Gibbs Adsorption Isotherm	183
6.5	Hydrodynamic Forces between Fluid Boundaries	185
6.6	Summary	189
6.7	Exercises	190
7	Interfacial Forces between Fluid Interfaces and across Thin Films	191
7.1	Overview	191
7.2	The Disjoining Pressure	193
7.3	Drainage	194
7.3.1	Vertical Foam Films	194
7.3.2	Horizontal Foam Films	197

7.4	Thin Film Balance	199
7.5	Interfacial Forces across Foam and Emulsion Films	202
7.5.1	Shape of a Liquid Film	202
7.5.2	Quasiequilibrium	203
7.5.3	Rupture	207
7.6	Thin Wetting Films	208
7.6.1	Stability of Thin Films	212
7.6.2	Rupture of Thin Films	214
7.7	Summary	216
7.8	Exercises	217
8	Contact Mechanics and Adhesion	219
8.1	Surface Energy of Solids	220
8.1.1	Relation between Surface Energy and Adhesion Energy	222
8.1.2	Determination of Surface Energies of Solids	223
8.2	Contact Mechanics	225
8.2.1	Elastic Contact for a Flat Punch	226
8.2.2	Adherence of a Flat Punch (Kendall)	229
8.2.3	Elastic Contact of Spheres: Hertz Model	230
8.2.4	Adhesion of Spheres: JKR Theory	232
8.2.5	Adhesion of Spheres: DMT Theory	236
8.2.6	Adhesion of Spheres: Maugis Theory	239
8.3	Influence of Surface Roughness	242
8.4	Elastocapillarity	244
8.4.1	Surface Patterns for Soft Materials	244
8.4.2	Drop on deformable surface	244
8.4.3	Contact of spheres to soft surfaces	245
8.5	Adhesion Force Measurements	245
8.6	Summary	248
8.7	Exercises	249
9	Friction	251
9.1	Macroscopic Friction	252
9.1.1	Dry Friction	252
9.1.1.1	Amontons' and Coulomb's Law	252
9.1.1.2	Sliding on Ice	259
9.1.1.3	Static, Kinetic, and Stick–Slip Friction	260
9.1.2	Friction and Adhesion	262
9.1.3	Rubber Friction	263
9.1.4	Rolling Friction	269
9.1.5	Techniques to Measure Friction	271
9.2	Lubrication	272
9.2.1	Hydrodynamic Lubrication	273
9.2.1.1	Elastohydrodynamic Lubrication	276
9.2.2	Boundary Lubrication	279

9.3	Microscopic Friction: Nanotribology	280
9.3.1	Single Asperity Friction	280
9.3.2	Atomic Stick–Slip	282
9.3.3	Velocity Dependence of Nanoscale Friction	289
9.3.4	Superlubricity	290
9.3.4.1	Structural Superlubricity	291
9.3.4.2	Static Superlubricity	292
9.3.4.3	Dynamic Superlubricity	292
9.3.4.4	Thermal Superlubricity	293
9.3.5	Thin Film Lubrication	293
9.4	Summary	295
9.5	Exercises	296
10	Solvation Forces and Non-DLVO Forces in Water	297
10.1	Solvation Forces	297
10.1.1	Contact Theorem	297
10.1.2	Solvation Forces in Simple Liquids	298
10.1.3	Solvation Forces in Liquid Crystals	302
10.2	Non-DLVO Forces in an Aqueous Medium	304
10.2.1	Hydration Forces	305
10.2.2	Hydrophobic Force	308
10.2.2.1	The Hydrophobic Effect	308
10.2.2.2	Hydrophobic Forces	310
10.3	The Interaction between Lipid Bilayers	316
10.3.1	Lipids	316
10.3.2	The Osmotic Stress Method	318
10.3.3	Forces between Lipid Bilayers	320
10.3.3.1	Undulation Forces	321
10.3.3.2	Protrusion Forces	323
10.4	Force between Surfaces with Adsorbed Molecules	325
10.5	Summary	327
10.6	Exercises	328
11	Surface Forces in Polymer Solutions and Melts	329
11.1	Properties of Polymers	329
11.2	Polymer Solutions	334
11.2.1	Ideal Chains	334
11.2.2	Real Chains in a Good Solvent	336
11.2.3	Stretching Individual Chains	338
11.3	Steric Repulsion	340
11.4	Polymer-Induced Forces in Solutions	349
11.5	Bridging Attraction	353
11.6	Depletion and Structural Forces	357
11.7	Interfacial Forces in Polymer Melts	359
11.8	Summary	361
11.9	Exercises	362

12 Solutions to Exercises 363

Chapter 2 363

Chapter 3 364

Chapter 4 365

Chapter 5 367

Chapter 6 370

Chapter 7 372

Chapter 8 373
