

Sixth in the SPIE Critical Reviews of Technology Series
Proceedings of SPIE—The International Society for Optical Engineering

Volume 475

Remote Sensing

Philip N. Slater
Chairman/Editor

Cosponsored by
American Society of Photogrammetry

May 1–2, 1984
Arlington, Virginia

An SPIE Critical Reviews of Technology conference brings together an invited group of experts in a selected technology. Each presents an extended critical review paper that characterizes the state of the art of the technology by assessing key developments from past research and identifying important areas of current work. The conference is designed to present an overview of the technology and to result in a proceedings of value to individuals working in this or related technologies.

SPIE (The Society of Photo-Optical Instrumentation Engineers) is a nonprofit society dedicated to advancing engineering and scientific applications of optical, electro-optical, and optoelectronic instrumentation, systems, and technology.

REMOTE SENSING

Volume 475

Contents

Conference Committee	iv
Introduction	v
SESSION 1. MODELING STUDIES	1
475-01 Review of models and measurements of multispectral reflectance by plant canopies: recommendations for future research , N. N. J. Bunnik, National Aerospace Lab. (The Netherlands)	2
475-02 Electro-optical terrain reflectance modeling: perspective , J. A. Smith, K. D. Cooper, Colorado State Univ.; A. H. Strahler, City Univ. of New York	12
SESSION 2. ATMOSPHERIC EFFECTS AND RADIOMETRIC CALIBRATION	19
475-03 Atmospheric effects on remote sensing of surface reflectance , Y. J. Kaufman, Univ. of Maryland and NASA/Goddard Space Flight Ctr.	20
475-04 The importance and attainment of accurate absolute radiometric calibration , P. N. Slater, Optical Sciences Ctr., Univ. of Arizona	34
SESSION 3. MARINE AND GEOLOGICAL RESEARCH	41
475-05 Remote sensing of coastal and ocean properties , V. Klemas, Univ. of Delaware	42
SESSION 4. SPECTRAL SIGNATURE STUDIES	55
475-08 High spectral resolution remote sensing of the land , A. F. H. Goetz, Jet Propulsion Lab.	56
SESSION 5. AGRICULTURAL RESEARCH	69
475-09 Remote sensing of vegetation at regional scales , F. G. Hall, NASA/Johnson Space Ctr.	70
475-10 Remote sensing of vegetation characteristics for farm management , R. D. Jackson, U.S. Dept. of Agriculture ...	81
SESSION 6. INFORMATION EXTRACTION AND PROCESSING	97
475-11 Interpretation of topographic relief from digital multispectral imagery , J. B. Campbell, R. M. Haralick, S. Wang, Virginia Polytechnic Institute and State Univ.	98
475-12 Data system considerations for remote sensing , F. C. Billingsley, Jet Propulsion Lab.	117
SESSION 7. ENGINEERING AND MAPPING CONSIDERATIONS	129
475-13 Remote sensing research: the past as prolog , D. A. Landgrebe, Purdue Univ.	130
475-14 Mapping the earth from space in the 1980s , R. Welch, Univ. of Georgia	136
SESSION 8. FUTURE PROSPECTS	147
475-15 Future of remote sensing—a viewpoint from industry , A. B. Park, Natural Resources Consulting Services.	148
Addendum	152
Author Index	153
