## TABLE OF CONTENTS

1. Introduction	1
G. Fritsch, E. Lüscher Macroscopic and microscopic properties of liquid metals and alloys: The experimental situation	3
A. Sjölander Atomic theory of liquid dynamics	63
R. Evans The thermodynamics and structure of liquid metals and their alloys	101
2. Theory of the disordered state	105
2.1 Liquid metals and alloys	
H. Beck Calculation of the electrical resistivity of liquid metals	107
F. Brouers Theory of the conductivity of liquid alloys	115
G. Jacucci, M. Klein Structure and dynamics of metals at high temperatures	131
G. Jacucci, I. McDonald Collective excitations in liquid metals and alloys	143

VIII

2.2 Amorphous and glassy systems	159
G. Cargill Atomic scale structure and structural models for amorphous metallic alloys	161
J. Hafner Calculation of the structure and stability of amorphous metallic alloys	183
J. Hafner The dynamical properties of metallic glasses	199
W. Götze The electrical conductivity of strongly disordered systems	211
K. Bennemann Theory for the electronic structure of disordered transition-metals	215
K. Bennemann Superconductivity in amorphous transition-metals	253
H. Beck Two level systems in glasses	267
H. Beck Stability of metallic glasses	275
R. Cotterill Liquids and glasses	283
3. Experimental results on disordered materials	293
3.1 Liquid metals and alloys	
W. Gläser Structure and dynamics of liquid metals by neutron scattering	295
H. Ruppertsberg Observation of short-range order	315
F. Hensel Expanded metals	325

F. Hensel	
Liquid semiconductors	335
3.2 Amorphous and glassy systems	345
H. Güntherodt	
Metallic glasses - preparation, unique properties, applications and experimental results	347
E. Hornbogen, I. Schmidt	
Forming ability and thermal stability of metallic glasses	353
A. Anderson	
Nonmagnetic properties of the glassy state	381
G. von Minnigerode	
Low temperature properties of metallic glasses	399
U. Gonser, H. Wagner	
Amorphous metals investigated by Mössbauer spectroscopy	421
H. Künzi	
Mechanical properties of metallic glasses	435
P. Oelhafen	
Electronic structure of metallic glasses studied by electron spectroscopy	447
G. Fritsch, H. Schink, J. Willer, E. Lüscher	
Pressure dependence of the electrical resistance of some metallic glasses	451
R. Haensel, P. Rabe, G. Tolkiehn, A. Werner	
EXAFS: possibilities, advantages and limitations for the investigation of local order in metallic glasses	459
W. Triftshäuser	
Positron annihilation in amorphous materials and liquid metals	479
3.3 Magnetic properties of disordered systems	499
S. Methfessel	
Ferromagnetism in amorphous metals	501
J. Mydosh	
An introduction to spin glasses	523

P. Beck	
Characteristic properties of mictomagnets (spinglasses)	545
J. Goebbels, H. Khan, K. Lüders, D. Ploumbidis	
NMR experiments on liquid and amorphous metals	573
4. Contributed Papers	585
4.1 Liquid metals	
O.J. Eder, B. Kunsch, M. Suda	
Structure factors and effective pair potentials of liquid metals	587
B. Steffen	
How to get structural informations from pair distribution functions	591
I. Ebbsjö	
Methods to calculate the compressibility of a liquid metal	595
E. Schneider, G. Franz, W. Freyland	
Investigation of the structure factor of liquid rubidium up to temperatures of 2000 K and pressures of 140 bar	599
M. Pokorny	
Application of the Faber-Ziman theory of the resistivity of liquid binary alloys on the resistivity of pure liquid lead, tin and gallium	603
G. Rainer-Harbach, S. Steeb	
Magnetic Fluctuations in Fe and Co above Curie-temperature in the solid and liquid state	607
A. Bruson, M. Gerl	
Self- and impurity diffusion in Cu and Sn in the liquid phase	611
4.2 Liquid alloys	617
W. Martin, P. Lamparter, S. Steeb, W. Freyland	
Structure of molten Au-Cs alloys by means of neutron diffraction	619
M. von Hartrott, D. Quitmann, J. Rossbach, E. Wehreter, F. Willeke	
An access to short range order in liquid metallic alloys	623

C. van der Marel Knight shift and electrical resistivity of some liquid Lithium alloys	627
J.G. Gasser, J.D. Muller Electrical resistivity of liquid Ge-Sb alloys	631
J. Walter, G. Schubert, H. Coufal, S. Sotier, E. Lüscher Electrical resistivity of liquid $(\text{Cu}_{1-x}\text{Ga}_x)$ . 98 <sup>Fe.02</sup> alloys	635
4.3 Amorphous metals	639
K. Froböse, J. Jäckle Electron-phonon interaction in amorphous metals	641
J.U. Madsen, R.M.J. Cotterill Triplet correlation in Polk-type model of Fe <sub>80</sub> B <sub>20</sub> metallic glass	645
J.-B. Suck, H. Rudin, H.-J. Güntherodt, H. Beck, J. Daubert, W. Gläser Dynamical structure factor and frequency distribution of amorphous Cu <sub>46</sub> Zr <sub>54</sub>	649
H. Gudmundsson, K.V. Rao, A.C. Anderson Effect of magnetic field on the electrical resistivity of amorphous transition metal-metalloid alloys	653
G. Weiss, W. Arnold Ultrasonic behavior of superconducting amorphous metal PdZr at low temperatures	657
G. Kögel Positron annihilation in iron-based amorphous alloys	661
J. Bieger, G. Saemann-Ischenko, H. Adrian, M. Lehmann, P. Müller, L. Söldner, E.L. Haase, C.C. Tsuei Changes of superconducting properties and electrical resistivity of amorphous compounds by means of low temperature heavy ion irradiation	665
J.-T. Eriksson, A. Arkkio, P. Berglund, J. Luomi, M. Savelainen Liquid metals and superconductivity launch a new generation of electric machines	669
