

First International Workshop on

# **LOCAL EQUILIBRIUM IN STRONG INTERACTION PHYSICS**

**(LESIP I)**

Bad Honnef, FRG  
3-6 September 1984

Editors: D K Scott & R M Weiner

UNIVERSITÄTSBIBLIOTHEK  
HANNOVER  
TECHNISCHE  
INFORMATIONSBIBLIOTHEK

**World Scientific**

## CONTENTS

Foreword . . . . .		vii
Sewell, G. L.	Statistical Mechanical Considerations on Local Equilibrium and Hydrodynamics . . . . .	1
Feinberg, E. L.	Some Problems Concerning Ultrarelativistic Nucleus Interactions . . . . .	15
Shuryak, E. V.	Theory of QCD Vacuum and Dense Matter: Present Status and Goals . . . . .	32
Wehrberger, K.	The Hydrodynamical Model of Multiparticle Production . . . . .	47
Hama, Y.	Transverse Expansion in Hydrodynamical Models . . . . .	60
McLerran, L.	Mean Free Paths, Viscosity, and the Limitations of Perfect Fluid Hydrodynamics in the Description of the Quark-Gluon Plasma . . . . .	70
Redlich, K.	Canonical Versus Grand Canonical Treatment of the Conservations Laws . . . . .	90
Böckmann, K.	Particle Production at the CERN $p\bar{p}$ Collider . . . . .	99
Friedlander, E. M.	Fluctuations of Rapidity Density in High-Energy Nuclear Interactions . . . . .	105
Goldhaber, G.	The GGLP Effect from 1959 to 1984 . . . . .	115
Mättig, P.	General Features of Jets in $e^+e^-$ -Annihilation . . . . .	143
Fowler, G. N.	On the Quantum Optical Analogy in Pion Production . . . . .	171
Plümer, M.	The Inelasticity Distribution in High Energy Hadronic Collisions . . . . .	185

Meng Ta-chung	A Statistical Approach to Nondiffractive Hadron-Hadron Collisions . . . . .	204
Raha, S.	Solitons – A General Feature of High and Medium Energy Strong Interaction Physics . . . . .	220
Gutbrod, H. H.	New Insight into Relativistic Heavy Ion Physics through $4\pi$ Data . . . . .	236
Baumgardt, H. G.	Evidence for Two Mutually Excluding Temperatures in Relativistic FE-Emulsion Collisions . . . . .	258
Raha, S.	Geometry, Hydrodynamics and Local Equilibrium in Relativistic Heavy Ion Collisions . . . . .	268
Hefter, E. F.	A Novel Approach to the Equilibration of Nuclear Matter . . . . .	276
Remaud, B.	Nucleon-Nucleon Collision Effects on the Fast Nucleon Emission in Intermediate Energy Heavy Ion Reactions . . . . .	291
Gelbke, C. K.	Formation and Decay of Local Excitations in Nuclei . . . . .	307
Jakobsson, B.	Large-Angle Correlations between Light Particles from Intermediate Energy $^{12}\text{C}$ Induced Heavy Ion Reactions . . . . .	328
Machner, H.	Study of Local Excitations in $(\alpha, \alpha' c)$ Reactions . . .	339
Wada, R.	Medium Heavy Fragments Produced in the Reaction $^{18}\text{O} + \text{Au/Ag}$ at 84 MeV/u . . . . .	353
Boal, D. H.	Low Temperature Phase Transitions . . . . .	364
Santo, R.	Mechanism of Light Particle Emission in $^{12}\text{C}$ Induced Reactions between 25 MeV/u and 84 MeV/u . . . . .	379
Boal, D. H.	Nuclear Physics Summary Talk . . . . .	387

Carruthers, P.	Is Local Equilibrium a Useful Concept in Hadronic Interactions? (High Energy Physics Summary) . . . . .	390
----------------	---	-----

Round Table Discussions:

I.	Mean Free Path In Strong Interactions . . . . .	415
	Moderator: E. V. Shuryak	
	Panel: Boal, Carruthers, Feinberg, McLerran, Weiner	
II.	The Landau-Hydrodynamical Model . . . . .	427
	Moderator: R. M. Weiner	
	Panel: Carruthers, Feinberg, Garpman, McLerran, Shuryak	
III.	Perspectives of Strong Interaction Physics . . . . .	447
	Moderator: G. N. Fowler	
	Panel: Carruthers, Feinberg, Friedlander, Holmgren, Machner	
	List of participants . . . . .	463
