Phase Equilibria and Fluid Properties in the Chemical Industry

2nd International Conference
Berlin (West), 17 - 21 March 1980
225th Event of the EFCE

PROCEEDINGS
PART I – Manuscripts of Poster Papers
PART II – Manuscripts of Invited Papers

Published by:
DECHEMA

I.	PVT Properties and Phase Equilibria from Equations of State	
<hr/>		
1.	G. Heyen, Liège, B Liquid and vapour properties from a cubic equation of state	9
2.	J.C.G. Calado, M. Nunes da Ponte, A.M.F. Palavra, Lisboa, P W.B. Streett, Ithaca, USA The effect of pressure on the thermodynamic properties of simple liquid mixtures	14
3.	G.C. Straty, D.E. Diller, R.D. McCarty, Boulder, USA PVTx properties and equation of state for compressed and liquified nitrogen-methane mixtures	18
4.	L.A. Kleintjens, R. Koningsveld, Geleen, NL Equation of state from phase equilibria	24
5.	P. Jeschke, G.M. Schneider, Bochum, D Phase diagrams and critical phenomena in binary fluid mixtures at high pressures	29
6.	R. Döring, H. Knapp, Berlin (West) Correlation of high pressure and low temperature, vapour-liquid equilibria	34
7.	W.B. Streett, C. Tsang, U. Deiters, J.C.G. Calado, Ithaca, USA Phase equilibria in the systems H_2/CH_4 , H_2/CO and H_2/CO_2 from 70 to 260 K and pressures to 2000 bars	39
8.	K.W. Won, F.T. Selleck, C.K. Walker, Irvine, USA Vapour-liquid equilibria of the ammonia-water system	45
II.	Nonelectrolyte Solutions	
<hr/>		
9.	J. Schmelzer, Leipzig, DDR Investigations aiming at the extension and modification of the UNIFAC parameter matrix	50

	Page
10. J. Choliński, M. Palczewska-Tulińska, A. Szafrański, D. Wyrzykowska-Stankiewicz, Warsaw, PL A new method of parameter adjustment and diagnostic checks on gamma models in vapour-liquid equilibrium calculations	55
11. K. Venkateswara Rao, A. Raviprasad, C. Chiranjivi, Waltair, India Vapour-liquid equilibria of alcohol- chlorohydrocarbon systems	60
12. B. Gutsche, H. Knapp, Berlin (West) Measurement of vapour-liquid equilibria: chlorohydrocarbons and aliphatic ethers	62
13. I. Kikic, P. Alessi, P. Gozzi, Trieste, I Liquid-liquid equilibrium: Choice of auxiliary solvent for the determination of activity coefficients	68
14. R. Wennersten, G. Zacchi, G. Aly, Lund, S SOLVEX - a computer program for solvent screening	73
15. P.M.M. Blauwhoff, W.P.M. van Swaaij Enschede, NL Gas-liquid equilibria between H ₂ S, CO ₂ and aqueous amine solutions	78
16. W. Weber, H. Knapp, Berlin (West) VLE data for absorption processes at high pressures and low temperatures: CH ₃ OH-CO ₂ , CH ₃ OH-N ₂ , CH ₃ OH-CO ₂ -N ₂	84
17. H. Dreher, Ludwigshafen, W. Kast, Darmstadt, D Binary and ternary equilibria in adsorption from the gas phase	89
18. A. Krishnaiah, D.N. Rao, P.R. Naidu, Tirupati, India Excess volumes and derivations in isen- tropic compressibility of binary mixtures of 1-chlorobutane with normal alkanes	94
 <u>III. Electrolyte Solutions</u>	
19. C. Buanam-Om, W.A.P. Luck, D. Schiöberg, Marburg, D Remark to the question of ion-water interaction	100
20. T.S. Natarajan, D. Srinivasan, Madras, India Salt effects in vapour-liquid equilibria: Some anomalies	106

IV.	<u>Thermodynamics of Polymers</u>	page
21.	C.K. Hall, Princeton, USA Application of polymer scaling theories to fluids of chain molecules	115
22.	M. Lohse, E. Alper, G. Quicker, W.-D. Deckwer, Hannover, D Solubilities and diffusivities of CO ₂ in dilute polymeric solutions	116
V.	<u>Transport and Interfacial Properties</u>	
23.	W. Baldauf, H. Knapp, Berlin (West) Measurements of mutual diffusion coefficients in binary liquid systems	121
24.	W. Witt, H. Knapp, Berlin (West) Tray efficiencies in high pressure absorption: 10<p<90 bar and 220<T<260 K	126
25.	A. Horsthemke, J.J. Schröder, Hannover, D An apparatus for contact angle measurements	131
VI.	<u>Theory</u>	
26.	T.H.K. Frederking, Los Angeles, USA Near-isobaric lambda transitions in the vicinity of critical points	136
VII.	<u>Experimental Techniques</u>	
27.	J.J. Schröder, A. Horsthemke, Hannover, D An apparatus for measuring the vapour pressure reduction of dilute solutions	137
28.	M. Teller, H. Knapp, Berlin (West) Measurements of solid-liquid equilibria: Hydrocarbon-carbondioxid-systems	142
VIII.	<u>Data: Sources, Compilation, Banks, Retrieval</u>	
29.	G.S. Bainbridge, Middlesbrough, GB Information and data requirements of process industries	147
30.	H. Langer, R. Eckermann, Frankfurt/Main, D Dechema data-retrieval system - an on-line information system for retrieval and calculation of thermophysical data	153

IX. Data Needs	page
31. T. Gürkan, O.C. Öztin, Ankara, Turkey Phase equilibria data needs in liquid-liquid partition extraction: Separation of organic acids from tobacco extracts	159
Index of Authors	164
