Hadron Substructure in Nuclear Physics

(Indiana University, 1983)

Edited by

W-Y. P. Hwang and M. H. Macfarlane

Nuclear Theory Center, Indiana University

American Institute of Physics

New York

1984

TABLE OF CONTENTS

CHAPTER I: BASIC IDEAS & NUMERICAL RESULTS: LATTICE QCD, POTENTIAL MODEL, AND BAG MODEL.

1. Flux-Tube Quark Model of Hadrons -- J. Carlson, J. Kogut, and V.R. Pandharipande (Speaker)...	2
2. Quark-Cluster Potential Model with Relativistic Kinematics -- D.B. Lichtenberg.....	18
3. Modeling QCD with the Soliton Bag -- L. Willets.....	27
4. Understanding the Cloudy Bag Model -- G.A. Miller.....	38

Session Chairman: H.W. Fearing (TRIUMF)

CHAPTER II: SOLITON MODEL OF HADRONS

1. Mean Field Theory of the Linear σ -Model: Chiral Solitons -- S. Kahana (Speaker) and G. Ripka.....	61
2. The Nucleon as a Topological Chiral Soliton -- M. Rho.....	77
3. A Chiral Soliton Model for Nucleon and Delta -- M.K. Banerjee.....	88

Session Chairman: D. Koltun (University of Rochester)

CHAPTER III: HADRON INTERACTIONS AND CURRENTS IN TERMS OF QUARKS

1. A Many-body Confinement Potential Model for Multi-hadron Systems -- D. Robson.....	100
2. Effects of Quark Structure on NN Scattering - Relevance to Current Data and Bag Models -- E.L. Lomon.....	117
3. Unifying Hadron-Hadron Interactions in Terms of Relativistic Quarks: Basic Aspects with Application to Nucleon-Nucleon Forces -- W-Y.P. Hwang.....	134
4. Testing Fundamental Interactions in Nuclei -- L.S. Kisslinger	149

Session Chairman: E.F. Redish (University of Maryland)

CHAPTER IV: HADRON INTERACTIONS AND CURRENTS: CONTINUED

1. Quark Distributions in Nuclei from Lepton Experiments
-- J.P. Vary..... 171
2. Meson and Isobar Degrees of Freedom in Nuclear Forces
-- R. Vinh Mau..... 187
3. Energy Transfer Effects in Meson Exchange Currents
-- G.E. Walker..... 207

Session Chairman: F.C. Khanna (Chalk River)

CHAPTER V: NUCLEAR CONSTITUENTS AND NUCLEAR MATTER

1. Quarks or Hadrons in Nuclei
-- C.W. Wong..... 228
2. Quantum Hadrodynamics and Nuclear Matter
-- B.D. Serot..... 240

Session Chairman: M.H. Macfarlane (Indiana University)

CHAPTER VI: SELECTED CONTRIBUTIONS I

1. A Resonating Group Quark-Cluster Model for Two-Nucleon System
-- Y.E. Kim and M. Orłowski (Speaker)..... 271
2. Effects of Confining Forces and Quantum Mechanics on Scattering
of Quarks
-- J.T. Londergan..... 285
3. Nontopological Chiral Soliton Bag
-- R. Seki (Speaker) and S. Ohta..... 296

Session Chairman: W-Y.P. Hwang (Indiana University)

CHAPTER VII: SELECTED CONTRIBUTIONS II

1. A Possible Measurement of Quark Gluon Plasma Temperature in
Relativistic Heavy Ion Collisions
-- K.F. Liu..... 306
2. A Nonrelativistic Manybody Potential Model of Quark and Nuclear
Matter
-- C.J. Horowitz..... 312

- 3. Meson Radiation from Quark-Gluon Plasma
 -- T. Matsui (Speaker), B. Banerjee, and N.K. Glendenning... 322
- 4. Bag States with Good Four-momentum in the Friedberg-Lee Model
 -- H.R. Fiebig (Speaker) and E. Hadjimichael..... 334
- 5. Pionic Interpretation of the EMC Effects
 -- D. Stump (Speaker), G. Bertsch, and J. Pumplin..... 339

Session Chairman: J.T. Londergan (Indiana University)

CHAPTER VIII: CONCLUSION

- 1. Panel Discussion: The Role of Quarks in Nuclear Physics and
 Future Prospects for Experimental Nuclear Physics
 -- S.S. Hanna, J. Cameron, J. Speth, and D. Koltun, moderated by
 M.H. Macfarlane..... 352
- 2. Summary Talk
 -- J.D. Walecka..... 378
