

High Resolution NMR Spectroscopy of Synthetic Polymers in Bulk

Edited by

Richard A. Komoroski

Contents

1. Overview of High-Resolution NMR of Solid Polymers	1
<i>Richard A. Komoroski and Leo Mandelkern</i>	
Introduction	1
Structure and Morphology of Solid Polymers	3
High-Resolution NMR: Solution versus Solid	4
Polymer Physical Chemistry: Current and Future Areas for Solid-State NMR Studies	11
Analytical Applications, Biopolymers, and Surfaces	15
Summary	17
References	17
2. Principles and General Aspects of High-Resolution NMR of Bulk Polymers	19
<i>Richard A. Komoroski</i>	
Introduction	19
Solid-State Interactions	20
Signal Generation and Sensitivity	35
Line-Narrowing Schemes and Molecular Motion	46
Peak Assignments and Two-Dimensional NMR	49
Some Practical Aspects of NMR of Solid Polymers	59
Summary	61
References	61
3. High-Resolution NMR of Glassy Amorphous Polymers	63
<i>James R. Lyerla</i>	
Introduction	63
NMR Structural Studies of the Glassy State	64
Molecular Motions in the Glassy State	83
Relaxation Measurements in the Solid State	96
Summary	117
References	117

4. Carbon-13 NMR of Solid Amorphous Polymers Above T_g	121
<i>Richard A. Komoroski</i>	
Introduction	121
Observation of ^{13}C Spectra above T_g	122
Carbon-13 Spin-Relaxation Parameters	125
Contributions to the Linewidth	129
Effect of Molecular Weight	133
Effect of Temperature Relative to T_g	135
Crosslinks	140
Presence of Filler	142
Heterogeneous Systems and the Interface	144
Summary	150
References	151
Appendix	152
5. Carbon-13 Solid-State NMR of Semicrystalline Polymers	157
<i>David E. Axelson</i>	
Introduction	157
Experimental Considerations	161
Amorphous Phase Studies	168
Separation of Phases by NMR	175
Phase Structure Analysis	202
Spin-Lattice Relaxation and Polymer Morphology	209
Summary	221
References	222
Appendix	225
6. Conformational Analysis of Polymers by Solid-State NMR	227
<i>David E. Axelson</i>	
Introduction	227
Examples of Solid-State NMR and Conformational Analysis	229
Summary	243
References	244

7. Polymer Motion in the Solid State	247
<i>Alan A. Jones</i>	
Introduction	247
Experimental Techniques for Characterizing Local Motions	248
Polycarbonates as an Example	252
Relationship Between NMR and Other Dynamical Methods	275
Acknowledgment	280
References	280
8. High-Resolution NMR Studies of Oriented Polymers	283
<i>Anita J. Brandolini and Cecil Dybowski</i>	
Orientation in Polymers	283
Anisotropic NMR Interactions	287
NMR Spectroscopy of Oriented PTFE	293
Summary	303
Acknowledgment	304
References	304
9. High-Resolution Solid-State NMR of Protons in Polymers	307
<i>Bernard C. Gerstein</i>	
Introduction	307
Principles	309
Applications	321
Summary	333
Acknowledgment	333
References	334
10. Deuterium NMR of Solid Polymers	335
<i>Lynn W. Jelinski</i>	
Scope	335
The Deuterium NMR Experiment	335
Applications to Polymer Science	348
Prognosis	362
Appendix	362
References	362
