

# Nuclear Radiation Detector Materials

Symposium held November 1982 in Boston, Massachusetts, U.S.A.

EDITORS:

**E.E. Haller**

Department of Materials Science and Mineral Engineering and Lawrence  
Berkeley Laboratory, University of California, Berkeley, California, U.S.A.

**H.W. Kraner**

Instrumentation Division and Department of Physics, Brookhaven National  
Laboratory, Upton, New York, U.S.A.

and

**W.A. Higinbotham**

Department of Nuclear Energy, Brookhaven National Laboratory, Upton,  
New York, U.S.A.

# Contents

PREFACE	vii
ACKNOWLEDGEMENTS	ix
MATERIAL GROWTH AND CHARACTERIZATION	
High Purity Germanium Crystal Growing, W. L. Hansen and E. E. Haller	1
Silicon Material Growth For Nuclear Radiation Detectors, P. A. Glasow and B. O. Kolbesen	17
Fabrication Of Ultra High Purity Silicon Single Crystals, D. Itoh, S. Kawamoto, S. Miki, I. Namba and Y. Yatsurugi	39
The Characterization Of Germanium And Silicon For Nuclear Radiation Detectors, L. S. Darken, Jr.	47
Scintillator Material Growth, O. H. Nestor	77
Cadmium Telluride Detectors And Applications, Paul Siffert	87
DETECTOR FABRICATION AND MATERIAL STUDIES	
$\text{Bi}_4\text{Ge}_3\text{O}_{12}$ (BGO) - A Scintillator Replacement For $\text{NaI}(\text{Tl})$ , M. R. Farukhi	115
Large Area Silicon Avalanche Photodiodes: Photomultiplier Tube Alternate, G. Reiff, M. R. Squillante, H. B. Serreze, G. Entine and Gerald C. Huth	131
Silicon Radiation Detectors - Materials And Applications, Jack T. Walton and E. E. Haller	141
Materials Aspects Of Germanium Radiation Detector Fabrication, G. Scott Hubbard	161
Thick Surface Barrier Detectors Made Of Ultra-High Purity P-Type Si Single Crystal, F. Shiraishi, Y Takami, M. Hosoe, Y. Ohsawa and H. Sato	175
High Voltage Operation Of Surface Barrier Detectors With A Side Groove, S. Ohkawa, K. Husimi, C. Kim, Y. Kim and D. Itoh	185
Characterization Of Single Crystal Mercuric Iodide ( $\text{HgI}_2$ ) Using Thick Detector Structures, A. Beyerle, K. Hull, J. Markakis, W. Schnepfle and L. van den Berg	191
State-Of-The-Art X-Ray Detectors Fabricated On PCG Grown Mercuric Iodide, M. R. Squillante, S. Lis, T. Hazlett and G. Entine	199
The Fabrication Of Mercuric Iodide Detectors For Use In Wavelength Dispersive X-Ray Analysers and Backscatter Photon Measurements, John R. Howes and John Watling	207

Search For A Correlation Between Stoichiometry, TSC Spectra And Nuclear Spectroscopic Capabilities of $\text{HgI}_2$ , A. Tadjine, D. Gosselin, J. M. Koebel and P. Siffert	217
Ohmic And Rectifying Contacts On High Resistivity P-Type Cadmium Telluride, A. Musa, J. P. Ponpon, and M. Hage-Ali	225
A Preliminary Observation On $\text{AgGaSe}_2$ As A Nuclear Radiation Detector, Eiji Sakai, Hiromichi Horinaka, Hajimu Sonomura and Takeshi Miyauchi	233
AUTHOR INDEX	237
SUBJECT INDEX	239
