

# **System Theory and System Analysis in Agricultural Economics**

Proceedings of the Fourth Symposium  
of the  
European Association  
of Agricultural Economics (EAAE)  
June 14-17, 1982, Budapest, Hungary

*Ost-2-ml.*

edited by  
C. Csáki and I. Gönczi

Kieler Wissenschaftsverlag Vauk  
1982

LIST OF CONTENT

INTRODUCTION	1
I. NATIONAL AGRICULTURAL SYSTEMS, STUDIES ON MACRO LEVEL	2
K.S.Parikh: The analysis of Policy Alternatives for Addressing Global Issues in Food and Agriculture with a Set of Linkable National Models	4
I. Lukinov: Economic Relations in the System of Agro-Industrial Complex of the Ukrainian SSR	15
K. Frohberg: The Structure of the Agricultural Modules of the Ec-model	26
L.V.Tretyakov: On Simulation of Food Production and Consumption	46
M.Shah,G.Fischer: Resources, Environment and Technology Options for Food Production and Self Sufficiency in Kenya	48
L. Kettunen: The Use of the Finnish Food Model for Policy Purposes	59
S. Mészáros: System Analysis in Hungarian Food Production with Special Reference to Commodity Structure	73
C.H.Hanf: A Recursive Model of the Dairy Sector in West Germany	92
T. Heikkilä: A Model for the Allocation of Regional Agricultural Subsidies	117
J.Viaene: Market Models for Beef and Pork	129
H.Lindenau: Preliminary Experience in the Use of Applied Systems Analysis in GDR Agricultural Research	139
II. ENTERPRISE SYSTEMS, STUDIES ON MICRO LEVEL	145
A. Sipos: Production System in the Hungarian Agriculture	146
I.Gönczi: The Agricultural Enterprise as a System	152
H.Seuster: System Theory and Organization of the Farm Enterprise	168
H.Rheinheimer: An Empirical Analysis of Recent Methods for Farm Management in the Federal Republic of Germany	180
F. Szakál: The Analysis of Structural Flexibility of Agricultural Firms	195

W. Adamus: System Analysis of Spatial Organization in State Farms	207
J. Tóth: Automating Planning and Management in System of Agricultural Enterprises	220
C. Broussolle: Systems Analysis Applied to the Production and Processing of Farm Products	226
Gy. Ernyei: A System Theory Approach to Investigata Vertical Relations in Vegetable Oil Industry	237
S.L. Koretsky: Use of Multi-Staged Transport Models in Agro-Industrial Complex	246
-III. PRODUCTION PROCESSES, SPECIAL PROBLEMS	255
E. van Elderen: Simulation of Agricultural Operations and Processes	256
D. Faust: The System Approach to Agricultural Engineering Problems	266
H.H. Sundermeier: Planning Cost-Minimum Fertilizer Use Considering Animal Wastes	278
A. Eöry: A New Method in the Model Validation for Economic Forecasting	286
SYSTEM APPROACH AND AGRICULTURE. Closing Remarks by Csaba Csáki.	299
LIST OF PARTICIPANTS	306
