Contents

1 Chromatography and Spectrometry

Practical Implications of the Theory in HPLC	3
<i>J.F.K. Huber</i>	
Applications of HPLC	14
<i>R. Battaglia</i>	
Analysis of Vitamins in Food by HPLC	27
<i>B. Hedlund</i>	
Determination of Fat-soluble Vitamins by HPLC	33
<i>A. Rougerau, A. Guiller, J. Gore, O. Person</i>	
Determination of Methyl and Ethyl Caffeate in Vegetables by HPLC with Electrochemical Detection	41
<i>G. Sontag, F.I. Schäfers, K. Herrmann</i>	
High Performance Liquid Chromatographic Analysis of Short-Chain Carboxylic Acids	47
<i>C. Gonnet, M. Marichy</i>	
Separation and Estimation of Galacturonic Acid by HPLC	53
<i>E. Forni, R. Giangiacomo, A. Polesello</i>	
The Determination of Food Additives by Ion-Pair Liquid Chromatography	59
<i>G. van de Haar, J. P. Cornet</i>	
High Performance Liquid Chromatography of Food Dyes	64
<i>J. Bricout</i>	
Analysis of Phenols in Smoke, Smoke Preparations and Smoked Meat Products	70
<i>L. Toth, R. Wittkowski, W. Baltés</i>	
Investigation on Contamination of Food by Polycyclic Aromatic Hydrocarbons	76
<i>K. Tiefenbacher, W. Pfannhauser, H. Woidich</i>	

VIII Contents

Degradation and Metabolism of Relevant Pesticide Residues	83
<i>R. Engst</i>	
Possibilities of the Amino Acid Analyser in the Fruit Juice Analysis	97
<i>W. Ooghe</i>	
Determination of Rare Sugars in Fruits After Separation by Gel Chromatography	105
<i>H. Scherz</i>	
Correlation of Gel Chromatographic and Sensory Profiles used for the Evaluation of Food Products	108
<i>J. Pokorný, N. N. Lý, J. Karnet, J. Pavlis, A. Marcín, J. Davídek</i>	
Separation of Histamine Reverse-Phase by HPTLC and Soap-TLC and its Determinations in Tuna Fish	114
<i>V. Coas, L. Lepri</i>	
Gas Chromatography in Food Analysis	120
<i>L. Boniforti, S. Lorusso</i>	
Methodological Problems in Vitamin B ₆ Estimation	132
<i>E. Kienzl, P. Riederer, J. Washüttl</i>	
Considerations and Remarks about Honey Volatile Components	137
<i>C. Bicchi, C. Frattini, F. Belliardo, G. M. Nano</i>	
Use of Glass Capillary Columns for the Determination of Fusarium Mycotoxins in Food	143
<i>A. Bata, R. Lásztity, J. Galács</i>	
Propylene Carbonate, Superior Solvent for the Extraction of Polycyclic Aromatic Hydrocarbons	149
<i>K. Potthast</i>	
Theory and Special Methods of Mass Spectrometry	155
<i>S. Abrahamsson</i>	
Selectivity of Reagent Gases as used in the Analysis of Flavour Mixtures	162
<i>U. Rapp, M. Hoehn, C. Kapitzke, G. Dielmann</i>	
Some Examples for the Identification of Artificial Flavours in Food	168
<i>W. Pfannhauser, R. Eberhardt, H. Woidich</i>	
Study on the Composition of Cruciferae Oils by Gas Chromatography and Mass Spectrometry	174
<i>S. Lorusso, L. Boniforti, A. Selva, E. Chiacchierini</i>	

Analysis of Organophosphoric Pesticide Residues in Food by GC/MS Using Positive and Negative Chemical Ionisation	183
<i>H. J. Stan, G. Kellner</i>	
Use of Positive and Negative Chemical Ionisation Techniques to Determine and Characterize Free Amino Acids by Mass Spectrometry	190
<i>D. Fraisse, F. Maquin, J. C. Tabet, H. Chaveron</i>	
Qualitative and Quantitative Aspects of the Analysis of Trace Contaminants in Foods by Selected Ion Monitoring	196
<i>J. R. Startin, J. Gilbert</i>	
2 Bioassay and Enzymatic Methods	
Bioassays in Food Analysis	205
<i>J. Lüthy</i>	
Immunochemistry in Protein Analysis	215
<i>J. Daussant</i>	
A New Method for the Rapid Detection of Microbial Contamination of Fruit Juices	229
<i>J.G.H.M. Vossen, H.D.K.J. Vanstaen</i>	
Amines, Food and Brain Function	234
<i>P. Riederer, G.P. Reynolds, K. Jellinger</i>	
Determination of Subresidual Proteolytic Activities in Foods	240
<i>P. Rauch, L. Fukal, J. Káš</i>	
Applications of Isoelectric Focusing to the Analysis of Food Proteins	247
<i>P.G. Righetti, A.B. Bosisio</i>	
Ultrathin-Layer Isoelectric Focusing, Electrophoresis and Protein Mapping of Must and Wine Proteins	264
<i>A. Görg, W. Postel, R. Westermeier, G. Günther</i>	
Enzymes in Food Analysis	270
<i>C. Mercier</i>	
Fast Method for Enzymatic Determination of Starch Using an Oxygen Probe	286
<i>J.C. Cuber</i>	
A Heat Resistant Trypsin Inhibitor in Beans (<i>Phaseolus vulgaris</i>)	292
<i>U.M. Lanfer-Marquez, K. Rubach, W. Baltes</i>	

X Contents

Post Mortem Changes of Enzymatic Activities and Morphology in Meat	300
<i>V. Vána, P. Rauch, J. Kás</i>	
Rapid Chromatographic Analysis of Enzymes and Other Proteins	306
<i>O. Mikes</i>	
New Chlorine Containing Organic Compounds in Protein Hydrolysates	322
<i>J. Davídek, J. Velišek, V. Kubelka, J. Janíček</i>	
Method for the Qualitative and Quantitative Analysis of Gelling and Thickening Agents	327
<i>U. Pechanek, W. Pfannhauser, H. Woidich</i>	

3 Element Analysis

Assets and Deficiencies in Elemental Analysis of Food-Stuffs	335
<i>G. Tölg</i>	
The Analysis of Inorganic Contaminants in Food	356
<i>L.E. Coles</i>	
Determination of Arsenic in Muscles and Liver of Some Fresh-Water Fish	367
<i>I. Petrović, F. Mihelić, T. Masina</i>	
Quality Assessment of the Edible Part of Mussels: Determination of Lead and Cadmium by Atomic Absorption Spectroscopy and Voltammetry	372
<i>L.G. Favretto, G.P. Marletta, L. Favretto</i>	
A Statistical Approach to the Balance of Lead in Milk and Some Dairy Products	377
<i>G.P. Marletta, L.G. Favretto, C. Calzolari</i>	
Study on the Presence of Heavy Metals in Cereals	383
<i>M. Baldini, M. Centi, C. Micco, A. Stacchini</i>	
Trace Elements (Cr, Mn, Cu, Zn, Cd, Hg and Pb) Content in Italian Foods and in the Meals Consumed in Other European Countries	389
<i>G.C. Santoprete, N. Wolkenstein</i>	

4 Chemical Reactions and Interactions

Carbonisation and Caramelisation Measurements by Near Infrared Reflectance	397
<i>M. Meurens, M. Vanbelle</i>	

Importance and Quality of Lipoproteins from Wheat Flour	403
<i>H. Stachelberger, E. Schönwald</i>	
Comparison of the Antioxidative Activity of Maillard and Caramelisation Reaction Products	409
<i>A. Huyghebaert, L. Vandewalle, G. Van Landschoot</i>	
Model Studies on the Heating of Food Proteins: Influence of Water on the Alterations of Proteins Caused by Thermal Processing	416
<i>J.K.P. Weder, U. Scharf</i>	
Fractionation and Sensory Evaluation of the Reaction Products of Reducing Sugars and their Degradation Products with L-Lysine	422
<i>J. Davidek, J. Pokorný, H. Bulantová, A. Marcín, J. Pavlis, G. Janíček</i>	
Interactions of Artificial Sweeteners with Food Additives	428
<i>G. Kroyer, J. Washüttl</i>	
 5 Poster Session	
Determination of Carbamate Pesticides	437
<i>G. Blaicher, W. Pfannhauser, H. Woidich</i>	
Evaluation of the Lipid Composition of Some Infant Formula	443
<i>G. Bellomonte, B. Carratu, R. Dommarco, S. Giammarioli, E. Sanzini</i>	
Immunological Detection of Meat from Turkey	449
<i>A. Schweiger, K. Hannig, H.O. Günther, S. Baudner</i>	
Determination of Glucose, Fructose and Small Amounts of Saccharose in Honey	453
<i>J. Jarý, M. Marek, J. Bacilek</i>	
Gas-Chromatographic Analysis of Amino Acids in Fruit Drinks	458
<i>J.P. Roozen, M.Th. Janssen</i>	
Determination of Pyrethrins in Flour	461
<i>I. Scheidl, W. Pfannhauser, H. Woidich</i>	
Correlation of Isotopic Composition and Origin of Foods	464
<i>E.R. Schmid, H. Grundmann, W. Papesch, I. Fogy</i>	
Immobilization of Glucose Oxidase for Analytical Purposes	470
<i>O. Valentová, M. Marek</i>	

XII Contents

Investigation of Colloid Substances in Must and Wine	476
<i>J.-C. Villettaz, R. Amado, H. Neukom</i>	
Investigation of Proteins Regarding their Functionality for Baking	482
<i>H.J.G. Wutzel</i>	
Investigation about Lead and Cadmium in Wild Growing Edible Mushrooms from Differently Polluted Areas	486
<i>J. Dolischka, I. Wagner</i>	
Evaluation of Lead by Automated Anodic Stripping Voltammetry in Canned Juice in Presence of High Tin Concentration	492
<i>A. Carisano, G.P. Cellerino, G.C. Dellatorre</i>	
Index	499
