Contents

SERIES FOREWARD	v
PREFACE	vii
1. Managers, Micros and Mainframes: an Introduction	1
Matthias Jarke	
PART I Technology of End-User Computing	
2. Office Automation Tools	11
Dennis Tsuchritzis	
3. Designing Advanced Workstations	21
Amy D Wohl	
4. Design Issues in Large Networks of Personal Computers	29
Bezalel Gavish	
5. Distributed Databases and Distributed Processing Between Personal Computers and Mainframes	45
Daniel R Ries	
PART II Practice of End-User Computing	
6. Managing the Diffusion of End-User Computing Technologies: A Fifties Mindset with Eighties Tools	55
Leslie R Porter	
7. Company Experiences with End-User Computing	73
Christine V Bullen	
8. From PCs to Managerial Workstations: Organizational Environment and Management Policy in the Financial Industry	87
Kenneth C Laudon	
PART III Management of End-User Computing	
9. User-Developed DSS: Steps toward Quality Control	119
Maryam Alavi	

10. The Use of Formal Mechanisms for Linking the Information Systems Function with End-Users	133
Robert W Zmud and Mary R Lind	
11. Criteria for Task Allocation in Micro–Mainframe Applications	151
August-Wilhelm Scheer	
PART IV Group Cooperation and Assumption Management	
12. Implications of Open Systems	179
Carl Hewitt	
13. A Methodology for Identifying Strategic Opportunities for DSS	195
John C Henderson	
14. Micro–Mainframe DSS for Remote Multi-Person Decisions	205
Matthias Jarke, X Tung Bui and M Tawfik Jelassi	
PART V Organizational Impact	
15. Exploiting Information Technologies to Design More Effective Organizations	221
George P Huber and Reuben R McDaniel, Jr	
16. Highways and Traffic: Building the Telecommunications Infrastructure	237
Peter G W Keen	
17. End-User Computing: Impact on Education and Organizational Development	269
Edward A Stohr and Jon A Turner
